

Condition Monitoring of Electrical Machines

Peter J. Tavner

*Chief Electrical Engineer
Laurence, Scott and Electromotors Ltd.
Norwich, UK*

and

James Penman

*Reader in Electrical Engineering
University of Aberdeen, UK*

RESEARCH STUDIES PRESS LTD.

Letchworth, Hertfordshire, England

JOHN WILEY & SONS INC.

New York · Chichester · Toronto · Brisbane · Singapore

Contents

<u>CHAPTER ONE</u>		<u>THE CASE FOR MONITORING</u>	
1.1	Introduction		1
1.2	The need for monitoring		5
1.3	What, and when to monitor		11
1.4	Scope of the text		15
 <u>CHAPTER TWO</u>		 <u>THE CONSTRUCTION AND OPERATION OF ELECTRICAL MACHINES AND THE WAY THEY FAIL IN SERVICE</u>	
2.1	Introduction		17
2.2	The construction of electrical machines		21
2.3	The construction of different types of electrical machines		27
2.4	The relationship between machine speci- fication and failure mechanism		30
2.5	Failure mechanisms		38
2.6	Failures on real machines		38
2.7	Conclusion		49
 <u>CHAPTER THREE</u>		 <u>THE ELEMENTS OF A MONITORING SYSTEM</u>	
3.1	Functional description		55
3.2	The monitoring tasks		58
3.3	Transduction		58
3.4	Data acquisition and primary processing		79
3.5	The processing task		81
3.6	The diagnostic task		90

CHAPTER FOUR ELECTRICAL TECHNIQUES FOR MONITORING

4.1	Introduction	93
4.2	Generator and motor stator faults	94
4.3	Generator rotor faults	104
4.4	Motor rotor faults	124
4.5	Generator and motor faults - comprehensive electrical methods	132

CHAPTER FIVE CHEMICAL TECHNIQUES FOR MONITORING

5.1	Introduction	142
5.2	Insulation degradation	142
5.3	Factors which affect detection	145
5.4	Detecting insulation degradation	150
5.5	Lubrication oil and bearing degradation	167
5.6	Oil degradation detection	168
5.7	Wear debris detection	169

CHAPTER SIX VIBRATIONAL TECHNIQUES FOR MONITORING

6.1	Introduction	176
6.2	Stator core response	177
6.3	Stator end winding response	189
6.4	Rotor dynamics	190
6.5	Bearing response	198
6.6	Vibration monitoring	202

CHAPTER SEVEN TEMPERATURE MONITORING

7.1	Introduction	228
7.2	Local temperature measurement	229
7.3	Hot-spot measurement and thermal images	236
7.4	Bulk measurement	237
7.5	Conclusions	239

CHAPTER EIGHT THE APPLICATION OF MONITORING —
CASE STUDIES

8.1	General	240
8.2	Multiparameter monitoring	240
8.3	Monitoring large turbine generators	250
8.4	Monitoring large motors	257
	REFERENCES	265
	SUBJECT INDEX	279
	AUTHOR INDEX	285
