

**GEOCHRONOLOGY
AND THERMOCHRONOLOGY
BY THE $^{40}\text{Ar}/^{39}\text{Ar}$ METHOD**

Second Edition

Ian McDougall

*The Australian National University,
Canberra*

T. Mark Harrison

*University of California,
Los Angeles*

New York Oxford

Oxford University Press

1999

Contents

- 1 Historical Introduction 3**
 - 1.1 General comments 3
 - 1.2 Historical outline 4
- 2 Basis of the $^{40}\text{Ar}/^{39}\text{Ar}$ Dating Method 9**
 - 2.1 Potassium–argon dating 9
 - 2.2 $^{40}\text{Ar}/^{39}\text{Ar}$ dating 12
 - 2.3 Potassium and its isotopes 14
 - 2.4 The ^{40}K decay scheme and constants 15
 - 2.5 Derivation of age equations 16
 - 2.6 Atmospheric argon 19
 - 2.7 Materials suitable for dating 20
 - 2.8 Range of applicability 39
- 3 Technical Aspects 44**
 - 3.1 Introduction 44
 - 3.2 Sample preparation 44
 - 3.3 Monitor minerals 45
 - 3.4 Nuclear reactions 50
 - 3.5 Nuclear reactors as a neutron source 51
 - 3.6 The $^{39}\text{K}(\text{n,p})^{39}\text{Ar}$ reaction 54
 - 3.7 Interfering nuclear reactions and correction factors 57
 - 3.8 Optimization of irradiation parameters 65
 - 3.9 Neutron flux gradients 70
 - 3.10 Self-shielding 74
 - 3.11 Temperature effects 74
 - 3.12 Lattice damage 74
 - 3.13 Decay factors 75
 - 3.14 Total sample activity 75
 - 3.15 Safety aspects 76
 - 3.16 Argon extraction systems 76
 - 3.17 Mass spectrometry 82
 - 3.18 Laser microprobes 93
- 4 $^{40}\text{Ar}/^{39}\text{Ar}$ Data Presentation and Interpretation 109**
 - 4.1 Introduction 109
 - 4.2 Simple behavior (closed system) 109
 - 4.3 Complex behavior (open system) 115
 - 4.4 Mixed phases 120
 - 4.5 Excess argon 123
 - 4.6 Nuclear recoil 130
 - 4.7 Grain size and distribution 131
 - 4.8 Phase changes in vacuum 132
 - 4.9 Resolution within the age spectrum 133
 - Appendix 4.A.1 Isochron analysis 134
- 5 Diffusion Theory and Measurements 137**
 - 5.1 Introduction 137
 - 5.2 The process of diffusion 137
 - 5.3 The phenomenological basis of diffusion theory 138
 - 5.4 Methods of solution for constant D 139
 - 5.5 Episodic ^{40}Ar loss 140
 - 5.6 Diffusion mechanisms 143
 - 5.7 Measurement of argon diffusion in silicates 145
 - Appendix 5.A.1 Derivation of the diffusion equation 159
 - Appendix 5.A.2 Separation-of-variables solution for a plane sheet 161
 - Appendix 5.A.3 Translation to spherical coordinates 163
 - Appendix 5.A.4 Sample diffusion calculation 164
- 6 $^{40}\text{Ar}/^{39}\text{Ar}$ Thermochronology 165**
 - 6.1 Introduction 165
 - 6.2 The closure temperature concept 165
 - 6.3 Models for complex argon diffusion behavior of silicates 173
 - 6.4 Evaluation of the multidiffusion domain and multipath models 180
 - 6.5 Nonmonotonic thermal histories 185
 - Appendix 6.A.1 Closure temperature for first-order loss 185
 - Appendix 6.A.2 Closure temperature for volume diffusion 187
 - Appendix 6.A.3 Closure profiles 188

Appendix 6.A.4 Calculation of $^{40}\text{Ar}/^{39}\text{Ar}$ age spectra 189

7 Applications and Case Histories 191

7.1 Overview 191

7.2 Stratigraphic geochronology 191

7.3 Thermal histories of the continental crust 198

7.4 Geochronology and paleomagnetism 218

7.5 Lunar geochronology 222
