

Some New Global Optimization Algorithms

Sami Viitanen

ÅBO 1997

ÅBO AKADEMIS FÖRLAG - ÅBO AKADEMI UNIVERSITY PRESS

Contents

1 Introduction	1
2 The Global Optimization Problem	4
2.1 Characteristics of Global Optimization Problems	6
2.2 Classification of Global Optimization Problems	8
3 Global Optimization Methods	9
3.1 Characteristics of Global Optimization Methods	10
3.2 Comparing Global Optimization Methods	11
3.3 Covering Methods	12
3.3.1 The Bisection Method.....	12
3.3.2 Interval Methods	14
3.4 Probabilistic Methods.....	15
3.4.1 Stopping Conditions	15
3.4.2 Single Working Point Methods.....	17
3.4.2.1 Pure Random Search	17
3.4.2.2 Adaptive Search	17
3.4.2.3 Simulated Annealing.....	18
3.4.3 Converging Set Methods.....	18
3.4.3.1 Genetic Algorithms	19
3.4.3.2 Controlled Random Search	20
3.4.4 Multistart.....	23
3.4.5 Cluster-finding Methods	24
3.4.6 Cluster Center Methods	25
3.4.6.1 Topographical Global Optimization	25
3.4.6.2 Multi Level Single Linkage	26
3.4.7 Bayesian Methods.....	27
4 Summary of Results	28
