<b>Preface</b>	<b>xi</b>
<b>Glossary of Symbols and Abbreviations</b>	<b>xv</b>
Italic letters	xv
Roman letters	xviii
Greek letters	xix
Subscripts	xx
Superscripts	xxi
Functions, operators, etc.	xxi
<b>1 The Conduction of Electricity</b>	<b>1</b>
1:1 Electric charge and electric current	1
1:2 Electrical potential and electric field	3
1:3 Ohm's law	4
1:4 Classes of conductors	7
1:5 Mobilities	10
1:6 Contact potential differences	15
1:7 Capacitance	17
1:8 Laplace transformation	21
1:9 Summary	24
Problems	25
<b>2 Ionic Solutions</b>	<b>29</b>
2:1 Electroneutrality	29
2:2 Ionic strength	32
2:3 Activities	35
2:4 Solutions of extremely low ionic strength	40
2:5 Solutions of moderate ionic strength	40

2:6	Solutions of high ionic strength	45
2:7	Equilibria in ionic solutions	46
2:8	Electrochemical activities	50
2:9	Transfer equilibria	54
✓ 2:10	Adsorption	56
2:11	Summary	57
	Problems	58
<b>3</b>	<b>Electrochemical Cells</b>	<b>63</b>
3:1	Cell voltages and currents	63
3:2	Thermodynamics of equilibrium cells	69
3:3	Cells with junctions	77
3:4	Utility of equilibrium cells	85
3:5	Electrochemical power sources	88
3:6	Electrosynthesis	93
3:7	Electrochemistry in the metals industry	96
3:8	Corrosion cells	102
3:9	Summary	105
	Problems	106
<b>4</b>	<b>Electrodes</b>	<b>113</b>
4:1	Electrode potentials	113
4:2	Reference electrodes	115
4:3	Standard electrode potentials	117
4:4	Versions of the Nernst equation	120
4:5	Pourbaix diagrams	126
4:6	Working electrodes	130
4:7	Mercury as a working electrode	132
4:8	Ion-selective electrodes	134
4:9	Summary	140
	Problems	141
<b>5</b>	<b>Electrode Reactions</b>	<b>149</b>
5:1	Electrochemical equations	149
5:2	Types of electrode reaction	151
5:3	Faraday's laws	154
5:4	Feasibility of electrode reactions	157
5:5	The totally polarized electrode	159
5:6	Electrode reaction mechanisms	163

5:7	Kinetics of electron transfer	167
5:8	The Butler-Volmer equation	174
5:9	Kinetics of complex electrode reactions	175
5:10	Summary	181
	Problems	182
<b>6</b>	<b>Polarization</b>	<b>187</b>
6:1	Sign conventions	187
6:2	Non-equilibrium cell voltages	189
6:3	Ohmic polarization	190
6:4	Activation polarization	193
6:5	Mixed potentials	197
6:6	Concentration polarization	200
6:7	Changes with time	203
6:8	Absence of product	207
6:9	The third electrode	209
6:10	Summary	212
	Problems	213
✓ 7	<b>Transport</b>	<b>219</b>
7:1	Flux density	220
7:2	Transport mechanisms	223
7:3	Laws of migration	224
7:4	Electrophoresis	229
7:5	Laws of diffusion	231
7:6	Partial solution of Fick's laws	235
7:7	The Nernst-Einstein law	239
7:8	Transport by diffusion plus migration	243
7:9	Laws of convection	244
7:10	Transport to a rotating disk	247
7:11	Transport to the dropping mercury electrode	250
7:12	Flux densities at an electrode	253
7:13	Summary	256
	Problems	256
<b>8</b>	<b>Steady-State Voltammetry</b>	<b>263</b>
8:1	Voltammetry in general	263
8:2	The steady state	266
8:3	Thin-layer cells	269

8:4	Membrane permeation cells	274
8:5	Microelectrodes	275
8:6	Limiting currents	282
8:7	Reversibility	288
8:8	Voltammetry at a rotating disk electrode	295
8:9	Steady-state multi-step reactions	298
8:10	Summary	302
	Problems	303
<b>9</b>	<b>The Electrode Interface</b>	<b>309</b>
✓ 9:1	The electrical double layer	309
9:2	The Gouy-Chapman model	312
✓ 9:3	Electrokinetic phenomena	322
9:4	Electrode capacitance	328
9:5	The Frumkin effects	336
9:6	Adsorption at electrodes	338
9:7	Electrodeposition	344
9:8	Summary	351
	Problems	352
<b>10</b>	<b>Electrochemistry With Periodic Signals</b>	<b>357</b>
10:1	Alternating electricity	357
10:2	Impedance	359
10:3	A.c. properties of a totally polarized cell	364
10:4	Faradaic impedance	367
10:5	Equivalent circuits	373
10:6	Faradaic rectification and harmonics	379
10:7	A.c. voltammetry	384
10:8	Non-sinusoidal periodic signals	387
10:9	Summary	389
	Problems	390
<b>11</b>	<b>Transient Voltammetry</b>	<b>395</b>
11:1	Classification of methods	395
11:2	Some general considerations	397
11:3	Chronopotentiometry	402
11:4	Potential-step voltammetry	409
11:5	Pulse voltammetry	415
11:6	Voltammetry with ramped potential	421

11:7	Digital simulation	427
11:8	Voltammetry at spherical electrodes	431
11:9	Polarography	435
11:10	Summary	444
	Problems	446
<b>Bibliography of Reviews</b>		<b>453</b>
<b>Appendix</b>		<b>455</b>
	Physical constants and standards	455
	Molar masses and densities of selected elements	456
	Properties of pure water at the standard temperature	458
<b>Index</b>		<b>459</b>
