

# Critical Problems in Physics

Proceedings of a Conference Celebrating the  
250th Anniversary of Princeton University  
Princeton, New Jersey  
October 31, November 1, November 2, 1996

VAL L. FITCH  
DANIEL R. MARLOW  
MARGIT A. E. DEMENTI, EDITORS

*Princeton Series in Physics*

PRINCETON UNIVERSITY PRESS · PRINCETON, NEW JERSEY

# CONTENTS

## PREFACE

VAL FITCH . . . . .	xv
---------------------	----

## 1 THE 1946 CONFERENCE: THEN AND NOW

SAM TREIMAN . . . . .	1
1.1 DISCUSSION . . . . .	7

## 2 NONEQUILIBRIUM PHYSICS

J.S. LANGER . . . . .	11
2.1 INTRODUCTION . . . . .	11
2.2 KEPLER'S SNOWFLAKES . . . . .	13
2.3 THOREAU'S SNOWFLAKES . . . . .	13
2.4 METALLURGICAL MICROSTRUCTURES . . . . .	14
2.5 SOLIDIFICATION AS A FREE-BOUNDARY PROBLEM . . . . .	14
2.6 SHAPE INSTABILITIES AND SINGULAR PERTURBATIONS . . . . .	15
2.7 THERMAL FLUCTUATIONS AND SIDEBRANCHES . . . . .	16
2.8 A FIELD-THEORETIC DESCRIPTION OF SOLIDIFICATION PATTERNS . . . . .	17
2.9 THE SYMMETRY AND DIVERSITY OF SNOWFLAKES . . . . .	18
2.10 FRACTURE DYNAMICS . . . . .	19
2.11 THE PHYSICS OF COMPLEXITY . . . . .	20
2.12 DISCUSSION . . . . .	23

## 3 DYNAMICS, COMPUTATION, AND NEUROBIOLOGY

JOHN J. HOPFIELD . . . . .	29
3.1 BIOLOGY AND PHYSICS . . . . .	29
3.2 NEURAL COMPUTATION AND DYNAMICS . . . . .	31
3.3 STATISTICAL AND COLLECTIVE ASPECTS . . . . .	35
3.4 DEVELOPMENT AND ENVIRONMENT . . . . .	38
3.5 EVOLUTION AS A SOURCE OF UNITY . . . . .	39
3.6 CONCLUDING REMARKS . . . . .	44
3.7 DISCUSSION . . . . .	46

## 4 EMERGENCE AND EVOLUTION OF PATTERNS

HARRY L. SWINNEY . . . . .	51
4.1 NEAR EQUILIBRIUM: THE BASE STATE . . . . .	51
4.2 INSTABILITY OF THE BASE STATE . . . . .	52

4.3	FAR BEYOND THE ONSET OF STABILITY: EXPERIMENTS, SIMULATIONS, AND SYMMETRY . . . . .	58
4.4	PERSISTENCE OF ORDER . . . . .	65
4.5	PROSPECTS . . . . .	66
4.6	DISCUSSION . . . . .	71
<b>5</b>	<b>HIGH TEMPERATURE SUPERCONDUCTORS</b>	
	<b>T.V. RAMAKRISHNAN . . . . .</b>	<b>75</b>
5.1	THE SETTING . . . . .	76
	5.1.1 THE ATOMIC ARRANGEMENT . . . . .	76
	5.1.2 ELECTRONIC STRUCTURE . . . . .	76
	5.1.3 MOTT INSULATOR . . . . .	77
	5.1.4 DOPED MOTT INSULATOR . . . . .	78
5.2	THE INSULAR METAL . . . . .	79
	5.2.1 ELECTRICAL RESISTIVITY . . . . .	80
	5.2.2 OPTICAL CONDUCTIVITY . . . . .	82
	5.2.3 ANGLE-RESOLVED PHOTOEMISSION SPECTROSCOPY (ARPES) . . . . .	83
5.3	THE METAL IN-PLANE . . . . .	85
	5.3.1 RESISTIVITY . . . . .	86
	5.3.2 THE HALL EFFECT . . . . .	89
	5.3.3 OPTICAL CONDUCTIVITY . . . . .	90
	5.3.4 SINGLE PARTICLE SPECTRUM . . . . .	91
	5.3.5 MAGNETIC EXCITATIONS . . . . .	93
5.4	LOWER ENERGY SCALE . . . . .	94
5.5	THE SUPERCONDUCTING STATE . . . . .	98
5.6	THEORIES . . . . .	101
5.7	FUTURE . . . . .	104
5.8	DISCUSSION . . . . .	108
<b>6</b>	<b>THE ONGOING REVOLUTION IN MEDICAL IMAGING</b>	
	<b>BRUCE J. HILLMAN . . . . .</b>	<b>113</b>
6.1	DISCUSSION . . . . .	117
<b>7</b>	<b>COSMOLOGICAL CHALLENGES FOR THE 21<sup>st</sup> CENTURY</b>	
	<b>PAUL J. STEINHARDT . . . . .</b>	<b>123</b>
7.1	INTRODUCTION . . . . .	123
7.2	IS THE UNIVERSE FLAT? . . . . .	125
7.3	DO WE LIVE IN AN INFLATIONARY UNIVERSE? . . . . .	128
7.4	DOES $\Omega_{\text{matter}} = 1$ ? . . . . .	134
7.5	IF $\Omega_{\text{matter}} < 1$ AND $\Omega_{\text{total}} = 1$ , WHAT ELSE IS THERE? . . . . .	136
7.6	ULTIMATE CHALLENGE . . . . .	140
7.7	DISCUSSION . . . . .	145

**8 GRAVITATION AND EXPERIMENT**

<b>THIBAUT DAMOUR</b> . . . . .	147
8.1 INTRODUCTION . . . . .	147
8.2 EXPERIMENTAL TESTS OF THE COUPLING BETWEEN MATTER AND GRAVITY . . . . .	149
8.3 TESTS OF THE DYNAMICS OF THE GRAVITATIONAL FIELD IN THE WEAK FIELD REGIME . . . . .	150
8.4 TESTS OF THE DYNAMICS OF THE GRAVITATIONAL FIELD IN THE STRONG FIELD REGIME . . . . .	153
8.5 WAS EINSTEIN 100% RIGHT? . . . . .	158
8.6 DISCUSSION . . . . .	165

**9 GRAVITATIONAL WAVES**

<b>KIP S. THORNE</b> . . . . .	167
9.1 INTRODUCTION . . . . .	167
9.2 GROUND-BASED LASER INTERFEROMETERS: LIGO & VIRGO	169
9.2.1 WAVE POLARIZATIONS, WAVEFORMS, AND HOW AN INTERFEROMETER WORKS . . . . .	169
9.2.2 WAVE STRENGTHS AND INTERFEROMETER ARM LENGTHS . . . . .	171
9.2.3 LIGO, VIRGO, AND THE INTERNATIONAL GRAVITA- TIONAL WAVE NETWORK . . . . .	172
9.2.4 NARROW-BAND DETECTORS . . . . .	175
9.3 LISA: THE LASER INTERFEROMETER SPACE ANTENNA . . . .	176
9.4 BINARIES MADE OF NEUTRON STARS, BLACK HOLES, AND OTHER EXOTIC OBJECTS: INSPIRAL, COLLISION, AND COA- LESCENCE IN THE HF BAND . . . . .	178
9.4.1 WAVE STRENGTHS COMPARED TO LIGO SENSITIVITIES	178
9.4.2 COALESCENCE RATES . . . . .	179
9.4.3 INSPIRAL WAVEFORMS AND THE INFORMATION THEY CAN BRING . . . . .	180
9.4.4 TESTING GR, MEASURING THE COSMOLOGICAL UNI- VERSE, MAPPING BLACK HOLES, AND SEARCHING FOR EXOTIC OBJECTS . . . . .	183
9.4.5 COALESCENCE WAVEFORMS AND THEIR INFORMATION	184
9.5 OTHER HIGH-FREQUENCY SOURCES . . . . .	186
9.5.1 STELLAR CORE COLLAPSE AND SUPERNOVAE . . . . .	186
9.5.2 SPINNING NEUTRON STARS; PULSARS . . . . .	189
9.6 LOW-FREQUENCY GRAVITATIONAL-WAVE SOURCES . . . . .	191
9.6.1 WAVES FROM THE COALESCENCE OF MASSIVE BLACK HOLES IN DISTANT GALAXIES . . . . .	191

9.6.2	WAVES FROM COMPACT BODIES SPIRALING INTO MASSIVE BLACK HOLES OR EXOTIC OBJECTS IN DISTANT GALAXIES . . . . .	192
9.7	CONCLUSION . . . . .	194
9.8	DISCUSSION . . . . .	198
<b>10</b>	<b>NEUTRINO OSCILLATIONS</b>	
	<b>D.H. PERKINS . . . . .</b>	<b>201</b>
10.1	SOME NEUTRINO PROPERTIES . . . . .	201
10.2	NEUTRINO OSCILLATIONS . . . . .	203
10.3	SOLAR NEUTRINOS . . . . .	205
10.4	ATMOSPHERIC NEUTRINOS . . . . .	208
10.5	MAXIMAL MIXING . . . . .	211
10.6	APPEARANCE EXPERIMENTS . . . . .	214
10.7	LONG BASELINE EXPERIMENTS . . . . .	214
10.8	A NEUTRINO CRISIS? . . . . .	217
10.9	DISCUSSION . . . . .	219
<b>11</b>	<b>THE TEVATRON</b>	
	<b>ALVIN TOLLESTRUP . . . . .</b>	<b>221</b>
11.1	THE TEVATRON . . . . .	222
11.2	THE FACTORY CONCEPT . . . . .	223
11.3	THE MAGNET . . . . .	225
11.4	MAGNETIC MEASUREMENT . . . . .	226
11.5	CRYOGENICS . . . . .	227
11.6	THE FUTURE . . . . .	227
11.7	SOME PHYSICS RESULTS . . . . .	229
11.8	THE NEAR FUTURE . . . . .	237
11.9	THE FAR FUTURE . . . . .	239
11.10	CONCLUSION . . . . .	243
11.11	DISCUSSION . . . . .	245
<b>12</b>	<b>HIGH ENERGY COLLIDERS</b>	
	<b>R.B. PALMER AND J.C. GALLARDO . . . . .</b>	<b>247</b>
12.1	INTRODUCTION . . . . .	247
12.2	PHYSICS CONSIDERATIONS . . . . .	248
	12.2.1 GENERAL . . . . .	248
	12.2.2 REQUIRED LUMINOSITY FOR LEPTON COLLIDERS . . . . .	249
	12.2.3 THE EFFECTIVE PHYSICS ENERGIES OF HADRON COLLIDERS . . . . .	250
12.3	HADRON-HADRON MACHINES . . . . .	251
	12.3.1 LUMINOSITY . . . . .	251
	12.3.2 SIZE AND COST . . . . .	251

12.4	CIRCULAR $e^+e^-$ MACHINES . . . . .	252
12.4.1	LUMINOSITY . . . . .	252
12.4.2	SIZE AND COST . . . . .	253
12.5	$e^+e^-$ LINEAR COLLIDERS . . . . .	254
12.5.1	LUMINOSITY . . . . .	254
12.5.2	CONVENTIONAL RF . . . . .	255
12.5.3	SUPERCONDUCTING RF . . . . .	256
12.5.4	AT HIGHER ENERGIES . . . . .	257
12.6	$\gamma - \gamma$ COLLIDERS . . . . .	258
12.7	$\mu^+\mu^-$ COLLIDERS . . . . .	258
12.7.1	ADVANTAGES AND DISADVANTAGES . . . . .	258
12.7.2	DESIGN STUDIES . . . . .	260
12.7.3	STATUS AND REQUIRED R AND D . . . . .	262
12.8	COMPARISON OF MACHINES . . . . .	263
12.9	CONCLUSIONS . . . . .	264
12.10	DISCUSSION . . . . .	268
<b>13</b>	<b>VISTAS IN THEORETICAL PHYSICS</b>	
	<b>EDWARD WITTEN . . . . .</b>	<b>271</b>
13.1	PREDICTIONS AND POST-DICTIONS IN THE CLASSIC PERIOD . . . . .	273
13.2	THE MYSTERY OF THE COSMOLOGICAL CONSTANT . . . . .	274
13.3	THE BIG QUESTIONS . . . . .	275
13.4	OUTLOOK . . . . .	278
13.5	DISCUSSION . . . . .	279
<b>14</b>	<b>THE FUTURE OF PARTICLE PHYSICS AS A NATURAL SCIENCE</b>	
	<b>FRANK WILCZEK . . . . .</b>	<b>281</b>
14.1	TRIUMPH OF THE STANDARD MODEL . . . . .	281
14.2	DEFICIENCIES OF THE STANDARD MODEL . . . . .	286
14.3	UNIFICATION: SYMMETRY . . . . .	289
14.4	UNIFICATION: DYNAMICS, AND A BIG HINT OF SUPERSYMMETRY . . . . .	292
14.4.1	THE CENTRAL RESULT . . . . .	292
14.4.2	IMPLICATIONS . . . . .	297
14.4.3	WHY SUPERSYMMETRY IS A GOOD THING . . . . .	298
14.5	THE FARTHER FUTURE: CONNECTIONS . . . . .	300
14.5.1	MATTER . . . . .	301
14.5.2	COSMOS . . . . .	302
14.6	DISCUSSION . . . . .	307
