Practical Color Measurement

A Primer for the Beginner
A Reminder for the Expert

ANNI BERGER-SCHUNN

Translated from the German by the Author with the assistance of

Contents

Preface vii

Introduction ix

1. Description of Perceived Colors with the Aid of Numbers 1

1.1. Light 3
1.2. Sample 13
1.3. Observer 19
1.4. Calculation of the Tristimulus Values 26

2. Calculation of Color Difference 35

3. Metamerism 57

4. Color Measurement Systems; Measurement of Fluorescent Samples and Whiteness 73

4.1. Spectrophotometers 74
4.1.1. Light Sources 75
4.1.2. Splitting the Light into Its Component Wavelengths 76
4.1.3. Measuring Geometry 77
4.1.4. Detectors 81
4.1.5. Calibration of Instruments 81
4.1.6. Accuracy of Instruments 84
4.2. Colorimeters (Three-Filter Color Measuring Instruments) 86
4.3. Influence of Instrument Variables on Accuracy of Color Difference Measurement 87
4.4. Measurement of Fluorescent Samples 91
4.4.1. Whiteness 97

5. Correlation between Reflectance (Transmittance) and Colorant Concentration, Examination of Color Strength, and Computer Color Matching 99

5.1. Lambert–Beer Law 109
5.2. Kubelka–Munk Equations 114
5.2.1. Color Strength, Residual Color Difference 118

5.3. Computer Color Matching 127
5.3.1. Determination of the Calibration Constants 130
5.3.2. Calculation of the First Formula (Initial Match) 133
5.3.3. Correction of the Formulas 143

6. Influence of the Sample on the Accuracy of Color Measurements 146

Appendix 160

Symbols and Terms 160
Formulas 163
