

PRINCIPLES OF POLYMER PROCESSING

ZEHEV TADMOR

*Professor of Chemical Engineering
Department of Chemical Engineering
Technion-Israel Institute of Technology
Haifa, Israel*

COSTAS G. GOGOS

*Professor of Chemical Engineering
Department of Chemistry and Chemical Engineering
Stevens Institute of Technology
Hoboken, New Jersey*

A WILEY-INTERSCIENCE PUBLICATION

JOHN WILEY & SONS

New York • Chichester • Brisbane • Toronto • Singapore

Contents

1 *Introduction to Polymer Processing, 1*

- 1.1** Survey of Polymer Processing Methods and Machinery, 1
- 1.2** Analysis of Polymer Processing in Terms of Elementary Steps and Shaping Methods, 22

PART I STRUCTURE AND PROPERTIES OF POLYMERS

2 *The Nature of Polymers and Plastics, 31*

- 2.1** Polymers, 31
- 2.2** Polymer Additives, 42

3 *Morphology and Structuring of Polymers, 46*

- 3.1** Definition of Structuring, 46
- 3.2** Polymer Single Crystal Morphology, 49
- 3.3** Polymer Melt Crystallized Morphology, 56
- 3.4** Effects of Crystallization Temperature, 58
- 3.5** Effects of Crystallization Pressure, 64
- 3.6** Strain and Flow-Induced Crystallization, 65
- 3.7** Effects of Cold Drawing, 70
- 3.8** Amorphous Polymers, 73
- 3.9** Experimental Determination of Polymer Molecular Orientation, 77

4 *Surface Properties, 87*

- 4.1** Surface Tension, 87
- 4.2** Adhesion, 90
- 4.3** Tribology, 91
- 4.4** Triboelectricity, 99

PART II ENGINEERING FUNDAMENTALS

5 *Transport Phenomena, 105*

- 5.1** The Balance Equations, 105
- 5.2** Modeling of Engineering Processes, 122

xii Contents

- 5.3** Common Boundary Conditions and Simplifying Assumptions, 124
- 5.4** The Lubrication Approximation: Reynolds' Equation, 126
- 5.5** Transport and Thermodynamic Properties of Polymers, 128

6 Polymer Melt Rheology, 146

- 6.1** Constitutive Equations, 146
- 6.2** Non-Newtonian Behavior of Polymer Melts, 147
- 6.3** Polymer Melt Constitutive Equations, 154
- 6.4** Linear Viscoelasticity, 158
- 6.5** The Generalized Newtonian Fluid (GNF) Equations, 167
- 6.6** The Criminale-Ericksen-Filbey (CEF) Equation, 172
- 6.7** Experimental Determination of the Viscosity and Normal Stress Difference Coefficients, 176
- 6.8** Elongational Flows, 184

7 Characterization of Mixtures and Mixing, 196

- 7.1** Basic Concepts and Mixing Mechanisms, 197
- 7.2** Characterization of Mixtures, 201
- 7.3** Gross Uniformity, 205
- 7.4** Texture, 208
- 7.5** The Scale of Segregation and the Scale of Segregation Profile, 209
- 7.6** The Intensity of Segregation, 215
- 7.7** Characterization of the Mixing Process, 216
- 7.8** Distributive Mixing, 217
- 7.9** Laminar Mixing, 217
- 7.10** Strain Distribution Functions, 222
- 7.11** Residence Time Distribution, 229
- 7.12** Generalization of Distribution Functions, 232
- 7.13** Fluctuation of Composition with Time, 233

PART III ELEMENTARY STEPS IN POLYMER PROCESSING

8 Handling of Particulate Solids, 243

- 8.1** The Role of Particulate Solids in Processing, 243
- 8.2** Some Unique Properties of Particulate Solids, 244
- 8.3** Agglomeration, 246
- 8.4** The Mohr Circle of Stresses, 246
- 8.5** The Equations of Equilibrium, 249
- 8.6** Yield Loci, 249
- 8.7** Pressure Distribution in Bins and Hoppers, 253
- 8.8** Gravitational Flow in Bins and Hoppers, 257
- 8.9** Compaction, 260

- 8.10** Flow in Closed Conduits, 263
- 8.11** Mechanical Displacement Flow, 264
- 8.12** Steady Mechanical Displacement Flow Aided by Drag, 266
- 8.13** Steady Drag Induced Flow in Straight Channels, 269

9 *Melting, 276*

- 9.1** Classification of Melting Methods, 276
- 9.2** The Roles of Geometry, Boundary Conditions, and Physical Properties in Melting, 281
- 9.3** Conduction Melting Without Melt Removal, 283
- 9.4** Solidification or Melting of a Polymer Sheet; Numerical Solution by the Method of Finite Differences, 293
- 9.5** Moving Heat Sources, 303
- 9.6** Sintering, 305
- 9.7** Conduction Melting with Forced Melt Removal, 307
- 9.8** Drag Induced Melt Removal, 308
- 9.9** Pressure Induced Melt Removal, 321
- 9.10** Dissipative Mix-Melting, 324

10 *Pressurization and Pumping, 333*

- 10.1** Classification of Pressurization Methods, 334
- 10.2** Dynamic Viscous Pressurization: Parallel Plate Flow, 335
- 10.3** The Screw Pump, 347
- 10.4** Dynamic Viscous Pressurization: Non-Parallel Plate Flow, 360
- 10.5** Two Rotating Rolls: Calenders and Roll-Mills, 363
- 10.6** Dynamic Normal Stress Pressurization, 372
- 10.7** Static Mechanical Pressurization and Positive Displacement Flows, 379
- 10.8** Plunger-Cylinder, 379
- 10.9** Squeezing Flow Between Parallel Disks, 382
- 10.10** Gear Pumps, 386
- 10.11** Intermeshing Counterrotating Twin Screws, 389

11 *Mixing, 404*

- 11.1** The Scope of Mixing Operations, 404
- 11.2** Classification of Mixers, 405
- 11.3** Laminar Mixing of Rheologically Homogeneous Liquids, 409
- 11.4** Laminar Mixing of Rheologically Nonhomogeneous Liquids, 426
- 11.5** Homogenization, 432
- 11.6** Dispersion, 434
- 11.7** Motionless Mixers, 438
- 11.8** Roll Mills, 442
- 11.9** High Intensity Internal Batch Mixers, 447
- 11.10** Single Screw Extruders, 452

12 *Modeling of Processing Machines with Elementary Steps, 467*

- 12.1 The Single Screw Melt Extrusion Process, 467
- 12.2 The Single Screw Plasticating Extrusion Process, 477
- 12.3 The Diskpack Polymer Processor, 509

PART IV SHAPING

13 *Die Forming, 521*

- 13.1 Capillary Flow, 524
- 13.2 Elastic Effects in Capillary Flows, 533
- 13.3 Fiber Spinning, 542
- 13.4 Sheet and Flat Film Forming, 545
- 13.5 Tube and Tubular (Blown) Film Forming, 551
- 13.6 Wire and Cable Coating, 560
- 13.7 Profile Extrusion, 565

14 *Molding and Casting, 584*

- 14.1 Injection Molding of Polymers, 584
- 14.2 Injection Molding of Reacting Polymers, 610
- 14.3 Compression Molding, 619
- 14.4 Casting, 624

15 *Secondary Shaping, 632*

- 15.1 Melt Spun Fiber Stretching, 632
- 15.2 The Film Blowing Process, 637
- 15.3 Analysis of the Free Sheet Blowing (Thermoforming) Process: Elastic Behavior, 642
- 15.4 The Thermoforming Process, 647
- 15.5 The Blow Molding Process, 650

16 *Calendering, 661*

- 16.1 The Calendering Process, 661
- 16.2 Mathematical Modeling of Calendering, 664
- 16.3 The Finite Element Method (FEM), 669
- 16.4 Analysis of Calendering with the FEM, 676

17 *A Guide to the Analysis of Polymer Processing in Terms of Elementary Steps and Shaping Methods, 683*

APPENDICES

- A** *Rheological and Thermodynamic Properties of Polymers, 693*
- B** *Conversion Factors, 704*
- C** *Notation, 708*

Index, 714
