Contents

<i>About the Series</i>	v
<i>Preface</i>	vii
1 Introduction	1
1.1 Introduction	1
1.2 Analysis of the Terminology	6
2 Techniques for Photoconductivity Measurements	34
2.1 Introduction	34
2.2 Conventional Experimental Set-up	36
2.3 Analysis of Contact Configuration	39
2.4 Methods of Measurement	45
2.5 Time-Dependent Photoconductivity Measurements	51
2.6 Instrumental Noise Considerations	55
2.7 Methods of Modulating Light Pulses	57
2.8 Light Sources	60
3 Transient Photoconductivity	77
3.1 General Information and Impediments to Analysis	77
3.2 Time and Space Dependence on Charge Carriers	81
3.3 Time Constants and Recombination Processes	84
3.4 Evaluation of Time Constants	89
3.5 Effects of Traps on Photocurrent	94
3.6 Effects of Trap Parameters on the Form of Relaxation Curves	96
	ix

3.7	Detection and Separation of the Delayed Component	109
3.8	Transient Measurements for Weak Signal Analysis	111
4	Band Structure Details and Photoconductivity	118
4.1	General Information	118
4.2	Survey of Absorption Processes	119
4.3	Superlattice	151
4.4	Modulation-doped Semiconductor Heterojunction Superlattice	157
4.5	The n-i-p-i Superstructure	159
4.6	Superlattice of Diluted Magnetic Semiconductors	162
5	Noise	167
5.1	Significance of the Term "Noise"	167
5.2	Physical and Mathematical Background	168
5.3	Types of Noise	170
6	Modern Photodetectors	200
6.1	Introduction	200
6.2	Physical Principles of n-p Junction	201
6.3	Mathematical Model	202
6.4	Photovoltaic Effect	207
6.5	Modern Photosensors	213
6.6	A Design for a Speculative Detector	242
6.7	Position-Sensitive Detector	244
6.8	Noise in Detectors and Detectivity	245
7	Special Topics	253
7.1	Extrinsic Photoconductivity	253
7.2	Photoionization of Donors or Acceptors	260
7.3	Photoquenching	262
7.4	Negative Photoconductivity	268
7.5	Photosensitivity	273
7.6	Persistent Photoconductivity	281
7.7	Photoelectric Fatigue	285
7.8	Potential Materials for Visible and Infrared Detectors	286
7.9	Present and Future	289
	<i>Appendix</i>	294
	<i>List of Symbols</i>	299
	<i>Index</i>	305
