HANDBOOK OF MASS MEASUREMENT

FRANK E. JONES
RANDALL M. SCHOONOVER

CRC PRESS

Boca Raton London New York Washington, D.C.

Contents

1 Mass and Mass Standards 1
1.1 Introduction 1
1.1.1 Definition of Mass 1
1.1.2 The Mass Unit 1
1.1.3 Mass Artifacts, Mass Standards 1
References 1
1.2 The Roles of Mass Metrology in Civilization, *Paul E. Pontius* 2
1.2.1 The Role of Mass Measurement in Commerce 2
1.2.1.1 Prior to the Metric System of Measurement Units 2
1.2.1.2 The Kilogram and the Pound 6
1.2.1.3 In the Early United States 8
1.2.1.4 Summary 9
1.2.2 The Role of Measurement in Technology 10
1.2.3 The Role of Measurement in Science 12
References 13
1.3 Report by John Quincy Adams 15

2 Recalibration of Mass Standards 17
2.1 Recalibration of the U.S. National Prototype Kilogram 17
2.1.1 Introduction 17
2.1.2 Experimental 17
2.1.3 1984 BIPM Measurements 18
2.1.4 1984 NBS Measurements 18
2.1.5 Recommendations 19
2.2 Third Periodic Verification of National Prototypes of the Kilogram 19
2.2.1 Introduction 19
2.2.2 Preliminary Comparisons 19
2.2.3 Comparisons with the International Prototype 19
2.2.4 Verification of the National Prototypes 20
2.2.5 Conclusions Drawn from the Third Verification 20
References 22

3 Contamination of Mass Standards 23
3.1 Platinum-Iridium Mass Standards 23
3.1.1 Growth of Carbonaceous Contamination on Platinum-Iridium Alloy Surfaces, and Cleaning by Ultraviolet–Ozone Treatment 23

3.1.1.1 Introduction 23
3.1.1.2 Ultraviolet–Ozone Cleaning 23
3.1.1.3 Optimum Cleaning Conditions 24
3.1.1.4 Conclusions 24
3.1.1.5 Recommendations 25
3.1.2 Progress of Contamination and Cleaning Effects 25
3.1.2.1 Introduction 25
3.1.2.2 Problems with Steam-Jet Cleaning 25
3.1.2.3 Steam-Jet Cleaning Procedure 25
3.1.2.4 Ultrasonic Cleaning with Solvents Procedure 25
3.1.2.5 Results 25
3.1.3 Effects of Changes in Ambient Humidity, Temperature, and Pressure on "Apparent Mass" of Platinum-Iridium Prototype Mass Standards 26
3.1.3.1 Introduction 26
3.1.3.2 Experimental Procedures and Results 26
3.1.3.2.1 Surface Effects in Ambient Conditions 26
3.1.3.2.2 Reproducibility of Mass between Ambient Conditions and Vacuum 27
3.1.4 Evidence of Variations in Mass of Reference Kilograms Due to Mercury Contamination 27
3.1.4.1 Introduction 27
3.1.4.2 Results 27
3.1.5 Mechanism and Long-Term Effects of Mercury Contamination 27
3.1.5.1 Introduction 27
3.1.5.2 Results and Conclusions 28
3.1.5.3 Recommendations 28
3.1.6 Water Adsorption Layers on Metal Surfaces 28
3.1.6.1 Introduction 28
3.1.6.2 Experimental Procedures 28
3.1.6.3 Results 29
3.2 Stainless Steel Mass Standards 30
3.2.1 Precision Determination of Adsorption Layers on Stainless Steel Mass Standards — Introduction 30
3.2.2 Adsorption Measurements in Air 30
3.2.2.1 Experimental Setup 30
3.2.2.2 Mass Comparator 30
3.2.2.3 Ellipsometer 31
3.2.2.4 Measurement of Air Parameters and Humidity Control 31
3.2.2.5 Mass Standards and Sorption Artifacts 31
3.2.2.6 Summary and Conclusions 31
3.2.3 Sorption Measurements in Vacuum 31
3.2.3.1 Introduction 31
3.2.3.2 Results for Cleaned Specimen 32
3.2.3.3 Sorption Isotherms for Cleaned Polished Surfaces 32

3.2.3.4 Factors Influencing Adsorption Isotherms 32
3.2.3.5 Influence of Steel Composition 32
3.2.3.6 Influence of Surface Cleanliness 32
3.2.3.7 Summary and Conclusions 32
3.2.4 Effect of Environment and Cleaning Methods on Surfaces of Stainless Steel and Allied Materials 33
3.2.4.1 Introduction 33
3.2.4.2 Results and Conclusions 33
3.2.5 Studies of Influence of Cleaning on Stability of XSH Alacrite Mass Standards 34
3.2.5.1 Introduction 34
3.2.5.2 Investigation of Stability 34
3.2.5.3 INM Mass Comparator 34
3.2.5.4 Results and Conclusions 35
3.2.5.5 BIPM Cleaning/Washing Method 35
References 35

4 Cleaning of Mass Standards 37
4.1 Introduction 37
4.2 Solvent Cleaning and Steam Washing (*Nettoyage-Lavage*) 37
4.2.1 Solvent Cleaning 37
4.2.2 Steam Washing 38
4.2.3 Effect of Solvent Cleaning and Steam Washing 38
4.3 Summaries of National Laboratory Studies Related to Cleaning 39
4.3.1 Cleaning at National Physical Laboratory, United Kingdom (NPL) 39
4.3.2 Cleaning at Institut National de Metrologie, France (INM) 40
4.3.3 Cleaning at National Research Laboratory of Metrology, Japan (NRLM) 40
4.4 Cleaning of Stainless Steel Mass Standards 40
4.4.1 Cleaning Procedures Investigated by Weighing and Ellipsometry 40
4.4.1.1 Cleaning Procedures 40
4.4.1.2 Results 41
4.4.1.3 Conclusions 41
4.4.2 Cleaning of Stainless Steel Mass Standards at BIPM 41
4.4.3 Cleaning of Stainless Steel Mass Standards at NIST 41
References 42

5 From Balance Observations to Mass Differences 43
5.1 Introduction 43
5.2 Determination of Mass Difference 43
References 50

6 Glossary of Statistical Terms 51
References 54

7 Measurement Uncertainty 55
7.1 Introduction 55
7.2 NIST Guidlines 55
7.2.1 Classification of Components of Uncertainty 56
7.2.2 Standard Uncertainty 56
7.2.3 Type A Evaluation of Standard Uncertainty 56
7.2.4 Type B Evaluation of Standard Uncertainty 56
7.2.5 Combined Standard Uncertainty 56
7.2.6 Expanded Uncertainty 57
7.2.7 Relative Uncertainties 57
7.3 Example of Determination of Uncertainty 57
References 58

8 Weighing Designs 59
8.1 Introduction 59
8.2 Least Squares 62
8.2.1 Best Fit 62
8.2.2 Simplest Example 63
8.2.3 Equation of a Line 64
8.3 Sequences 64
8.3.1 Design A.1.2 65
8.3.2 Design C.10 66
8.3.3 Design 16 67
8.4 Observation Multipliers for Determining Mass Values and Deviations 67
8.4.1 Design A.1.2 67
8.4.2 Design C.10 68
8.4.3 Design 16 68
8.5 Factors for Computing Weight Standard Deviations Needed for Uncertainty Calculations 69
8.5.1 Design A.1.2 69
8.5.2 Design C.10 69
8.5.3 Design 16 69
8.6 Sample Data Sets and Intermediate Calculations 69
8.6.1 Design A.1.2 69
8.6.2 Design C.10 70
8.6.3 Design 16 71
8.7 Calculations of Various Values Associated with Design 16 and the 5-kg, 2-kg_1, 2-kg_2, and 1-kg Weights 72
8.8 Calculations of Various Values Associated with the A.1.2 Design Solution for the 1-kg and Σ1-kg Weights and 500 g through Σ100 g 74
8.8.1 50 g – 10 g NIST Data 76
8.8.2 5 g – 1 g NIST Data 77
8.8.3 0.5 g – 0.1 g NIST Data 78

8.8.4 0.05 g – 0.01 g NIST Data 78
8.8.5 0.005 g – 0.001 g NIST Data 79
8.9 Commentary 80
References 82

9 Calibration of the Screen and the Built-in Weights of a Direct-Reading Analytical Balance 83
9.1 Calibration of the Screen 83
9.2 Calibration of the Built-in Weights 84
References 85

10 A Look at the Electronic Balance 87
10.1 Introduction 87
10.2 The Analytical Balance and the Mass Unit 87
10.3 Balance Principles 88
10.3.1 The Mechanical Balance 88
10.3.2 The Hybrid Balance 89
10.3.3 The Electromotive Force Balance 89
10.3.4 The Servo System 89
10.4 A Closer Look at Electronic Balances 90
10.4.1 The Hybrid Balance 90
10.4.2 The Force Balance 90
10.5 Benefits and Idiosyncrasies of Electronic Balances 91
10.5.1 Benefits 91
10.5.1.1 Taring Control 91
10.5.1.2 Dual Capacity and Precision 91
10.5.1.3 Selectable Sampling Period 91
10.5.1.4 Filters 91
10.5.1.5 Computer Compatibility 91
10.5.1.6 Computation 92
10.5.1.7 Environmental Weighing Delay 92
10.5.2 Idiosyncrasies 92
10.5.2.1 Weighing Ferromagnetic Materials 92
10.5.2.2 Electromagnetic Radiation 92
10.5.2.3 Dust Susceptibility 92
10.6 Black Box Comparison 92
10.7 The Future 93
References 93

11 Examples of Buoyancy Corrections in Weighing 95
11.1 Introduction 95
11.2 Buoyant Force and Buoyancy Correction 95
11.3 Application of the Simple Buoyancy Correction Factor to Weighing on a Single-Pan Two-Knife Analytical Balance 97

11.4 The Electronic Analytical Balance 98
11.4.1 Electronic Balance Calibration and Use 98
11.4.2 Usual Case for Which the Air Density Is Not the Reference Value 101
11.5 Examples of Effects of Failure to Make Buoyancy Corrections 102
11.6 Other Examples of Buoyancy Correction 103
11.6.1 Weighing of Syringes 103
11.6.2 Buoyancy Applied to Weighing in Weighing Bottles 104
References 104

12 Air Density Equation 105
12.1 Introduction 105
12.2 Development of the Jones Air Density Equation 106
12.2.1 Parameters in the Jones Air Density Equation 107
12.2.1.1 Universal Gas Constant, R 107
12.2.1.2 Apparent Molecular Weight of Air, M_a 107
12.2.1.3 Compressibility Factor, Z 109
12.2.1.4 Ratio of the Molecular Weight of Water to the Molecular Weight of Dry Air, ε 110
12.2.1.5 Effective Water Vapor Pressure, e' 110
12.2.1.6 Enhancement Factor, f 111
12.2.1.7 Saturation Vapor Pressure of Water, e_s 112
12.2.1.8 Carbon Dioxide Abundance, x_{CO_2} 112
12.2.2 The Jones Air Density Equation 112
12.2.3 Uncertainties in Air Density Calculations 114
12.2.3.1 Uncertainties in Quantities Other than P, T, U, and x_{CO_2} 114
12.2.3.1.1 Partial Derivatives, $(\partial\rho/\partial Y_i)$, for the Nonenvironmental Quantities 114
12.2.3.1.2 Uncertainties in the Nonenvironmental Quantities (SD_i) 115
12.2.3.1.3 Products of the Partial Derivatives and the Estimates of Standard Deviation, $(\partial\rho/\partial Y_i)\cdot(SD_i)$, for the Nonenvironmental Quantities 115
12.2.3.2 Uncertainties in the Environmental Quantities 115
12.2.3.2.1 Partial Derivatives, $\partial\rho/\partial Y_i$, for the Environmental Quantities 115
12.2.3.2.2 Uncertainties in the Environmental Quantities (SD_i) 116
12.2.3.2.3 Products of the Partial Derivatives and the Estimates of Standard Deviation, $(\partial\rho/\partial Y_i)\cdot(SD_i)$, for the Environmental Quantities 116
12.2.4 Use of Constant Values of F, Z, and M_a in the Air Density Equation 116
12.3 CIPM-81 Air Density Equation 117
12.4 CIPM 1981/1991 Equation 117
12.5 Recommendation 117

12.6 Direct Determination of Air Density 117
12.6.1 Introduction 117
12.6.2 Experimental Procedure 118
12.6.3 Results and Conclusions 118
12.7 Experimental Determination of Air Density in Weighing on a 1-kg Balance in Air and in Vacuum 119
12.7.1 Introduction 119
12.7.2 Results and Conclusions 119
12.8 A Practical Approach to Air Density Determination 120
12.8.1 Introduction 120
12.8.2 Air Density 120
12.8.2.1 Temperature 122
12.8.2.2 Melting Point of Ice 122
12.8.2.3 Triple Point of Water 123
12.8.2.4 Steam Point 124
12.8.2.5 Relative Humidity 126
12.8.2.6 Pressure 127
12.8.2.7 Uncertainty 129
12.8.2.8 Mass Calibration 129
12.8.2.9 Summary 131
12.9 Test of Air Density Equation at Differing Altitudes 131
12.9.1 Introduction 131
12.9.2 Experimental Details 131
12.9.3 Calculation of Air Density for Buoyancy Correction 132
12.9.4 Measurements of Parameters in the Air Density Equation 132
12.9.4.1 Temperature 132
12.9.4.2 Pressure 133
12.9.4.3 Relative Humidity 133
12.9.4.4 Carbon Dioxide Content 133
12.9.5 Weighings 133
12.9.6 Conclusions 133
References 134

13 Density of Solid Objects 137
13.1 Development of a Density Scale Based on the Density of a Solid Object 137
13.1.1 Introduction 137
13.1.2 Apparatus 138
13.1.2.1 Mechanical Modification of the Balance 138
13.1.2.2 Electronic Modifications 138
13.1.2.3 Liquid Bath 139
13.1.2.4 Fluorocarbon Liquid 139
13.2 Principles of Use of the Submersible Balance 140
13.2.1 Measurements 141
13.2.2 Summary 142
13.2.3 Discussion 142

13.3 Determination of Density of Mass Standards; Requirement and Method 143
13.3.1 Introduction 143
13.3.2 Requirements 143
13.3.3 Principles and Applications 143
13.4 The Density of a Solid by Hydrostatic Weighing 144
13.4.1 The Force Detector 145
13.4.2 Air Density 146
13.4.3 Water Density 146
13.4.4 A General Algorithm for Hydrostatic Weighing 147
13.4.5 The General Hydrostatic Weighing Equations 148
13.4.5.1 Air Weighing 149
13.4.5.2 Water Weighing 149
13.4.6 Linearity Test and Correction 150
13.4.7 Analysis 150
13.4.8 Balance Selection 151
13.4.9 Data Results 152
13.4.10 Conclusions 152
13.4.11 Appendix 1 — Liquid Density by Hydrostatic Weighing 152
13.4.12 Appendix 2 — Glassware Calibration 153
13.5 An Efficient Method for Measuring the Density (or Volume) of Similar Objects 153
13.5.1 Introduction 153
13.5.2 The Requirement 154
13.5.3 The Method 154
13.5.4 The Measurement of Liquid Density 155
13.5.5 Error Analysis 156
13.5.6 Apparatus 157
13.5.7 Data 158
13.5.8 Conclusion 158
References 158

14 Calculation of the Density of Water 161
14.1 Introduction 161
14.2 Formulations of Wagenbreth and Blanke 161
14.3 Kell's Formulations 161
14.3.1 Density of Standard Mean Ocean Water 161
14.3.2 Isothermal Compressibility of Water 162
14.4 Conversion of IPTS-68 to ITS-90 162
14.5 Redeterminations of Water Density 162
14.5.1 Measurements of Patterson and Morris 163
14.5.2 Measurements of Watanabe 163
14.5.3 Measurements of Takenaka and Masui 164
14.5.4 Comparison of the Results for the Three Recent Formulations 165
14.6 Change in Density of Water with Air Saturation 165
14.7 Density of Air-Saturated Water on ITS-90 165

14.8 Compressibility-Corrected Water Density Equation 166
14.9 Effect of Isotopic Concentrations 166
14.10 Estimation of Uncertainty in Water Density Due to Variation in Isotopic Concentrations 167
14.11 Summary 167
References 167

15 Conventional Value of the Result of Weighing in Air 169
15.1 Introduction 169
15.2 Conventional Value of Weighing in Air 169
15.3 Examples of Computation 171
15.4 Discussion 173
15.5 Conclusions 175
References 177

16 A Comparison of Error Propagations for Mass and Conventional Mass 179
16.1 Conventional Value of the Result of Weighing in Air 179
16.2 Uncertainties in Mass Determinations 179
16.3 Uncertainties in the Determination of m Due to Uncertainties in the Parameters in Eq. (16.2) 179
16.3.1 Balance Standard Deviation 180
16.3.2 Application to R111 180
16.4 Comparisons of Weights 180
16.4.1 Comparison of a Stainless Steel E_1 Weight with a Stainless Steel Standard of Mass S and Density 7.950 g/cm^3 181
16.4.2 Error Propagation for Conventional Value of Weighing in Air 182
16.4.3 Comparison of E_2 Weights with E_1 Weights 182
16.5 Maximum Permissible Errors on Verification 183
16.6 Uncertainty Trade-Offs 183
16.7 Summary 184
References 185

17 Examination of Parameters That Can Cause Error in Mass Determinations 187
17.1 Introduction 187
17.2 Mass Comparison 187
17.3 The Fundamental Mass Comparison Relationship 187
17.4 Uncertainties in the Determination of X Due to Uncertainties in the Parameters in Eq. (17.2) 188
17.5 Buoyancy 190
17.6 Thermal Equilibrium 191
17.7 Atmospheric Effects 191
17.8 Magnetic Effects 191
17.9 Instability of IPK 192

17.10 Cleaning 192
17.11 Conclusions 193
17.12 Discussion 194
References 194

18 Determination of the Mass of a Piston-Gauge Weight, Practical Uncertainty Limits 197
18.1 Introduction 197
18.2 Assignment of Mass 197
