

# **Images of the earth**

## a guide to remote sensing

SECOND EDITION

**S. A. DRURY**

Lecturer in Earth Sciences  
The Open University

Oxford New York Tokyo  
OXFORD UNIVERSITY PRESS  
1998

# Contents

---

Introduction	1
1 The problems	5
1.1 Water	5
1.2 Food	7
1.3 Natural disasters	10
1.4 Physical communications	12
1.5 Physical resources	14
1.6 Natural environments	16
1.7 Security	19
2 Getting the information	22
2.1 Human perception	22
2.2 Radiation and matter	28
2.2.1 Reflection and absorption	32
2.2.2 Thermal emission	35
2.2.3 Artificial radiation	36
2.3 Detecting radiation	38
2.3.1 Photographs	39
2.3.2 Electromechanical methods	41
2.3.3 Passive microwave imaging	43
2.3.4 Active microwave or radar imaging	43
2.4 Sources of remotely sensed data	44
2.4.1 A short history of remote sensing	45
2.4.2 Airborne data	46
2.4.3 Data from satellites	46
2.5 Displaying information	53
2.5.1 Other kinds of data	63
3 Interpreting the information	65
3.1 The weather and climate	65
3.2 The sea	75
3.3 The land	84
3.4 Natural vegetation	94
3.5 Use of the land	103
3.6 Beneath the surface	112
4 Using the information	121
4.1 Water resources	122
4.2 Food and fibre	126

*Contents*

4.3 Physical resources	136
4.4 Communications	145
4.5 Disasters	148
4.6 Environmental change	152
4.7 Military uses	159
5 Operational issues	165
5.1 Benefits	165
5.2 Costs	170
5.3 Training	171
5.4 Data distribution	173
5.5 Future prospects	177
Appendix	180
A.1 Training opportunities	180
A.2 Sources of images	182
Further reading	186
Glossary	189
Index	199
