# Imperfect Bifurcation in Structures and Materials

Engineering Use of Group-Theoretic  
Bifurcation Theory

With 194 Illustrations

# Contents

<b>Preface</b>	<b>v</b>
<b>List of Major Symbols</b>	<b>xv</b>
<b>1 Introduction to Bifurcation Behavior</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.2 Simple Examples of Bifurcation Behavior . . . . .	2
1.2.1 One-Degree-of-Freedom System . . . . .	2
1.2.2 Two-Degree-of-Freedom System . . . . .	5
1.3 Overview of the Book . . . . .	8
1.3.1 Imperfection Sensitive Bifurcation Behavior . . . . .	8
1.3.2 Critical Initial Imperfection of Structural Systems	10
1.3.3 Random Variation of Initial Imperfections . . . . .	16
1.3.4 Experimentally Observed Bifurcation Diagrams . .	17
1.3.5 Bifurcation of Symmetric Systems . . . . .	19
1.3.6 Recursive Bifurcation and Mode Switching of Sands	22
1.3.7 Echelon Modes on Uniform Materials . . . . .	26
1.3.8 Recursive Bifurcation of Steel Specimens . . . . .	30
1.4 Summary . . . . .	32
<b>I Imperfect Behavior at Simple Critical Points</b>	<b>33</b>
<b>2 Critical Points and Local Behavior</b>	<b>36</b>

2.1	Introduction . . . . .	36
2.2	General Framework . . . . .	37
2.3	Illustrative Example . . . . .	41
2.4	Liapunov–Schmidt Reduction . . . . .	45
2.4.1	Reduction Procedure . . . . .	45
2.4.2	Criticality Condition . . . . .	47
2.4.3	Direction of Bifurcated Paths . . . . .	49
2.4.4	Stability . . . . .	50
2.4.5	Expansion into Power Series . . . . .	50
2.5	Classification of Simple Critical Points . . . . .	52
2.5.1	Limit Point . . . . .	54
2.5.2	Transcritical Bifurcation Point . . . . .	56
2.5.3	Pitchfork Bifurcation Point . . . . .	57
2.6	Bifurcation Behavior of a Propped Cantilever . . . . .	62
2.7	Problems . . . . .	65
2.8	Summary . . . . .	66
<b>3</b>	<b>Imperfection Sensitivity Laws</b>	<b>67</b>
3.1	Introduction . . . . .	67
3.2	Imperfection Sensitivity Laws . . . . .	68
3.2.1	Limit Point . . . . .	69
3.2.2	Transcritical Bifurcation Point . . . . .	70
3.2.3	Pitchfork Bifurcation Point . . . . .	71
3.2.4	Systematic Derivation . . . . .	72
3.3	Imperfection Sensitivity of Structures . . . . .	75
3.3.1	Propped Cantilever . . . . .	75
3.3.2	Truss Arches . . . . .	76
3.4	Problems . . . . .	81
3.5	Summary . . . . .	81
<b>4</b>	<b>Critical Initial Imperfection (I)</b>	<b>82</b>
4.1	Introduction . . . . .	82
4.2	Illustrative Example . . . . .	83
4.3	Theory of Critical Initial Imperfection . . . . .	87
4.3.1	Formulation . . . . .	87
4.3.2	Derivation . . . . .	89
4.4	Imperfection with Multiple Categories . . . . .	91
4.5	Critical Initial Imperfection of Truss Structures . . . . .	93
4.5.1	Truss Arches . . . . .	93
4.5.2	Hexagonal Truss Dome . . . . .	97
4.6	Problems . . . . .	99
4.7	Summary . . . . .	100
<b>5</b>	<b>Random Initial Imperfection (I)</b>	<b>101</b>
5.1	Introduction . . . . .	101

5.2	Probability Density Functions of Critical Loads . . . . .	102
5.3	Evaluation of Probability Density Functions . . . . .	108
5.4	Distribution of Minimum Values . . . . .	108
5.5	Scatter of Critical Loads of Structures . . . . .	111
5.5.1	Propped Cantilever . . . . .	112
5.5.2	Beam on a Nonlinear Foundation . . . . .	115
5.6	Appendix: Derivation of Scaling Factors . . . . .	118
5.7	Problems . . . . .	119
5.8	Summary . . . . .	121
<b>6</b>	<b>Experimentally Observed Bifurcation Diagrams</b>	<b>122</b>
6.1	Introduction . . . . .	122
6.2	Illustrative Example . . . . .	125
6.3	Imperfection Sensitivity Laws . . . . .	126
6.3.1	The Koiter Two-Thirds Power Law . . . . .	126
6.3.2	Generalized Koiter Law . . . . .	128
6.3.3	Laws for Experimentally Observed Bifurcation Diagrams . . . . .	129
6.4	Recovering the Perfect System from Imperfect Systems . . . . .	134
6.4.1	Recovery from a Single Imperfect Path . . . . .	135
6.4.2	Recovery from a Series of Imperfect Paths . . . . .	136
6.5	Numerical and Experimental Examples . . . . .	137
6.5.1	Regular-Hexagonal Truss Dome . . . . .	137
6.5.2	Rectangular Plates . . . . .	141
6.5.3	Sand Specimens . . . . .	143
6.6	Problems . . . . .	149
6.7	Summary . . . . .	149
<b>II</b>	<b>Imperfect Bifurcation of Symmetric Systems</b>	<b>151</b>
<b>7</b>	<b>Group-Theoretic Bifurcation Theory</b>	<b>155</b>
7.1	Introduction . . . . .	155
7.2	Bifurcation due to Reflection Symmetry . . . . .	156
7.3	Preliminaries on Group Representation . . . . .	158
7.4	Symmetry of Equations . . . . .	163
7.4.1	Group Equivariance of the Governing Equation .	163
7.4.2	Liapunov-Schmidt Reduction . . . . .	166
7.4.3	Equivariance of the Jacobian Matrix . . . . .	172
7.5	Symmetry of Solutions . . . . .	175
7.6	Example of a Symmetric System . . . . .	178
7.7	Problems . . . . .	181
7.8	Summary . . . . .	181
<b>8</b>	<b>Bifurcation Behavior of <math>D_n</math>-Equivariant Systems</b>	<b>182</b>

8.1	Introduction . . . . .	182
8.2	Dihedral and Cyclic Groups . . . . .	183
8.2.1	Definition of Groups . . . . .	183
8.2.2	Irreducible Representations . . . . .	186
8.3	Perfect Bifurcation Behavior . . . . .	188
8.3.1	Symmetry of Solutions . . . . .	188
8.3.2	Recursive Bifurcation . . . . .	192
8.4	Bifurcation of Dome Structures . . . . .	193
8.4.1	$D_3$ -Symmetric Regular-Triangular Dome . . . . .	194
8.4.2	$C_6$ -Symmetric Schwedler Dome . . . . .	197
8.5	Bifurcation Equations for a Double Critical Point . . . . .	198
8.6	Local Analysis near a Double Critical Point: Perfect System . . . . .	203
8.6.1	Bifurcated Branches . . . . .	203
8.6.2	Stability . . . . .	209
8.7	Local Analysis near a Double Critical Point: Imperfect System . . . . .	212
8.7.1	Solution Curves . . . . .	212
8.7.2	Imperfection Sensitivity Laws . . . . .	219
8.8	Experimentally Observed Bifurcation Diagrams . . . . .	224
8.8.1	Simple Bifurcation Point . . . . .	224
8.8.2	Double Bifurcation Point . . . . .	225
8.9	Appendix: Alternative Stability Analysis for Bifurcated Branches . . . . .	228
8.10	Problems . . . . .	231
8.11	Summary . . . . .	232
<b>9</b>	<b>Critical Initial Imperfection (II)</b>	<b>233</b>
9.1	Introduction . . . . .	233
9.2	Theory of Critical Initial Imperfection . . . . .	234
9.2.1	Formulation . . . . .	234
9.2.2	Exploiting Group Equivariance . . . . .	237
9.2.3	Simple Critical Points . . . . .	240
9.2.4	Double Critical Points . . . . .	241
9.3	Resonance of Symmetry . . . . .	242
9.4	Critical Imperfection of Symmetric Truss Structures . . . . .	243
9.4.1	Truss Tents . . . . .	243
9.4.2	Regular-Hexagonal Truss Dome . . . . .	246
9.5	Problems . . . . .	249
9.6	Summary . . . . .	249
<b>10</b>	<b>Random Initial Imperfection (II)</b>	<b>250</b>
10.1	Introduction . . . . .	250
10.2	Probability Density Functions of Critical Loads . . . . .	251
10.2.1	Formulation . . . . .	251
10.2.2	Derivation of Probability Density Functions . . . . .	252

10.2.3	Semiempirical Evaluation . . . . .	257
10.3	Distribution of Minimum Values . . . . .	258
10.4	Scatter of Critical Loads of Structures and Materials . . . . .	259
10.4.1	Regular-Polygonal Truss Structures . . . . .	259
10.4.2	Cylindrical Material Specimens . . . . .	262
10.5	Problems . . . . .	265
10.6	Summary . . . . .	265
<b>11</b>	<b>Description of Bifurcation Behaviors</b>	<b>266</b>
11.1	Introduction . . . . .	266
11.2	Perfect Bifurcation Behavior of Truss Domes . . . . .	267
11.3	Imperfect Behavior of Structures and Materials . . . . .	268
11.3.1	Regular-Pentagonal Truss Dome . . . . .	269
11.3.2	Sand Specimens . . . . .	272
11.4	Problems . . . . .	275
11.5	Summary . . . . .	275
<b>III</b>	<b>Modeling of Bifurcation Phenomena</b>	<b>277</b>
<b>12</b>	<b>Bifurcation of Cylindrical Sand Specimens</b>	<b>281</b>
12.1	Introduction . . . . .	281
12.2	Groups for Spatial Symmetry . . . . .	285
12.3	Experiments on Sand Specimens . . . . .	289
12.3.1	Recursive Bifurcation Behavior . . . . .	289
12.3.2	Mode Switching Behavior . . . . .	297
12.4	Appendix: Derivation of Bifurcation Rules . . . . .	298
12.4.1	Bifurcation of $D_{\infty h}$ - and $D_{nh}$ -Equivariant Systems	299
12.4.2	Bifurcation of a $D_{nd}$ -Equivariant System . . . . .	305
12.5	Problems . . . . .	307
12.6	Summary . . . . .	307
<b>13</b>	<b>Echelon-Mode Formation</b>	<b>308</b>
13.1	Introduction . . . . .	308
13.2	Underlying Symmetries . . . . .	313
13.3	Subgroups Representing Patterns of Interest . . . . .	315
13.4	Recursive Bifurcation Leading to Echelon Modes . . . . .	320
13.5	Experiment on a Soil Specimen . . . . .	322
13.6	Rectangular Plate with Periodic Boundaries . . . . .	325
13.6.1	Underlying Symmetry . . . . .	325
13.6.2	Numerical Analysis . . . . .	327
13.7	Image Simulations . . . . .	331
13.7.1	Image Simulation Procedure . . . . .	331
13.7.2	Kaolin . . . . .	334
13.7.3	Steel . . . . .	337

13.8	Appendix: Derivation of Bifurcation Rules . . . . .	340
13.8.1	Bifurcation of a $C_{\infty v} \times \tilde{C}_{\infty v}$ -Equivariant System	340
13.8.2	Bifurcation of an $OB_{nn}^{\pm}$ -Equivariant System . . . . .	348
13.8.3	Bifurcation of a $D_{\infty \infty}$ -Equivariant System . . . . .	353
13.8.4	Symmetry of Fourier Terms . . . . .	355
13.9	Problems . . . . .	356
13.10	Summary . . . . .	357
<b>14</b>	<b>Bifurcation of Steel Specimens</b>	<b>358</b>
14.1	Introduction . . . . .	358
14.2	Symmetry of a Rectangular Parallelepiped Domain . . . . .	359
14.3	Recursive Bifurcation Rule . . . . .	361
14.4	Experimental Study . . . . .	362
14.4.1	Effect of Cross-Sectional Shape . . . . .	364
14.4.2	Recursive Bifurcation . . . . .	369
14.5	Computational Study . . . . .	372
14.5.1	Analysis Conditions . . . . .	372
14.5.2	Bifurcation Analyses . . . . .	372
14.6	Appendix: Derivation of Bifurcation Rules . . . . .	375
14.7	Problems . . . . .	376
14.8	Summary . . . . .	376
<b>15</b>	<b>Miscellaneous Aspects of Bifurcation Phenomena</b>	<b>378</b>
15.1	Introduction . . . . .	378
15.2	Clustered Bifurcation Point . . . . .	379
15.3	Size Effect . . . . .	380
15.3.1	Viewpoint of Fracture Mechanics . . . . .	380
15.3.2	Viewpoint of Imperfection Sensitivity . . . . .	381
15.3.3	Viewpoint of Hilltop Bifurcation . . . . .	383
15.3.4	Viewpoint of Mode Switching . . . . .	385
15.4	Explosive Bifurcation . . . . .	389
15.5	Problems . . . . .	391
15.6	Summary . . . . .	391
