Contents

Preface xii

Chapter 1: Information System Development 1
1.1 Information systems and IT 1
1.2 Information systems development methodologies 3
1.3 Information systems development life-cycles 4
1.3.1 Waterfall life-cycle 4
1.3.2 Problems with the waterfall life-cycle 5
1.3.3 Alternative life-cycles 7
Evolutionary development 7
Iterative (rapid) application development 7
End-user development 9
1.3.4 Prototyping 9
1.3.5 Agile Development 9
1.4 Alternative strategies for information systems acquisition 11
1.4.1 Packaged solutions 11
1.4.2 Outsourcing 11
1.4.3 Application service providers 11

Chapter 2: Internet-based Information Systems 15
2.1 The Internet 15
2.1.1 A brief history 15
From ARPAnet to the Internet 16
Internet browser wars 16
2.1.2 Internet statistics 17
2.2 How the Internet works 18
2.2.1 Internet protocols 18
2.2.2 The worldwide web 19
2.2.3 HyperText Markup Language (HTML) 21
2.2.4 Web site authoring tools 22
2.2.5 Beyond the basics 22
2.2.6 Mobile Internet 23
2.3 Open source software development 23
2.3.1 The Linux phenomenon 24
2.3.2 How OSS works 25
Why OSS works 26
2.3.3 Implications of OSS for IS development 26

Chapter 3: Web IS Development Methodology (WISDM) 29
3.1 Introduction 29
3.2 WISDM in context: the Multiview approach to IS development 29

3.2.1 Using the Multiview framework to guide methodology generation 31
3.3 The WISDM matrix 32
3.3.1 Organizational analysis 32
3.3.2 Work design 33
3.3.3 Information analysis 33
3.3.4 Technical design 33
3.3.5 Human computer interface design 33
3.3.6 Moving around the methods matrix 33
3.4 The role of the analyst: multiple perspectives 34
3.5 WISDM and the IS development life-cycle 36
3.6 Is web IS development different? 36

Chapter 4: e-Business Strategy 41
4.1 Introduction 41
4.2 Business models 43
4.3 Business webs for the theatre industry 43
4.3.1 Aggregation 46
4.3.2 Agora 49
4.3.3 Value chain 51
4.3.4 Alliance 53
4.4 Virtual communities 55
4.5 Marketspace transformation and relationship capital 56

Chapter 5: Systems Thinking 61
5.1 Introduction 61
5.2 Difficulties and messes 61
5.3 Themes in systems thinking 63
5.3.1 Systems and patterns of organization 63
5.3.2 Systems and emergent properties 65
5.3.3 Recursion and system hierarchies 65
5.3.4 Communication and control 65
5.4 Thinking in loops 66
5.4.1 Feedback loops 68
Negative (or balancing) feedback 68
Positive (or reinforcing) feedback 70
5.4.2 Feedforward loops 70
5.5 Patterns 72
5.5.1 Limits to success 72
Leverage points 73
5.5.2 Fixes that fail 74
5.4.3 Success to the successful 75
5.6 Mental models 76

Chapter 6: Soft Systems Methodology 79
6.1 Introduction 79
6.2 Hard and soft systems thinking 80
6.2.1 Organizations 80
6.2.2 Hard and soft traditions 81
6.3 Soft systems methodology 82
6.3.1 Exploring the problem situation 83
Situation considered problematic [1] 83
Problem situation expressed [2] 84
6.3.2 Below the line: root definitions and conceptual models 86
Root definition of relevant systems [3] 86
Conceptual models [4] 90
6.3.3 Back above the line: taking action in the problem situation 93
Comparison of models with real world [5] 94
Evaluating change [6] and taking action [7] 94
6.4 Beyond the basic form of SSM 95
6.4.1 Using SSM to support IS Development 96

Chapter 7: Designing for User Satisfaction 99
7.1 Introduction 99
7.2 Sociotechnical design with ETHICS 101
7.2.1 Participation 103
7.2.2 Job satisfaction 103
7.2.3 Sociotechnical systems design process 105
7.3 The Scandinavian tradition of participative design 109
7.3.1 Participative design principles 110
7.3.2 The participative design process 111
7.4 Web site quality – the customer perspective 112
7.4.1 Web site quality 112
Usability 113
Information quality 114
Service interaction quality 114
7.4.2 The application of WebQual to online bookstores 115
Data collection 116
The results 117
Interpretation of the results 118

Chapter 8: Information Analysis 123
8.1 Introduction 123
8.1.1 The theatre booking system 124
8.2 Information system modeling 125
8.2.1 Analysis and design 125

Structured systems analysis and design 126
Object-oriented analysis and design 126
8.3 The unified modeling language (UML) 126
8.3.1 Fundamentals of object-orientation 127
Objects 127
Classes and instances 128
Encapsulation and communication by messages 128
Inheritance 129
Polymorphism 129
8.4 Requirements gathering and use case diagrams 130
8.4.1 Requirements gathering 130
8.4.2 Use case notation 131
8.4.3 Extension, inclusion, and generalization 133
Extends 133
Include 133
Generalization 133
8.4.4 Describing a use case 134
8.5 Class diagrams 134
8.5.1 Relationships: associations 137
Multiplicity 137
8.5.2 Attributes and operations 138
Attributes 138
Operations 139
8.5.3 Relationships: generalization 139
8.5.4 Relationships: aggregation 140
8.5.5 The theatre booking system class model 141
8.5.6 Navigability 143
8.5.7 Recursion 143
8.6 Interaction diagrams 145
8.6.1 Sequence diagram 146
8.6.2 Collaboration diagram 148
8.7 State transition diagrams 149
8.8 Activity diagrams 151

Chapter 9: Technical Design 155
9.1 Introduction 155
9.2 Information system design 156
9.3 System design overview 157
9.3.1 Design constraints 159
9.4 Logical database design 160
9.4.1 Relational databases 160
Primary keys 161

Relationships ... 162
Normalization ... 163
9.4.2 Moving from UML class model to relational schema ... 164
Implementing many-to-many relationships ... 165
Implementing supertype and subtype classes ... 166
9.4.3 Theatre booking system database design ... 168
Entity-relationship model ... 168
Entity and attribute list ... 169
9.4.4 Object-oriented databases ... 172
Object-relational hybrids ... 172
9.4.5 Physical design ... 172
Database transactions ... 172
9.5 Application design ... 173
9.5.1 Sequence diagrams ... 174
User registration ... 175
Payments ... 175
9.5.2 Seat reservations – locking strategy ... 176
9.5.3 State transition diagrams ... 177
9.6 User interface design ... 178
9.6.1 Page layout guidelines ... 179
9.6.2 Navigation schemes ... 182
Frames ... 183

Chapter 10: Software System Construction ... 187
10.1 Introduction ... 187
10.2 Software implementation overview ... 188
10.3 Business data implementation ... 189
10.3.1 Defining tables ... 190
10.3.2 Defining relationships ... 193
10.3.3 Subtypes ... 195
10.3.4 Populating the database ... 195
10.3.5 SQL and queries ... 196
10.4 Business logic ... 197
10.4.1 Using ColdFusion to publish a database on the Internet ... 197
Queries and the three ANSI three-level architecture model ... 199
10.4.2 Developing ColdFusion components for the business logic ... 200
10.4.3 State management ... 204
URL parameters and form fields ... 205
Cookies ... 205
Session variables ... 206
10.4.4 Database transactions ... 206
10.5 Presentation layer – the user interface ... 206

10.5.1 DreamWeaver Templates 207
10.5.2 Style sheets 208
10.5.3 Browser compatibility and bandwidth 209
10.6 Putting it all together – the complete application 210
10.7 Wireless application protocol (WAP) 215
10.6.1 Generating wireless content with ColdFusion 216
10.8 Going live 218
10.8.1 Get a domain name 218
10.8.2 Hosting options 219
Host the site at an Internet Service Provider (ISP) 219
Co-host a server with an ISP 219
Host your own server 220
10.8.3 Promoting the site 220
10.8.4 Monitoring the site 221

Chapter 11: Web Information Management 223
11.1 Introduction 223
11.2 eXtensible Markup Language (XML) 224
11.2.1 XML data definitions 227
11.2.2 Displaying XML in a browser 229
11.2.3 Time to ditch HTML? 230
11.2.4 Business applications of XML 231
Intelligent searching 231
Web automation for business to business transactions 231
Intranet development and knowledge management 231
Delivery to different platforms 231
11.2.5 XML and databases, XML and Java 232
11.2.6 XML, web services, and .NET 233
11.3 Content management systems 234
11.3.1 Issues in web content management 235
11.3.2 Genesis of web content management systems 236
11.3.3 A web content management systems framework 238
Content life-cycle 238
Organizational integration 238
CMS process management 239
11.3.4 CMS illustration: Intranet development 240
The CMS framework as a diagnostic tool 241

Chapter 12: Reflections on WISDM 245
12.1 Introduction 245
12.2 The Global Drinks case 245
12.2.1 The client organization in 1998 245

12.2.2 The Global Drinks e-commerce project 1999–2001 246
12.2.3 Outcomes of the intervention 246
12.3 Web IS Development methods 247
12.3.1 Organizational analysis 247
12.3.2 Information analysis 248
12.3.3 Work design 248
12.3.4 Technical design 249
12.4 Reflections on the case 250
12.5 Methods and methodology in IS development 251

Appendix A: Barchester Playhouse Case Study 255
A1 Introduction 255
A.1.1 The organization of the Playhouse 256
A.2 Current box office operations 257
A.2.1 Current IT systems 257
Processes and data supported by the current box office system 258
Issues with the current box office system 258
A.3 Motivation for change 258
A.3.1 Perceptions of the theatre 259
A.4 Requirements of the theatre booking system 259
Theatre layout 259
Theatre productions and performances 260
Ticket prices 260
Ticket sales 261
A.4.1 Roles and attitudes of those involved in the analysis 261

Appendix B: Research Student Admissions Case Study 263
B1 The current process 263

Appendix C: Internet Resources 267
C.1 WISDM 267
C.2 Development tools 267
Tools required for the TicketManager application 267
Optional tools for the TicketManager application 268
C.3 Web design 269
C.4 Other useful sites 269

Index 271
