Dedication v

Preface xi

Chapter 1	Molecular Orbital Methods.....	1
1.1	Hartree-Fock-Roothaan LCAO-SCF-MO-Method (S. Sakaki)	1
1.2	Restricted and Unrestricted Hartree-Fock MO Methods for Open-shell Molecules (S. Sakaki)	7
1.3	Brief Explanation of Various Semi-empirical MO Methods (S. Sakaki)	11
1.4	<i>Ab Initio</i> MO Method and Gaussian Type Atomic Orbital Functions (S. Sakaki)	18
1.4.1	Minimal CGTO Basis Set	19
1.4.2	Split Valence Type CGTO Basis Set	21
1.4.3	Double-Zeta (DZ) CGTO	22
1.4.4	Polarization Function	22
1.4.5	Extended Basis Set	23
1.4.6	Basis Sets for Anionic Atoms	23
1.4.7	Basis Set for Transition Metal Elements	25
1.4.8	Effective Core Potential (ECP)	25
1.5	Basis Set Superposition Error (BSSE) (S. Sakaki)	27
1.6	Orbital Energies, Koopmans' Theorem, and Walsh Diagram (S. Sakaki)	30
1.7	Population Analysis and Bond Index (S. Sakaki)	35
1.8	Frontier Orbital Theory (S. Sakaki)	37
1.9	Energy Decomposition Analysis (EDA) (S. Sakaki)	44
1.10	Electron Correlation Effects (S. Sakaki)	48
1.11	Density Functional Method (H. Kobayashi)	58
	References	62

Chapter 2	Quantum Chemical Aspects of Metal Complexes (S. Sakaki).....	69
2.1	Geometry and Electronic Structure of Metal Complexes	69
2.1.1	Six-coordinate Transition Metal Complexes	69
2.1.2	Four-coordinate Transition Metal Complexes	76
2.1.3	Three-coordinate Transition Metal Complexes	83
2.1.4	Five-coordinate Metal Complexes	93
2.2	Coordinate Bonds of Transition Metal Complexes	98
2.2.1	General Survey of Coordinate Bonds	98
2.2.2	Coordinate Bonds of Ethylene, Acetylene and Similar Small Molecules	99
2.2.3	Coordinate Bonds of CO, N <sub>2</sub> , and Similar Ligands	109
2.2.4	Coordinate Bonds of CO <sub>2</sub> and Heterocumulenes (CS <sub>2</sub> , CSO, etc.)	118
2.2.5	Agostic Interaction	125
	References	136
Chapter 3	Catalysis by Metal Complexes (S. Sakaki).....	139
3.1	Elementary Steps in Catalytic Cycles	139
3.1.1	Nucleophilic Attack to Coordinate Ligands	139
3.1.2	Electrophilic Attack to Coordinate Ligands	151
3.1.3	Olefin Insertion Reaction into the Metal-hydride or Metal-alkyl Bond	156
3.1.4	Carbonyl Insertion into the M-R and M-H Bonds	168
3.1.5	Insertion of the Polarized Double Bond into M-H and M-R Bonds	180
3.1.6	Oxidative Addition and Reductive Elimination	187
3.1.7	Metathesis	197
3.2	Quantum Chemical Understanding of Catalytic Cycles	203
	References	208
Chapter 4	Catalysis by Metals (H. Kobayashi).....	213
4.1	Heterogeneous Catalysts and the Concept of Surface Complex	213
4.2	Hydrogen Molecule	215
4.3	Methane and Ethane	224
4.4	Ethylene and Acetylene	226
4.5	Carbon Oxide	229
4.6	Nitrogen Molecule — Comparison with CO —	232
4.7	Ammonia	233
4.8	Oxygen Molecule	234
4.9	Reaction of Oxygen and Ethylene on Silver Surface	235

4.10 Appendix: Crystal Orbital Method and Two-dimensional Band Structure Calculation	236
References	239
<b>Chapter 5 Catalysis by Metal Oxides (S. Yoshida)</b>	<b>241</b>
5.1 General Bonding Nature of Metal Oxides	241
5.2 Electronic Structures of Vanadium- and Molybdenum-based Oxides	243
5.2.1 Vanadium Oxide	243
5.2.2 Nickel and Copper Oxides	246
5.2.3 Molybdenum Oxide	248
5.2.4 Bismuth Molybdate	251
5.2.5 Vanadium Phosphorous Oxide	251
5.2.6 Heteropoly Acids	253
5.3 Bonding Nature of SiO <sub>2</sub> and Local Structure of ZSM-5	255
5.4 Active Sites of Solid Acids and Bases	258
5.4.1 Alumina	258
5.4.2 Silica-Alumina	264
5.4.3 Alkaline Earth Metal Oxides	268
5.5 Effects of Additives and Support	269
5.5.1 Vanadium Oxide on Silica	270
5.5.2 SMSI Phenomenon	274
References	276
Subject Index	279
Compounds Index	282
