A.S. Poznyak and K. Najim

Learning Automata and Stochastic Optimization

Springer

Contents

0.1 **Notations** xi
0.2 **Introduction** 1

1 Stochastic Optimization **3**
1.1 Introduction 3
1.2 Standard deterministic and stochastic nonlinear programming problem 4
1.3 Standard stochastic programming problem 5
1.4 Randomized strategies and equivalent smoothed problems . 8
1.5 Caratheodory theorem and stochastic linear problem on finite set 14
1.6 Conclusion 23

References **25**

2 On Learning Automata **27**
2.1 Introduction 27
2.2 Learning automaton 29
2.3 Environment 31
2.4 Reinforcement schemes 32
2.5 Hierarchical structure of learning automata 34
2.6 Normalization and projection 35
2.6.1 Normalization procedure 35
2.6.2 Projection algorithm 36
2.7 Conclusion 39

References **40**

3 Unconstrained Optimization Problems **43**
3.1 Introduction 43
3.2 Statement of the Stochastic Optimization Problem 44
3.3 Learning Automata Design 46
3.4 Nonprojectional Reinforcement schemes 51
3.4.1 Bush-Mosteller reinforcement scheme 51
3.4.2 Shapiro-Narendra reinforcement scheme 57

3.4.3 Varshavskii-Vorontsova reinforcement scheme 63
3.5 Normalization Procedure and Optimization 69
3.6 Reinforcement Schemes with Normalized Environment response 75
3.6.1 Bush-Mosteller reinforcement scheme with normalization procedure 75
3.6.2 Shapiro-Narendra reinforcement scheme with normalization procedure 80
3.6.3 Varshavskii-Vorontsova reinforcement scheme with normalization procedure 85
3.7 Learning Stochastic Automaton with Changing number of Actions 91
3.8 Simulation results 93
3.8.1 Learning automaton with fixed number of actions . . 94
3.8.2 Learning automaton with changing number of actions 97
3.9 Conclusion 104

References **105**

4 Constrained Optimization Problems **107**
4.1 Introduction 107
4.2 Constrained optimization problem 109
4.2.1 Problem formulation 109
4.2.2 Equivalent linear programming problem 111
4.3 Lagrange multipliers using regularization approach 112
4.4 Optimization algorithm 118
4.4.1 Learning automata 119
4.4.2 Algorithm 120
4.5 Convergence and convergence rate analysis 123
4.6 Penalty function 131
4.7 Properties of the optimal solution 133
4.8 Optimization algorithm 139
4.9 Numerical examples 147
4.9.1 Lagrange multipliers approach 151
4.9.2 Penalty function approach 153
4.10 Conclusion 156

References **158**

5 Optimization of Nonstationary Functions **161**
5.1 Introduction 161
5.2 Optimization of Nonstationary Functions 162
5.3 Nonstationary learning systems 164
5.4 Learning Automata and Random Environments 166

5.5 Problem statement 169
5.6 Some Properties of the Reinforcement Schemes 170
5.7 Reinforcement Schemes with Normalization Procedure . . . 173
5.7.1 Bush-Mosteller reinforcement scheme 176
5.7.2 Shapiro-Narendra reinforcement scheme 179
5.7.3 Varshavskii-Vorontsova reinforcement scheme 182
5.8 Simulation results 185
5.9 Conclusion 187
