<b>Preface</b>	<b>v</b>
<b>Introduction</b>	<b>1</b>
0.1 Preliminary Remarks. . . . .	1
0.2 General Situations and Specific Problems Leading to Investigation of Problems of Stability and Stabilization with Respect to Part of the Variables. . . . .	4
0.3 Formulation of the Problems of Stability and Stabilization with Respect to Part of the Variables. Lines and Stages of Their Research. . . . .	15
0.4 The Method of Lyapunov Functions in Problems of Stability and Stabilization with Respect to Part of the Variables. . . . .	24
0.5 The Problem of Stability with Respect to Part of the Variables of Linear Systems, in Linear Approximation, and in Critical Cases. . . . .	41
0.6 Special Features and Possibilities of the Problem of Stability with Respect to Part of the Variables. . . . .	44
0.7 The Problem of Control with Respect to Part of the Variables in a Finite Time Interval. . . . .	48
<b>1 Linear Problems of Stability, Stabilization, and Control with Respect to Part of the Variables</b>	<b>51</b>
1.1 Stability with Respect to Part of the Variables of Linear Systems with Constant Coefficients. . . . .	52
1.2 Stability with Respect to Part of the Variables of Linear Systems with Periodic Coefficients. . . . .	71
1.3 Stability with Respect to Part of the Variables of Linear Systems with Continuous Sufficiently Differentiable Coefficients. . . . .	89
1.4 The Effect of Constantly Acting and Parametric Perturbations on Stability with Respect to Part of the Variables. . . . .	97
1.5 Stabilization with Respect to Part of the Variables. . . . .	105
1.6 Control with Respect to Part of the Variables. . . . .	113

1.7	Overview of References. . . . .	116
<b>2</b>	<b>Nonlinear Problems of Stability with Respect to Part of the Variables in the First (Linear and Nonlinear) Approximation</b>	<b>119</b>
2.1	Features of the Problem of Stability with Respect to Part of the Variables in a Linear Approximation. . . . .	120
2.2	A Method of Nonlinear Transformation of Variables in Investigating Stability with Respect to Part of the Variables in a Linear Approximation (1). . . . .	123
2.3	Damping (with Respect to Part of the Variables) of Angular Motions of an Asymmetric Solid. . . . .	140
2.4	A Method of Nonlinear Transformation of the Variables in Investigating Stability with Respect to Part of the Variables in a Linear Approximation (2). . . . .	149
2.5	Stability with Respect to Part of the Variables in a Nonlinear Approximation. . . . .	155
2.6	Stability with Respect to Part of the Variables in Lyapunov Critical Cases. . . . .	158
2.7	Overview of References. . . . .	164
<b>3</b>	<b>"Essentially" Nonlinear Problems of Stability with Respect to Part of the Variables</b>	<b>167</b>
3.1	Using a New Class of Lyapunov Functions. . . . .	168
3.2	Developing Theorems of the Barbashin-Krasovskii Type . . . .	177
3.3	Partial Stability in the Presence of Large Initial Perturbations. . . . .	180
3.4	Using Differential Inequalities. . . . .	185
3.5	Instability with Respect to Part of the Variables. . . . .	193
3.6	Stability with Respect to a Specified Number of the Variables. . . . .	197
3.7	Overview of References. . . . .	201
<b>4</b>	<b>Nonlinear Problems of Stabilization and Control with Respect to Part of the Variables</b>	<b>203</b>
4.1	Stabilization with Respect to Part of the Variables. . . . .	204
4.2	The Auxiliary Function of the Partial Stabilization Problem in Studying Problems of Stabilization with Respect to All the Variables and Polystabilization. . . . .	212
4.3	Stabilization and Partial Stabilization of Permanent Rotations (of Equilibrium Positions) of a Solid and a Satellite in Orbit . . . . .	225
4.4	Reorientation of an Asymmetric Solid and Coordinated Control of a System of Solids (Manipulator Model). . . . .	253

4.5	Finite-Time Control with Respect to Part of the Variables with Constraints on Controls. . . . .	267
4.6	The Nonlinear Problem of "Passage" of an Asymmetric Solid through a Given Angular Position. . . . .	280
4.7	Overview of References. . . . .	286

**Nonlinear Game-Theoretic Problems of Control  
with Respect to Part of the Variables  
under Uncontrollable Interference** **289**

5.1	Guaranteed Conditions for Controllability with Respect to Part of the Variables under Uncontrollable Interference . . . .	290
5.2	The Nonlinear Game-Theoretic Problem of "Passage" of an Asymmetric Solid through a Given Angular Position . . . .	298
5.3	An Auxiliary Function of the Problem of Control with Respect to Part of the Variables in Game-Theoretic Problems of Control with Respect to All the Variables. . . . .	307
5.4	The Nonlinear Game-Theoretic Problem of Triaxial Reorientation of an Asymmetric Solid (First Method of Solution). . . . .	318
5.5	The Nonlinear Game-Theoretic Problem of Triaxial Reorientation of an Asymmetric Solid (Second Method of Solution). . . . .	333
5.6	The Nonlinear Game-Theoretic Problem of Uniaxial Reorientation of an Asymmetric Solid. . . . .	338
5.7	Overview of References. . . . .	345

**Stability and Stabilization of Functional-Differential  
Equations with Respect to Part of the Variables** **347**

6.1	Formulation of the Problem of Stability with Respect to Part of the Variables. . . . .	348
6.2	Using the Method of Lyapunov-Krasovskii Functionals. . . . .	350
6.3	Using the Method of Lyapunov Functions. . . . .	360
6.4	The Stability of Linear Delayed Systems with Respect to Part of the Variables. . . . .	362
6.5	The Stabilization of Linear Delayed Systems with Respect to Part of the Variables. . . . .	372
6.6	The Stability of Nonlinear Delayed Systems in the Linear Approximation. . . . .	374
6.7	Overview of References. . . . .	378

**Stability and Stabilization of Stochastic Systems  
with Respect to Part of the Variables** **379**

7.1	Formulation of the Problem of Stability with Respect to Part of the Variables. . . . .	380
7.2	Using the Method of Lyapunov Functions. . . . .	381

7.3	Damping of Rotational Motion of a Solid (with Respect to Part of the Variables) with Random Interference in Control Channels Taken into Account . . . . .	384
7.4	The Stability of Linear Systems with Respect to Part of the Variables. . . . .	387
7.5	Stability with Respect to Part of the Variables in a Linear Approximation. . . . .	390
7.6	The Stabilization of Nonlinear Controlled Systems with Respect to Part of the Variables. . . . .	395
7.7	Overview of References. . . . .	397
	<b>References</b>	<b>399</b>
	<b>Index</b>	<b>425</b>
