<b>List of Tables</b>	xiii
<b>Preface and Study Guide to the First Edition</b>	xiv
<b>Preface to the Second Edition</b>	xvi
<b>1 The Sun and its Family</b>	<b>1</b>
1.1 The Sun	1
1.1.1 The Solar Photosphere	1
1.1.2 The Solar Atmosphere	3
1.1.3 The Solar Interior	5
1.1.4 The Solar Neutrino Problem	8
1.2 The Sun's Family – A Brief Introduction	9
1.2.1 The Terrestrial Planets and the Asteroids	11
1.2.2 The Giant Planets	11
1.2.3 Pluto and Beyond	13
1.3 Chemical Elements in the Solar System	14
1.4 Orbits of Solar System Bodies	15
1.4.1 Kepler's Laws of Planetary Motion	15
1.4.2 Orbital Elements	18
1.4.3 Asteroids and the Titius–Bode Rule	20
1.4.4 A Theory of Orbits	20
1.4.5 Orbital Complications	24
1.4.6 Orbital Resonances	27
1.4.7 The Orbit of Mercury	29
1.5 Planetary Rotation	30
1.5.1 Precession of the Rotation Axis	33
1.6 The View from the Earth	35
1.6.1 The Other Planets	35
1.6.2 Solar and Lunar Eclipses	36
1.7 Summary of Chapter 1	40
<b>2 The Origin of the Solar System</b>	<b>48</b>
2.1 The Observational Basis	48
2.1.1 The Solar System	48
2.1.2 Exoplanetary Systems	49
2.1.3 Star Formation	53
2.1.4 Circumstellar Discs	55
2.2 Solar Nebular Theories	56
2.2.1 Angular Momentum in the Solar System	57
2.2.2 The Evaporation and Condensation of Dust in the Solar Nebula	60
2.2.3 From Dust to Planetesimals	64

2.2.4	From Planetesimals to Planets in the Inner Solar System	65
2.2.5	From Planetesimals to Planets in the Outer Solar System	69
2.2.6	The Origin of the Oort Cloud, the E–K Belt, and Pluto	73
2.3	Formation of the Satellites and Rings of the Giant Planets	75
2.3.1	Formation of the Satellites of the Giant Planets	75
2.3.2	Formation and Evolution of the Rings of the Giant Planets	76
2.4	Successes and Shortcomings of Solar Nebular Theories	80
2.5	Summary of Chapter 2	81
<b>3</b>	<b>Small Bodies in the Solar System</b>	<b>83</b>
3.1	Asteroids	83
3.1.1	Asteroid Orbits in the Asteroid Belt	84
3.1.2	Asteroid Orbits Outside the Asteroid Belt	86
3.1.3	Asteroid Sizes	89
3.1.4	Asteroid Shapes and Surface Features	91
3.1.5	Asteroid Masses, Densities, and Overall Composition	93
3.1.6	Asteroid Classes and Surface Composition	94
3.2	Comets and Their Sources	98
3.2.1	The Orbits of Comets	99
3.2.2	The Coma, Hydrogen Cloud, and Tails of a Comet	101
3.2.3	The Cometary Nucleus	103
3.2.4	The Death of Comets	106
3.2.5	The Sources of Comets	107
3.2.6	The Oort Cloud	108
3.2.7	The E–K Belt	109
3.3	Meteorites	111
3.3.1	Meteors, Meteorites, and Micrometeorites	112
3.3.2	The Structure and Composition of Meteorites	113
3.3.3	Dating Meteorites	116
3.3.4	The Sources of Meteorites	118
3.3.5	The Sources of Micrometeorites	121
3.4	Summary of Chapter 3	123
<b>4</b>	<b>Interiors of Planets and Satellites: The Observational and Theoretical Basis</b>	<b>126</b>
4.1	Gravitational Field Data	126
4.1.1	Mean Density	126
4.1.2	Radial Variations of Density: Gravitational Coefficients	131
4.1.3	Radial Variations of Density: The Polar Moment of Inertia	134
4.1.4	Love Numbers	135
4.1.5	Local Mass Distribution, and Isostasy	135
4.2	Magnetic Field Data	136
4.3	Seismic Wave Data	139
4.3.1	Seismic Waves	139
4.3.2	Planetary Seismic Wave Data	142
4.4	Composition and Properties of Accessible Materials	143
4.4.1	Surface Materials	143
4.4.2	Elements, Compounds, Affinities	144

4.4.3	Equations of State, and Phase Diagrams	145
4.5	Energy Sources, Energy Losses, and Interior Temperatures	149
4.5.1	Energy Sources	150
4.5.2	Energy Losses and Transfers	154
4.5.3	Observational Indicators of Interior Temperatures	159
4.5.4	Interior Temperatures	159
4.6	Summary of Chapter 4	161
<b>5</b>	<b>Interiors of Planets and Satellites: Models of Individual Bodies</b>	<b>163</b>
5.1	The Terrestrial Planets	163
5.1.1	The Earth	166
5.1.2	Venus	169
5.1.3	Mercury	170
5.1.4	Mars	171
5.2	Planetary Satellites, Pluto, EKOs	173
5.2.1	The Moon	173
5.2.2	Large Icy-Rocky Bodies: Titan, Triton, Pluto, and EKOs	176
5.2.3	The Galilean Satellites of Jupiter	179
5.2.4	Small Satellites	183
5.3	The Giant Planets	183
5.3.1	Jupiter and Saturn	185
5.3.2	Uranus and Neptune	189
5.4	Magnetospheres	190
5.4.1	An Idealised Magnetosphere	191
5.4.2	Real Magnetospheres	192
5.5	Summary of Chapter 5	194
<b>6</b>	<b>Surfaces of Planets and Satellites: Methods and Processes</b>	<b>197</b>
6.1	Some Methods of Investigating Surfaces	197
6.1.1	Surface Mapping in Two and Three Dimensions	197
6.1.2	Analysis of Electromagnetic Radiation Reflected or Emitted by a Surface	200
6.1.3	Sample Analysis	201
6.2	Processes that Produce the Surfaces of Planetary Bodies	201
6.2.1	Differentiation, Melting, Fractional Crystallisation, and Partial Melting	202
6.2.2	Volcanism and Magmatic Processes	204
6.2.3	Tectonic Processes	206
6.2.4	Impact Cratering	207
6.2.5	Craters as Chronometers	212
6.2.6	Gradation	216
6.2.7	Formation of Sedimentary Rocks	219
6.2.8	Formation of Metamorphic Rocks	220
6.3	Summary of Chapter 6	220
<b>7</b>	<b>Surfaces of Planets and Satellites: Weakly Active Surfaces</b>	<b>223</b>
7.1	The Moon	223
7.1.1	Impact Basins and Maria	224
7.1.2	The Nature of the Mare Infill	225

7.1.3	Two Contrasting Hemispheres	226
7.1.4	Tectonic Features; Gradation and Weathering	227
7.1.5	Localised Water Ice?	227
7.1.6	Crustal and Mantle Materials	227
7.1.7	Radiometric Dating of Lunar Events	230
7.1.8	Lunar Evolution	231
7.2	Mercury	232
7.2.1	Mercurian Craters	233
7.2.2	The Highlands and Plains of Mercury	233
7.2.3	Surface Composition	236
7.2.4	Other Surface Features on Mercury	236
7.2.5	The Evolution of Mercury	236
7.3	Mars	238
7.3.1	Albedo Features	238
7.3.2	The Global View	239
7.3.3	The Northerly Hemisphere	241
7.3.4	The Southerly Hemisphere	243
7.3.5	The Polar Regions	245
7.3.6	Water-related Features	247
7.3.7	Observations at the Martian Surface	253
7.3.8	Martian Meteorites	256
7.3.9	The Evolution of Mars	257
7.4	Icy Surfaces	258
7.4.1	Pluto and Charon	258
7.4.2	Ganymede and Callisto	260
7.5	Summary of Chapter 7	262
<b>8</b>	<b>Surfaces of Planets and Satellites: Active Surfaces</b>	<b>264</b>
8.1	The Earth	264
8.1.1	The Earth's Lithosphere	264
8.1.2	Plate Tectonics	266
8.1.3	The Success of Plate Tectonics	270
8.1.4	The Causes of Plate Motion	271
8.1.5	The Evolution of the Earth	272
8.2	Venus	273
8.2.1	Topological Overview	273
8.2.2	Radar Reflectivity	275
8.2.3	Impact Craters and Possible Global Resurfacing	275
8.2.4	Volcanic Features	277
8.2.5	Surface Analyses and Surface Images	278
8.2.6	Tectonic Features	278
8.2.7	Tectonic and Volcanic Processes	279
8.2.8	Internal Energy Loss	282
8.2.9	The Evolution of Venus	282
8.3	Io	283
8.4	Icy Surfaces: Europa, Titan, Enceladus, Triton	284
8.4.1	Europa	284

8.4.2	Titan	286
8.4.3	Enceladus	290
8.4.4	Triton	292
8.5	Summary of Chapter 8	294
<b>9</b>	<b>Atmospheres of Planets and Satellites: General Considerations</b>	<b>296</b>
9.1	Methods of Studying Atmospheres	298
9.2	General Properties and Processes in Planetary Atmospheres	301
9.2.1	Global Energy Gains and Losses	301
9.2.2	Pressure, Density, and Temperature Versus Altitude	305
9.2.3	Cloud Formation and Precipitation	310
9.2.4	The Greenhouse Effect	312
9.2.5	Atmospheric Reservoirs, Gains, and Losses	314
9.2.6	Atmospheric Circulation	318
9.2.7	Climate	322
9.3	Summary of Chapter 9	322
<b>10</b>	<b>Atmospheres of Rocky and Icy–Rocky Bodies</b>	<b>324</b>
10.1	The Atmosphere of the Earth	324
10.1.1	Vertical Structure; Heating and Cooling	324
10.1.2	Atmospheric Reservoirs, Gains, and Losses	326
10.1.3	Atmospheric Circulation	332
10.1.4	Climate Change	333
10.2	The Atmosphere of Mars	336
10.2.1	Vertical structure; heating and cooling	336
10.2.2	Atmospheric Reservoirs, Gains, and Losses	338
10.2.3	Atmospheric Circulation	339
10.2.4	Climate Change	340
10.3	The Atmosphere of Venus	341
10.3.1	Vertical structure; heating and cooling	341
10.3.2	Atmospheric Reservoirs, Gains, and Losses	342
10.3.3	Atmospheric Circulation	343
10.4	Volatile Inventories for Venus, the Earth, and Mars	344
10.5	The Origin of Terrestrial Atmospheres	348
10.5.1	Inert Gas Evidence	348
10.5.2	Volatile Acquisition During Planet Formation	349
10.5.3	Early Massive Losses	351
10.5.4	Late Veneers	352
10.5.5	Outgassing	353
10.6	Evolution of Terrestrial Atmospheres, and Climate Change	354
10.6.1	Venus	355
10.6.2	The Earth	356
10.6.3	Mars	360
10.6.4	Life on Mars?	361
10.7	Mercury and the Moon	362
10.8	Icy–Rocky Body Atmospheres	363
10.8.1	Titan	363

10.8.2 Triton and Pluto	366
10.8.3 The Origin and Evolution of the Atmospheres of Icy-Rocky Bodies	367
10.9 Summary of Chapter 10	368
<b>11 Atmospheres of the Giant Planets</b>	<b>371</b>
11.1 The Atmospheres of Jupiter and Saturn Today	372
11.1.1 Vertical Structure	372
11.1.2 Composition	374
11.1.3 Circulation	377
11.1.4 Coloration	382
11.2 The Atmospheres of Uranus and Neptune Today	383
11.2.1 Vertical Structure	383
11.2.2 Composition	384
11.2.3 Circulation	385
11.3 The Origin of the Giant Planets – A Second Look	387
11.4 Summary of Chapter 11	390
11.5 The End	390
<b>Question Answers and Comments</b>	<b>393</b>
