

LEE SMOLIN

**THREE ROADS TO
QUANTUM GRAVITY**

WEIDENFELD & NICOLSON · LONDON

CONTENTS

Acknowledgements	vii
Prologue: The quest for quantum gravity	1
Part I Points of departure	15
1 <i>There is nothing outside the universe</i>	17
2 <i>In the future we shall know more</i>	26
3 <i>Many observers, not many worlds</i>	33
4 <i>The universe is made of processes, not things</i>	49
Part II What we have learned	67
5 <i>Black holes and hidden regions</i>	69
6 <i>Acceleration and heat</i>	77
7 <i>Black holes are hot</i>	88
8 <i>Area and information</i>	95
9 <i>How to count space</i>	106
10 <i>Knots, links and kinks</i>	125
11 <i>The sound of space is a string</i>	146

Part III The present frontiers	167
12 <i>The holographic principle</i>	169
13 <i>How to weave a string</i>	179
14 <i>What chooses the laws of nature?</i>	194
Epilogue: A possible future	207
Glossary	212
Suggestions for further reading	221
Index	227
