Condition Monitoring of Electrical Machines

Peter J. Tavner

Chief Electrical Engineer Laurence, Scott and Electromotors Ltd. Norwich, UK

and

James Penman

Reader in Electrical Engineering University of Aberdeen, UK

RESEARCH STUDIES PRESS LTD.

Letchworth, Hertfordshire, England

JOHN WILEY & SONS INC.

 $New\ York \cdot Chichester \cdot Toronto \cdot Brisbane \cdot Singapore$

Contents

CHAPTER ONE	THE CASE FOR MONITORING		
1.1 1.2 1.3 1.4	Introduction The need for monitoring What, and when to monitor Scope of the text		1 5 11
CHAPTER TWO	THE CONSTRUCTION AND OPERATION OF ELECTRICAL MACHINES AND THE WAY THEY FAIL IN SERVICE		
2.1 2.2 2.3 2.4 2.5 2.6 2.7	Introduction The construction of electrical machines The construction of different types of electrical machines The relationship between machine speci- fication and failure mechanism Failure mechanisms Failures on real machines Conclusion THE ELEMENTS OF A MONITORING SYSTEM		17 21 27 30 38 49
3.1 3.2 3.3 3.4 3.5	Functional description The monitoring tasks Transduction Data acquisition and primary processing The processing task The diagnostic task	:	55 58 58 79 81

CHAPTER FOUR	ELECTRICAL TECHNIQUES FOR MONITORING	
4.1 4.2 4.3 4.4 4.5	Introduction Generator and motor stator faults Generator rotor faults Motor rotor faults Generator and motor faults - comprehensive electrical methods	93 94 104 124
CHAPTER FIVE	CHEMICAL TECHNIQUES FOR MONITORING	
5.1 5.2 5.3 5.4 5.5 5.6 5.7	Introduction Insulation degradation Factors which affect detection Detecting insulation degradation Lubrication oil and bearing degradation Oil degradation detection Wear debris detection	142 142 145 150 167 168 169
CHAPTER SIX	VIBRATIONAL TECHNIQUES FOR MONITORING	
6.1 6.2 6.3 6.4 6.5	Introduction Stator core response Stator end winding response Rotor dynamics Bearing response Vibration monitoring	176 177 189 190 198 202
CHAPTER SEVEN	TEMPERATURE MONITORING	
7.1 7.2 7.3 7.4 7.5	Introduction Local temperature measurement Hot-spot measurement and thermal images Bulk measurement Conclusions	228 229 236 237 239

CHAPTER EIGHT	THE APPLICATION OF MONITORING — CASE STUDIES	
8.1 8.2 8.3 8.4	General Multiparameter monitoring Monitoring large turbine generators Monitoring large motors	240 240 250 257
	REFERENCES	265
•	SUBJECT INDEX	279
	ALITHOR INDEX	285
