Contents

Foreword by Sir William Mitchell, FRS	ix
Contributing Authors	x
Abbreviations	xiii
1. BULK PROPERTIES OF NATURAL-ISOTOPE DIAMOND	1
1.1 Electronic band structure of diamond <i>A. Mainwood</i>	3
1.2 Optical constants of diamond <i>A. Mainwood</i>	9
1.3 Vibrational band structure of diamond <i>A.K. Ramdas</i>	13
1.4 Density, lattice constant and expansion coefficient of diamond <i>R. Berman</i>	23
1.5 Specific heat of diamond <i>R. Berman</i>	27
1.6 Equilibrium of diamond <i>R. Berman</i>	30
1.7 Thermal conductivity of natural-isotope diamond <i>J.W. Vandersande</i>	33
1.8 Cleavage, fracture and tensile strength of diamond <i>J.E. Field, FRS</i>	36
1.9 Hardness, plasticity and shear strength of diamond <i>J.E. Field, FRS</i>	52
2. SURFACE PROPERTIES OF DIAMOND	57
2.1 Structures of diamond surfaces <i>S. Evans</i>	59
2.2 Reactivity of diamond surfaces <i>S. Evans</i>	64
2.3 Graphitisation of diamond surfaces <i>S. Evans</i>	68
2.4 Friction of diamond surfaces <i>J.E. Field, FRS</i>	70
2.5 Wear and abrasion of diamond surfaces <i>J.E. Field, FRS</i>	73
2.6 Polishing diamond surfaces <i>J.E. Field, FRS</i>	76
2.7 Erosion of diamond surfaces <i>J.E. Field, FRS</i>	78
3. PROPERTIES OF NITROGEN IN DIAMOND	81
3.1 The 'type' terminology for diamond <i>G.S. Woods</i>	83
3.2 Isolated substitutional nitrogen in diamond <i>M.H. Nazaré</i>	85
3.3 The A aggregate of nitrogen in diamond <i>G.S. Woods</i>	88
3.4 The B aggregate of nitrogen in diamond <i>G.S. Woods</i>	90
3.5 Other nitrogen aggregates in diamond <i>G.S. Woods</i>	92
3.6 Planar defects observed in nitrogen-rich diamond <i>G.S. Woods</i>	94
3.7 Voidites in diamond <i>G.S. Woods</i>	97
3.8 Interconversion between the various forms of nitrogen in diamond <i>G.S. Woods</i>	98
3.9 Assaying of nitrogen in diamond <i>G.S. Woods</i>	101
3.10 Effect of nitrogen on the thermal conductivity of diamond <i>J.W. Vandersande</i>	103
3.11 Lattice parameter determinations in diamond: an overview <i>A.R. Lang, FRS</i>	106
3.12 Effect of nitrogen on the lattice parameter of diamond <i>A.R. Lang, FRS</i>	111
3.13 Topographical studies of nitrogen in diamond <i>A.R. Lang, FRS</i>	116
3.14 Effects of ¹⁵ N isotope in diamond <i>G. Davies</i>	121

4.	NICKEL, SILICON, HYDROGEN AND OXYGEN IN DIAMOND	127
4.1	Optical and paramagnetic resonance properties of nickel in diamond <i>M.H. Nazaré</i>	129
4.2	Optical properties of silicon in diamond <i>G. Davies</i>	133
4.3	Hydrogen in diamond <i>G. Davies</i>	135
4.4	Oxygen in diamond <i>G. Davies</i>	139
5.	RADIATION DAMAGE IN DIAMOND	141
5.1	Rate of production of radiation damage in diamond (especially by electrons in the MeV range) <i>D.W. Palmer</i>	143
5.2	Electron paramagnetic resonance of radiation damage centres in diamond <i>M.E. Newton</i>	153
5.3	Optical properties of vacancies in diamond <i>G. Davies and N.B. Manson</i>	159
5.4	Electron paramagnetic resonance of radiation damage centres in annealed diamond <i>M.E. Newton</i>	166
5.5	Optical properties of vacancy-nitrogen aggregates in diamond <i>G. Davies and N.B. Manson</i>	173
5.6	Optical hole burning in transitions at radiation damage centres in diamond <i>Changjiang Wei and N.B. Manson</i>	177
5.7	Positron annihilation in diamond <i>S. Dannefaer</i>	180
5.8	Effects of radiation damage on the thermal conductivity of diamond <i>J.W. Vandersande</i>	182
5.9	The self-interstitial in diamond <i>G. Davies</i>	185
6.	ION IMPLANTATION AND DIFFUSION IN DIAMOND	189
6.1	Ion implantation in diamond: general remarks <i>R. Kalish</i>	191
6.2	Displacement energy of atoms in diamond <i>R. Kalish</i>	193
6.3	Volume expansion of diamond during ion implantation <i>R. Kalish</i>	194
6.4	Implantation-induced damage and its annealing in diamond <i>R. Kalish</i>	196
6.5	Identification of the impurity site in ion-implanted diamond <i>R. Kalish</i>	202
6.6	p- and n-type doping of diamond by ion implantation <i>R. Kalish</i>	205
6.7	Electronic devices by ion implantation of diamond <i>R. Kalish</i>	209
6.8	Synthesis of diamond by implantation <i>R. Kalish</i>	211
6.9	Applications of ion implantation of diamond <i>R. Kalish</i>	213
6.10	Diffusion in diamond <i>R. Kalish</i>	215
7.	DECAY TIMES OF LUMINESCENCE AND LASER ACTION IN DIAMOND	221
7.1	Overview of luminescence decay processes in diamond <i>G. Davies</i>	223
7.2	Tabulation of luminescence decay times in diamond <i>E. Pereira</i>	228
7.3	Energy transfer processes in diamond <i>E. Pereira</i>	233
7.4	Diamond lasers <i>S.C. Rand</i>	235

8.	CARBON ISOTOPE EFFECTS IN DIAMOND	241
8.1	Lattice spacing in ^{13}C diamond <i>G. Davies</i>	243
8.2	Optical absorption and luminescence in ^{13}C diamond <i>G. Davies</i>	248
8.3	Phonon properties in ^{13}C diamond <i>A.K. Ramdas</i>	255
8.4	Thermal conductivity of isotopically pure diamond <i>J.W. Vandersande</i>	258
9.	DONORS, ACCEPTORS AND ELECTRICAL CONDUCTIVITY IN DIAMOND	261
9.1	Overview of electrical conductivity in diamond <i>A.T. Collins</i>	263
9.2	Optical absorption and photoconductivity of boron in diamond <i>A.T. Collins</i>	265
9.3	p-type conductivity in diamond <i>A.T. Collins</i>	273
9.4	Impurity conduction and hopping conduction in synthetic diamond <i>A.T. Collins</i>	277
9.5	Boron doped CVD diamond <i>A.T. Collins</i>	280
9.6	n-type conduction and electron mobility in diamond <i>A.T. Collins</i>	284
9.7	Breakdown field and saturated carrier velocity in diamond <i>A.T. Collins</i>	288
10.	TECHNOLOGY OF DIAMOND SURFACES	289
10.1	Technology of diamond surfaces: general remarks <i>W.J.P. van Enckevort and H.J. van Halewijn</i>	291
10.2	Shaping of diamond <i>W.J.P. van Enckevort and H.J. van Halewijn</i>	293
10.3	Etching of diamond <i>W.J.P. van Enckevort</i>	301
10.4	Bonding of diamond <i>W.J.P. van Enckevort</i>	309
10.5	Electrical contacts to diamond <i>W.J.P. van Enckevort</i>	316
11.	METASTABLE GROWTH OF DIAMOND	323
11.1	Principles of hot-filament assisted deposition of diamond <i>R. Gat and J.C. Angus</i>	325
11.2	Techniques of hot-filament assisted deposition of diamond <i>R. Haubner and B. Lux</i>	336
11.3	Plasma CVD techniques for low pressure synthesis of diamond: an overview <i>P.K. Bachmann</i>	349
11.4	Plasma CVD synthesis of diamond <i>P.K. Bachmann</i>	354
11.5	General aspects of CVD growth of diamond and their correlation <i>P.K. Bachmann</i>	364
11.6	Flame characteristics for combustion growth of diamond <i>P.W. Morrison Jr and J.T. Glass</i>	368
11.7	The physics and chemistry of flames used for combustion growth of diamond <i>P.W. Morrison Jr and J.T. Glass</i>	376
11.8	Nucleation and film characteristics of combustion-grown diamond <i>P.W. Morrison Jr and J.T. Glass</i>	380
11.9	Applications of flame-grown diamond films <i>P.W. Morrison Jr and J.T. Glass</i>	391
11.10	Laser-assisted growth of diamond <i>P.W. Morrison Jr and J.T. Glass</i>	392
11.11	Thermal conductivity of thin film diamond <i>J.W. Vandersande</i>	399

12.	HIGH TEMPERATURE, HIGH PRESSURE SYNTHESIS OF DIAMOND	401
12.1	Methods of synthesising diamond under high temperature, high pressure conditions <i>H. Kanda and T. Sekine</i>	403
12.2	The phase diagram of carbon <i>H. Kanda and T. Sekine</i>	404
12.3	Direct conversion to diamond <i>H. Kanda and T. Sekine</i>	405
12.4	Catalytic conversion to diamond <i>H. Kanda and T. Sekine</i>	409
12.5	Characteristics of diamonds grown with metal catalysts <i>H. Kanda and T. Sekine</i>	415
	SUBJECT INDEX	427
