# The Unified Modeling Language

## Technical Aspects and Applications

With 108 Figures  
and 15 Tables

**Physica-Verlag**  
A Springer-Verlag Company

# Contents

## Part 1: UML vs. Other Approaches

|   |    |
|---|----|
| Exchange of UML-Models with EIA/CDIF<br><i>R.G. Flatscher</i> . . . . .   | 3  |
| Object-Oriented Modeling Languages:<br>State of the Art and Open Research Questions<br><i>U. Frank</i> . . . . .              | 14 |
| From a Semantically Irreducible Formulated Conceptual Schema<br>to an UML Model<br><i>L. Kern-Bausch, M. Jeckle</i> . . . . . | 32 |
| On Mapping Between UML and Entity-Relationship Model<br><i>Y. Ou</i> . . . . .  | 45 |
| Evaluation of Object-Oriented Modelling Languages:<br>A Comparison Between OML and UML<br><i>M. Prasse</i> . . . . .          | 58 |

## Part 2: Technical Aspects and Concepts

|   |     |
|---|-----|
| A Critical Look upon UML 1.0<br><i>K. Bergner, A. Rausch, M. Sihling</i> . . . . .  | 79  |
| Systems, Views and Models of UML<br><i>R. Breu, R. Grosu, F. Huber, B. Rumpe, W. Schwerin</i> . . . . .                                 | 93  |
| On Constraints and Queries in UML<br><i>M. Gogolla, M. Richters</i> . . . . .   | 109 |
| Modeling Java Threads in UML<br><i>M. Schader, A. Korthaus</i> . . . . .  | 122 |
| Formal Definition of UML's Package Concept<br><i>A. Schürr, A. Winter</i> . . . . .   | 144 |
| UMLscript: A Programming Language for Object-Oriented Design<br><i>J. Seemann, J.W. von Gudenberg</i> . . . . .                         | 160 |
| Ways of Handling and Interpreting Specialization<br>in Object-Oriented Modeling<br><i>S. Strahringer</i> . . . . .                      | 170 |
| Reuse of Models and Diagrams of the UML and Implementation Concepts<br>Regarding Dynamic Modeling<br><i>W. Weber, P. Metz</i> . . . . . | 190 |

**Part 3: Business Process Modeling and Applications**

|   |     |
|---|-----|
| Application of UML Within the Scope of<br>New Telecommunication Architectures<br><i>E. Holz</i> . . . . .                             | 207 |
| Using UML for Business Object Based Systems Modeling<br><i>A. Korthaus</i> . . . . .  | 220 |
| System Development with V-Model and UML<br><i>G. Müller-Ettrich</i> . . . . .   | 238 |
| Business Process Modeling with EPC and UML:<br>Transformation or Integration?<br><i>M. Nüttgens, T. Feld, V. Zimmermann</i> . . . . . | 250 |
| Conventions for the Practical Use of UML<br><i>A. Schroff, A. Teichrieb</i> . . . . .   | 262 |
| Software Engineering Process with the UML<br><i>M. Wolf, R. Burkhardt, I. Philippow</i> . . . . .                                     | 271 |
| <b>Author and Subject Index</b> . . . . .   | 281 |
