Contents

Preface xi
Acknowledgments xiii

Chapter 1. What Is a Local Area Network? 1

Key Terms and Components 1
LAN Communications Concepts 3
Relationship to the OSI Model 5
The Need LANs Fulfill 12
Client-Server Computing 13
Why and When LANs Make Sense 19

Chapter 2. LANs in the Workplace 21

The Establishment of Workgroups 21
Empowering Creativity 21
Strategic Business Planning 29
Strategic Information Planning 30
The Information Inventory 31
Competitive Advantages 35

Chapter 3. LAN Applications 37

Sharing Resources 37
Connectivity through LAN Networking 48
The All-Important Applications 51

Chapter 4. LAN Topologies and Media 55

Key Terms 55
LAN Media 56
LAN Electrical Signals 64
LAN Topologies (Layouts) 69
Selecting a Topology 72

Media Ground Rules 78
LAN Hubs 90
NICs 100
LANs Make Strange Bedfellows 110
Comparing Ethernet and Token Ring 110

Chapter 5. LAN Servers 113

Serving Our Needs 113
Server Performance 115
Processing Power 121
Superservers 123
Special-Purpose Servers 125
Server Fault Tolerance 142
Maintaining Your Server 153
Representative Products Vendors 163

Chapter 6. The Ethernet (IEEE 802.3) Access Method 163

What Is an Access Method? 163
Standards Development Group 167
MAC Standards 169
Ethernet Performance 173
Ethernet and IEEE 802.3 Enhancements 183
Conclusion 188

Chapter 7. The Token Ring (IEEE 802.5) Access Method 189

Token Ring Performance 190
Token Ring Bit by Byte 200
Where Token Ring Is Headed 215
Choices in Token Ring Implementation 216

Chapter 8. The Fiber-Distributed Data Interface 219

Basics of Fiber Optics 222
Single-Mode and Multimode Fiber Optics 223
The Technology 225
Inherent Reliability 236
FDDI-II 239
Comparison with 100-Mbit/sec Ethernet 239
Related Fiber Standards 240
Applications 240

Chapter 9. Logical Link Control 243

What Is It? 243
What LLC Does 243
Summary 251

Chapter 10. LAN Protocols 253

What Protocols Do 253
Where Do They Fit? 254
LAN Protocols 258

Chapter 11. LAN Internetworking 283

Core Concepts 283
Internetworking Devices 283
Routing Algorithms 300
Internetwork Links for LANs 303

Chapter 12. Network Operating Systems 319

What a Network Operating System Does 319
Selection Criteria 320
Novell's NetWare 331
Banyan's VINES 342
IBM's LAN Server 349
Microsoft's LAN Manager 351
DEC's Pathworks 354
The Big Picture 355
Peer-to-Peer LANs 356
Vendors 365

Chapter 13. Determining Your LAN Requirements 367

Assessing User Needs 367
Specifications and Attaining Them 370
LAN Costs Assessment 373
The Installation Process 374
Transition Issues 377
Support Services 379
LAN Expansion Strategies 379
Vendors 382

Chapter 14. LAN Management 383

An Overview of LAN Management 383
Fault Management 384
Configuration Management 392
Performance Management 396
Security Management 397
Accounting Management 410
The Importance of Usage Statistics 411
Licensing and Software Issues 411
The LAN Administrator 413

Chapter 15. Coming Attractions 415

Advances in LAN Technology 415
Microsoft Windows NT Advanced Server 416
Expert Systems 416
Multimedia 418
Document Imaging 418
Object-Oriented Systems 419
Distributed Computing and Cooperative Processing 419
Increased User Expectations from (Management) Information Systems 420
Information: The Lifeblood of an Organization 420

Glossary 423

Index 427
