S+SPATIALSTATS

User's Manual for
Windows[®] and UNIX[®]

Springer

Contents

How to Use This Book	x
Acknowledgements	xv
1 Introduction to Spatial Data and S+SPATIALSTATS	1
1.1 Types of Spatial Data	1
1.1.1 Geostatistical Data	2
1.1.2 Lattice Data	2
1.1.3 Spatial Point Patterns	4
1.2 Analysis of Spatial Data	5
1.2.1 Data Model	5
1.2.2 Data Collection and Accuracy	5
1.2.3 Stationarity	6
1.2.4 Isotropy	6
1.2.5 Scale	6
1.3 Stochastic Model for Spatial Data	7
1.4 Spatial Analysis Tools in S+SPATIALSTATS	7
1.5 Limitations	9
2 Getting Started with S+SPATIALSTATS	10
2.1 Starting and Quitting S+SPATIALSTATS	11
2.1.1 Organizing Your Working Data in UNIX	12
2.1.2 Organizing Your Working Data in Windows 3.1	12
2.1.3 Organizing Your Working Data in Windows 95	14

2.2	Getting Help for S+SPATIALSTATS Functions in Windows	15
2.3	Graphics Devices	15
2.4	Using Trellis Graphics in S+SPATIALSTATS	16
2.5	Importing and Exporting Spatial Data	16
2.5.1	Reading ASCII Files with Spatial Neighbor Information	16
2.5.2	Importing and Exporting GEO-EAS Data	17
2.5.3	Importing and Exporting ARC/INFO Data	17
2.6	Sample Data Sets Available in S+SPATIALSTATS	17
3	Visualizing Spatial Data	18
3.1	EDA Tools	18
3.1.1	Descriptive Statistics	19
3.1.2	Plots and Graphics	21
3.1.3	Classification and Clustering Methods	27
3.2	Applications of EDA to Geostatistical Data	33
3.2.1	Example: Gridded Data	33
3.2.2	Example: Non-gridded Data	39
3.3	Applications of EDA to Lattice Data	48
3.4	Applications of EDA to Point Patterns	57
3.5	Hexagonal Binning	60
4	Analyzing Geostatistical Data	67
4.1	Variogram Estimation	67
4.1.1	The Empirical Variogram	68
4.1.2	Variogram Clouds	75
4.1.3	Detecting and Removing Trends	80
4.1.4	Anisotropy	84
4.2	Modeling the Empirical Variogram	91
4.2.1	Theoretical Variogram Models	91
4.2.2	Fitting a Theoretical Variogram Model	92

4.3	Kriging	98
4.3.1	Ordinary Kriging	98
4.3.2	Universal Kriging	105
4.4	Simulating Geostatistical Data	107
5	Analyzing Lattice Data	110
5.1	Spatial Neighbors	111
5.1.1	Objects of Class "spatial.neighbor"	111
5.1.2	Reading Neighbor Information from an ASCII File	113
5.1.3	Finding Spatial Neighbors	115
5.1.4	Neighbor Weights	121
5.1.5	Using More Than One Neighbor Matrix	123
5.2	Spatial Autocorrelation	124
5.3	Spatial Regression Models	128
5.3.1	Covariance Families	128
5.3.2	Fitting Spatial Linear Models	129
5.3.3	Model Selection	134
5.3.4	Model Diagnostics	136
5.4	Simulating Lattice Data	144
6	Analyzing Spatial Point Patterns	146
6.1	Objects of Class "spp"	147
6.2	Measures of Spatial Randomness	149
6.2.1	Visual Methods	150
6.2.2	Nearest Neighbor Methods	152
6.3	Examining First- and Second-Order Properties	157
6.3.1	Intensity	158
6.3.2	The K-function	161
6.4	Simulating Point Patterns	165

7 S+SPATIALSTATS and GIS	169
7.1 ARC/INFO Coverages and Spatial Data Analysis	169
7.1.1 ARC/INFO Coverage Types and Spatial Data Types	171
7.1.2 Spatial Referencing of Data in S+SPATIALSTATS	171
7.2 Example: Analysis of a Point Coverage	172
7.2.1 Rainfall Coverage	172
7.2.2 Importing Rainfall Data into S-PLUS	173
7.2.3 Exploratory Data Analysis	175
7.2.4 Spatial Modeling	178
7.2.5 Exporting Analysis Results to ARC/INFO	184
7.3 Example: Analysis of a Polygon Coverage	185
7.3.1 LA Coverage	185
7.3.2 Importing LA Data into S-PLUS	185
7.3.3 Removing Excess ARC/INFO Information	188
7.3.4 Exploratory Data Analysis	189
7.3.5 Spatial Linear Model	194
7.3.6 Model Selection	196
7.3.7 Exporting Analysis Results to ARC/INFO	197
7.4 Example: Analysis of a Grid	198
7.4.1 Budworm Grid	198

Appendices

A Installing S+SPATIALSTATS	202
A.1 Installing S+SPATIALSTATS in UNIX	202
A.1.1 Requirements	202
A.1.2 Installation Procedure	203
A.1.3 Verifying Installation	204
A.1.4 Updating Your S+SPATIALSTATS License	205
A.2 Installing S+SPATIALSTATS in Windows	205
B S+SPATIALSTATS Index by Category	208

C Sample Data Sets	215
D Function Reference	222
Glossary	314
Bibliography	317
Index	321
