| <b>I</b> | <b>Classical Hodge theory</b>   | <b>1</b>  |
| <b>1</b> | <b>Spectral sequences and mixed Hodge structures</b>                          | <b>3</b>  |
| 1.1      | Introduction . . . . .  | 3         |
| 1.2      | Filtrations . . . . .   | 3         |
| 1.3      | Strict morphisms . . . . .  | 4         |
| 1.4      | Filtered complexes . . . . .  | 5         |
| 1.5      | Spectral sequences . . . . .  | 5         |
| 1.6      | The first term of the spectral sequence . . . . .                             | 6         |
| 1.7      | The graded cohomology . . . . .   | 7         |
| 1.8      | Pure Hodge structures . . . . .   | 8         |
| 1.9      | Morphisms of pure Hodge structures . . . . .                                  | 9         |
| 1.10     | Mixed Hodge structures . . . . .  | 11        |
| 1.11     | Exact sequences of mixed Hodge structures . . . . .                           | 14        |
| 1.12     | Shifted complexes and shifted filtrations . . . . .                           | 15        |
| 1.13     | The strictness of $d$ and the degeneration of the spectral sequence . . . . . | 15        |
| 1.14     | Flat modules . . . . .  | 16        |
| 1.15     | Connecting homomorphisms . . . . .  | 17        |
| <b>2</b> | <b>Complex manifolds, vector bundles, differential forms</b>                  | <b>19</b> |
| 2.1      | Introduction . . . . .  | 19        |
| 2.2      | Complex manifolds . . . . .   | 19        |
| 2.2.1    | Definitions of complex coordinates and manifolds . . . . .                    | 19        |
| 2.2.2    | Tangent vectors . . . . .   | 20        |
| 2.2.3    | Holomorphic functions . . . . .   | 22        |
| 2.2.4    | Complex submanifolds . . . . .  | 22        |
| 2.2.5    | Examples . . . . .  | 23        |
| 2.3      | Complex vector bundles and divisors . . . . .                                 | 25        |
| 2.3.1    | Operations on bundles . . . . .   | 27        |
| 2.3.2    | Tangent bundle . . . . .  | 28        |
| 2.3.3    | Example: complex tori . . . . .   | 29        |
| 2.3.4    | Line bundles and divisors . . . . .   | 29        |
| 2.3.5    | Example: $\mathbb{P}^n$ and its line bundles . . . . .                        | 30        |
| 2.4      | Differential forms on complex manifolds . . . . .                             | 31        |
| 2.4.1    | Expressions in local coordinates . . . . .                                    | 32        |

|          |   |           |
|----------|---|-----------|
| 2.4.2    | The Hodge filtrations $F$ and $\bar{F}$ . . . . .   | 33        |
| 2.4.3    | Pullback . . . . .  | 33        |
| 2.4.4    | Exterior differentials . . . . .  | 35        |
| 2.4.5    | Exterior differentials and pullback . . . . .   | 36        |
| 2.4.6    | Differentials and exterior products . . . . .   | 36        |
| 2.4.7    | Forms with coefficients in a vector bundle . . . . .  | 36        |
| 2.5      | Local solutions of $d$ - and $\bar{\partial}$ -equations . . . . .  | 38        |
| 2.5.1    | Poincaré lemma . . . . .  | 38        |
| 2.5.2    | Dolbeault lemma . . . . .   | 39        |
| 2.5.3    | Poincaré lemma for holomorphic forms . . . . .  | 39        |
| <b>3</b> | <b>Sheaves and cohomology</b> . . . . .   | <b>41</b> |
| 3.1      | Sheaves . . . . .   | 41        |
| 3.2      | The cohomology of sheaves . . . . .   | 45        |
| 3.2.1    | The canonical flabby sheaf $\mathcal{C}^0\mathcal{F}$ associated to a given sheaf $\mathcal{F}$ . . . . . | 46        |
| 3.2.2    | Resolutions of sheaves . . . . .  | 47        |
| 3.2.3    | Cohomology of sheaves . . . . .   | 47        |
| 3.3      | The cohomology sequence associated to a closed subspace . . . . .   | 51        |
| 3.4      | Soft and fine sheaves . . . . .   | 53        |
| 3.5      | Direct images of sheaves . . . . .  | 54        |
| 3.6      | $\mathbb{C}$ -ringed spaces . . . . .   | 55        |
| 3.7      | Coherent sheaves . . . . .  | 58        |
| <b>4</b> | <b>Harmonic forms on hermitian manifolds</b> . . . . .  | <b>63</b> |
| 4.1      | Introduction . . . . .  | 63        |
| 4.2      | Hermitian metrics on an exterior algebra . . . . .  | 64        |
| 4.2.1    | Hermitian forms on a complex vector space . . . . .   | 64        |
| 4.2.2    | The exterior algebra of $V^*$ . . . . .   | 66        |
| 4.2.3    | Volume form . . . . .   | 66        |
| 4.2.4    | Metrics on $\Lambda^{p,q}$ . . . . .  | 67        |
| 4.2.5    | The $*$ -operator . . . . .   | 68        |
| 4.2.6    | Determination of $*$ in an orthonormal basis . . . . .  | 69        |
| 4.3      | Hermitian metrics on a complex manifold . . . . .   | 70        |
| 4.3.1    | Application of the results of section 4.2 . . . . .   | 71        |
| 4.4      | Adjoint of $d$ , $\partial$ , $\bar{\partial}$ . De Rham-Hodge Laplacian . . . . .                        | 72        |
| 4.4.1    | De Rham-Hodge operators . . . . .   | 74        |
| 4.5      | Hermitian metrics and Laplacian for holomorphic bundles . . . . .   | 75        |
| 4.5.1    | Metrics on forms with coefficients in a bundle . . . . .  | 76        |
| 4.5.2    | The adjoint of $\bar{\partial}$ . . . . .   | 76        |
| 4.5.3    | De Rham-Hodge Laplace operator for holomorphic bundles . . . . .  | 77        |
| 4.6      | Harmonic forms and cohomology . . . . .   | 78        |
| 4.6.1    | Harmonic forms on compact hermitian manifold . . . . .  | 78        |
| 4.6.2    | The case of holomorphic bundles . . . . .   | 79        |

|          |   |            |
|----------|---|------------|
| 4.7      | Duality . . . . .   | 81         |
| 4.7.1    | Poincaré duality . . . . .  | 81         |
| 4.7.2    | Serre duality . . . . .   | 81         |
| 4.7.3    | Application to modifications . . . . .                              | 83         |
| <b>5</b> | <b>Hodge theory on compact kählerian manifolds</b>                  | <b>85</b>  |
| 5.1      | Introduction . . . . .  | 85         |
| 5.2      | Kählerian manifolds . . . . .                                       | 86         |
| 5.2.1    | Local exactness . . . . .   | 86         |
| 5.2.2    | Cohomological properties of $\omega$ . . . . .                      | 88         |
| 5.3      | Local kählerian geometry . . . . .                                  | 89         |
| 5.3.1    | Covariant derivatives . . . . .                                     | 89         |
| 5.3.2    | Covariant derivatives of differential forms . . . . .               | 93         |
| 5.3.3    | The operator $\Lambda$ . . . . .                                    | 94         |
| 5.3.4    | The equality of the De Rham-Hodge Laplacians . . . . .              | 95         |
| 5.4      | The Hodge decomposition on compact kählerian manifolds . . . . .    | 96         |
| 5.4.1    | Harmonic forms on compact kählerian manifolds . . . . .             | 96         |
| 5.5      | The pure Hodge structure on cohomology . . . . .                    | 97         |
| 5.5.1    | Strictness for $d$ . . . . .  | 98         |
| 5.5.2    | The case of closed forms of pure type . . . . .                     | 100        |

## II Differential forms on complex spaces

135

|          |   |            |
|----------|---|------------|
| <b>1</b> | <b>The basic example</b>  | <b>137</b> |
| 1.1      | Introduction  | 137        |
| 1.2      | A resolution of $\mathbb{C}_X$  | 138        |
| 1.3      | The weight filtration $W$   | 142        |
| 1.4      | The spectral sequence of the filtration $W$                                     | 143        |
| 1.5      | The filtrations $F^p$ and $\bar{F}^q$   | 145        |
| 1.6      | Mixed Hodge structures on the cohomology and on the spectral sequence           | 146        |
| 1.7      | Chains and homology   | 148        |
| 1.8      | Integration of forms on chains  | 149        |
| <b>2</b> | <b>Differential forms on complex spaces</b>                                     | <b>151</b> |
| 2.1      | Introduction  | 151        |
| 2.2      | Definitions and statements  | 153        |
| 2.2.1    | Definition of the family $\mathcal{R}(X)$                                       | 153        |
| 2.2.2    | Construction-existence theorem  | 155        |
| 2.2.3    | Definition of a primary pullback for irreducible spaces                         | 156        |
| 2.2.4    | Definition of a pullback morphism: the general case                             | 157        |
| 2.2.5    | Existence of primary pullback (the irreducible case)                            | 160        |
| 2.2.6    | Uniqueness of primary pullback (the irreducible case)                           | 161        |
| 2.2.7    | Existence of pullback: the general case   | 161        |
| 2.2.8    | Uniqueness of pullback: the general case  | 161        |
| 2.2.9    | Composition of primary pullback (the irreducible case)                          | 161        |
| 2.2.10   | Composition of pullback: the general case                                       | 161        |
| 2.2.11   | The filtration property   | 161        |
| 2.3      | The induction procedure   | 162        |
| 2.4      | The proofs  | 162        |
| 2.4.1    | Proof of theorem 2.7: composition of primary pullback (the irreducible case)    | 164        |
| 2.4.2    | Proof of theorem 2.8: composition of pullback (the general case)                | 165        |
| 2.4.3    | Proof of theorem 2.1: construction-existence                                    | 167        |
| 2.4.4    | Proof of theorem 2.2: existence of primary pullback (the irreducible case)      | 169        |
| 2.4.5    | Proof of theorem 2.4: uniqueness of the primary pullback (the irreducible case) | 172        |
| 2.4.6    | Proof of theorem 2.5: existence of pullback (the general case)                  | 174        |
| 2.4.7    | Proof of theorem 2.6: uniqueness of the pullback (the general case)             | 176        |
| 2.4.8    | Proof of theorem 2.9: filtering   | 177        |
| 2.5      | Kähler hypercoverings   | 177        |
| 2.6      | Chains and homology   | 178        |

|            |  |            |
|------------|--|------------|
| 2.7        | Integration of forms on chains . . . . .                                     | 180        |
| 2.8        | The complex of Grauert and Grothendieck . . . . .                            | 181        |
| <b>3</b>   | <b>Mixed Hodge structures on compact spaces</b>                              | <b>183</b> |
| 3.1        | Introduction . . . . .   | 183        |
| 3.2        | Filtration by the degree: the weight filtration . . . . .                    | 184        |
| 3.3        | The weight filtration in cohomology . . . . .                                | 186        |
| 3.4        | The action of $d$ on the filtered complexes . . . . .                        | 186        |
| 3.5        | The first term of the spectral sequence . . . . .                            | 189        |
| 3.6        | The second term of the spectral sequence . . . . .                           | 190        |
| 3.7        | Computation of $d_r$ . . . . .   | 192        |
