

FORCE-FREE MAGNETIC FIELDS SOLUTIONS, TOPOLOGY AND APPLICATIONS

Gerald E Marsh

World Scientific

Singapore • New Jersey • London • Hong Kong

CONTENTS

Preface	v
Chapter 1. INTRODUCTION	1
1.1. Force-Free Magnetic Fields and Hydrodynamics	4
1.2. Relevance of Force-Free Magnetic Fields to Astrophysics and Solar Physics.....	6
Chapter 2. THE VIRIAL THEOREM	9
2.1 The Virial Theorem Applied to Magnetic Fields.....	10
2.1.1. Virial Condition in Terms of the Magnetic Field Vectors	11
2.1.2. Virial Condition in Terms of the Maxwell Stress Tensor	13
2.2 Practical Applications of the Virial Theorem.....	14
Chapter 3. SOLUTIONS TO THE FORCE-FREE FIELD EQUATIONS	17
3.1 Generation of Solutions to the Force-Free Field Equations from Solutions to the Wave Equation	21
3.1.1 The “Vector” Wave Equation.....	21
3.1.2 The “Scalar” Wave Equation	22
3.1.3 Wave Equation Solutions for Ballabh’s Generalization of the Force-Free Field Equations.....	24
3.2 Non-Constant α Solutions to the Force-Free Field Equations in Spherical and Cylindrical Coordinates	25
3.2.1 Flux Functions, Toroidal and Poloidal Fields.....	26
3.2.2 Spherically Symmetric Solutions	27
3.2.2.1 Separation of the Grad-Shafranov Equation in Terms of an Arbitrary Function	28
3.2.2.2 Solution of the Separated Grad-Shafranov Equation	29

3.2.3 Axially Symmetric Solutions.....	33
3.2.3.1 The Grad-Shafranov Equation for Axial Symmetry	34
3.2.3.2 A Hierarchical Set of Solutions for a Special Class of Fields.....	35
3.2.3.2.1 Solution for the Case where $\mathbf{H} = [0, H_\phi(r), H_z(r)]$	36
3.2.3.2.2 An Hierarchical Set of Solutions.....	38
3.3 Solutions in Toroidal Coordinates	41
3.3.1 Toroidal Coordinates.....	43
3.3.2 Non-Constant α Field Equations	45
3.3.3 Solution in Toroidal Coordinates for Constant α	46
Chapter 4. FIELD TOPOLOGY.....	57
4.1 Magnetic Surfaces.....	59
4.1.1. Topology of Non-Constant α Solutions	60
4.1.2. Topology of Constant α Solutions	62
4.2 Magnetic Field Helicity.....	64
4.2.1. Twist, Kink and Link Helicity.....	65
4.2.2. Helicity and Locality	68
4.2.3. The Classical and Asymptotic Hopf Invariant.....	70
4.2.3.1 The Classical Hopf Invariant.....	72
4.2.3.2. The Asymptotic Hopf Invariant.....	75
Chapter 5. MAGNETIC ENERGY IN MULTIPLY CONNECTED DOMAINS.....	83
5.1 Gauge Invariance.....	88
5.2 De Rham's Theorems and Homology	89
5.3 Physical Interpretation of the Magnetic Energy Boundary Term	93
5.3.1. Physical Examples.....	96
5.3.1.1. Ring Current in a Toroidal Domain	96
5.3.1.2. Application to Force-Free Fields	98
Chapter 6. APPLICATIONS.....	103
6.1 Solar Prominence Models.....	104
6.2 Type II Superconductors.....	108

Appendix 1. FORCE-FREE FIELDS AND ELECTROMAGNETIC WAVES	119
A1.1 Electromagnetic Fields with E Parallel to B	119
A1.2 The Propagation of Electromagnetic Waves in Optically Active Media	124
Appendix 2. PROOF OF THE JACOBI POLYNOMIAL IDENTITIES	129
Appendix 3. SEPARATION OF THE WAVE EQUATION, CYCLIDES, AND BOUNDARY CONDITIONS	133
A3.1 Separation of the Wave Equation	133
A3.2 Cyclides	143
A3.3 Boundary Conditions for the Helmholtz and Vector Wave Equation	151
INDEX	155
