

Yu. A. Kutoyants

**Statistical Inference for
Spatial Poisson Processes**

Springer

Contents

Preface	v
Introduction	1
1 Auxiliary Results	17
1.1 Poisson process	17
1.2 Estimation problems	31
2 First Properties of Estimators	45
2.1 Asymptotic of the maximum likelihood and Bayesian estimators	45
2.2 Minimum distance estimation	58
2.3 Special models of Poisson processes	77
3 Asymptotic Expansions	99
3.1 Expansion of the MLE	99
3.2 Expansion of the Bayes estimator	112
3.3 Expansion of the minimum distance estimator	123
3.4 Expansion of the distribution functions	129
4 Nonstandard Problems	143
4.1 Misspecified model	143
4.2 Nonidentifiable model	158
4.3 Optimal choice of observation windows	167
4.4 Optimal choice of intensity function	175
5 The Change-Point Problems	183
5.1 Phase and frequency estimation	183
5.2 Chess-field problem	206
5.3 Top-hat problem	218
6 Nonparametric Estimation	225
6.1 Intensity measure estimation	225
6.2 Intensity function estimation	236
Appendix	251
Remarks	261
Bibliography	265
Index	275
