Diamond: Electronic Properties and Applications

Table of Contents

1. Electronic and Vibrational Properties of Bulk Diamond	C. Y. Fong, B. M. Klein
1.1 Introduction	1
1.1.1 General Discussion of Solids Formed by Group IV Elements	1
1.1.2 Crystal Structure and Symmetries	2
1.2 Electronic Band Structure of Diamond	4
1.2.1 Methods of Calculating the Electronic Band Structure of Diamond	4
1.2.2 Comparison of Band Structures of Diamond with Other Valence IV Solids	7
1.2.3 Relation Between the Bonding Properties and the Band Structure of Diamond	9
1.3 Electronic Properties Derived from the Band Structure of Diamond	10
1.3.1 Effective Masses of Holes and Conduction Electrons at the Band Edge	10
1.3.2 Density of States	12
1.3.3 Optical Properties	15
1.3.4 Transport Properties	15
1.4 Vibrational Properties of Diamond	16
1.4.1 Methods for Calculating the Phonon Spectrum of Diamond	17
1.4.2 Phonon Dispersion of Diamond	19
1.4.3 Phonon Density of States	21
1.5 Summary	23
Acknowledgment	23
References	23
2. Diamond Surface	B. Pate
2.1 Introduction	31
2.1.1 Surface Sensitivity	32
2.2 The Clean Surfaces: C(100), C(110), C(111)	33
2.2.1 Clean Diamond C(111)	34
2.2.2 Clean Diamond C(100)	35
2.2.3 Clean Diamond C(110)	35
2.2.4 Diamond-Graphite Conversion	36
2.3 Impurity Stabilized Surfaces	37
2.3.1 Hydrogen Termination of Diamond	37
2.3.2 Oxygen Termination of Diamond	38
2.3.3 C(111) 1 x 1 Stabilization by Sparse Chemisorption	39

2.4	Substrate Preparation and Surface Treatments	40
2.4.1	The Cleaved Surface	40
2.4.2	Oil-Polished Diamond	41
2.4.3	Wet Chemistry	42
2.4.4	Plasma Treatments	42
2.4.5	As-Grown Diamond Surfaces	43
2.4.6	Electrochemical Polishing: The Marchywka Effect	43
2.5	Surface/Interface Relevance to Electronic Devices	44
2.5.1	Schottky Barriers	44
2.6	Negative Electron Affinity (NEA) Properties	45
2.6.1	Definitions and Background	45
2.6.2	Determination of NEA	46
2.6.3	Surface Chemistry: Considerations for NEA Activation	48
2.6.4	Photoexcitation and Photoelectron Emission from NEA Diamond	48
2.6.5	Metal and Metal Oxide NEA Coatings	51
2.7	Summary and Future Outlook	52
	Acknowledgments	52
	References	53
3.	Growth of CVD Diamond for Electronic Applications	L. S. Plano
3.1	Introduction	62
3.2	Nucleation and Growth Processes	64
3.2.1	The Roles of Atomic Hydrogen	64
3.2.2	Diamond Nucleation	65
3.2.3	Diamond Growth	66
3.3	Diamond Reactor Technology	68
3.3.1	Characterization of Diamond Films	70
3.3.2	Hot Filament Activation	73
3.3.3	Plasma Activation	78
3.3.4	Electron Cyclotron Resonance	80
3.3.5	Plasma Torch Activation	81
3.3.6	Combustion Activation	84
3.3.7	Novel Methods of Diamond Film Growth	87
3.3.8	Summary	90
3.4	Gas Phase Chemistry	92
3.4.1	Hydrogen, Oxygen, Halogens, and Inert Gases	92
3.4.2	Boron and Other Impurities	98
3.4.3	Summary	99
3.5	Growth of Electronic Quality Diamond	100
3.5.1	Homoepitaxy	100
3.5.1.1	Growth and Defects	102
3.5.1.2	Large Area Homoepitaxy	102
3.5.2	Polycrystalline Diamond Films	104

3.5.2.1	Methods of Nucleation Enhancement	104
3.5.2.2	Textured Diamond Films	107
3.5.2.3	Highly Oriented Diamond Films	110
3.5.3	Heteroepitaxy of Diamond	113
3.5.3.1	Substrate Materials for Heteroepitaxy	113
3.5.3.2	Diamond Heteroepitaxy	115
3.5.4	Summary	116
3.6	Summary	117
	References	117
4.	Doped Diamond	K. Okano
4.1	Introduction	139
4.2	Natural Diamonds	140
4.2.1	Boron-Doped Diamonds	140
4.2.2	Nitrogen-Doped Diamonds	146
4.3	HP/HT Synthesis	148
4.4	Ion Implantation	153
4.5	CVD Films	156
4.6	Theoretical Calculation	163
4.7	Summary	168
	References	169
5.	Defects in Diamond	W. Zhu
5.1	Introduction	175
5.2	Twins, Stacking Faults and Dislocations	176
5.2.1	Structural Analysis	176
5.2.2	Review of Characterization Techniques	181
5.2.3	Twins, Stacking Faults and Dislocations in CVD Diamond	183
5.3	Point Defects	192
5.3.1	Structural and Chemical Analysis	192
5.3.2	Review of Characterization Techniques	194
5.3.3	Impurities and Vacancies in Diamond	199
5.3.3.1	Impurities	199
5.3.3.2	Vacancies	204
5.3.3.3	Dopants in Diamond	205
5.3.3.4	Radiation Generated Point Defects	206
5.4	Non-Diamond Carbon Phases	207
5.4.1	Structural Analysis	207
5.4.2	Review of Characterization Techniques	208
5.4.3	Non-Diamond Carbon Phases in CVD Diamond	214
5.5	Other Defects	217
5.5.1	Grain Boundaries	218

7.6 Results for CVD Diamond	302
7.7 Summary	309
References	310
8. Electrical Contacts to Diamond	T. Tachibana, J. Glass
8.1 Introduction	319
8.2 Fabrication of Ohmic Contacts	321
8.3 Fabrication of Schottky Contacts	325
8.4 Mechanisms of Ohmic vs. Schottky Contacts Formation on Diamond	332
8.4.1 Surface Preparation of Diamond	332
8.4.2 Chemical Reactions at Metal-Diamond Interfaces	335
8.5 Summary	341
Acknowledgments	342
References	342
9. Electronic Device Processing	M. A. Plano
9.1 Introduction	349
9.2 Device Design and Substrates	350
9.3 Growth and Doping	351
9.4 Surface Preparation	352
9.4.1 Thinning and Smoothing	352
9.4.2 Annealing Effects	354
9.4.3 Removal of Carbonaceous Surface Layers	356
9.5 Contact Formation	356
9.5.1 Ohmic Contacts	357
9.5.2 Schottky Contacts	357
9.5.3 Buried Contacts	358
9.6 Dielectrics	359
9.6.1 Silicon Dioxide	359
9.6.2 Undoped Diamond	360
9.7 Selective Deposition	361
9.8 Isolation	364
9.8.1 Oxygen Based Dry Etching Techniques	364
9.8.2 Other Etching Techniques	365
9.9 Summary	365
References	366
10. Passive Diamond Electronic Devices	D. L. Dreifus
10.1 Introduction	371
10.2 Sensors and Microstructures	372
10.2.1 Resistors and Thermal Sensors	373

10.2.2	Diamond Microstructures	378
10.2.2.1	Cantilever Beams and Bridges	380
10.2.2.2	Scanning Tunneling Microscopy Tips	380
10.2.2.3	Flow Sensors	382
10.2.2.4	Piezoresistive-Based Sensors	384
10.2.2.5	Accelerometers	388
10.2.2.6	Other Microstructure Applications	389
10.2.3	Radiation Detectors	390
10.2.4	Other Sensors	397
10.3	Junction Devices	398
10.3.1	Heterojunctions	399
10.3.2	Negative Resistance Devices	400
10.3.3	IMPATTs and Avalanche Transit-Time Devices	402
10.3.4	Luminescent Devices	403
10.3.5	Electron Emitters	405
10.4	Photoconductive and Electron-Beam Controlled Switches	410
10.5	Surface Acoustic Wave Devices	413
10.6	Electrodes	418
10.7	Energy Conversion Devices	419
10.8	Traveling Wave Devices	420
10.9	Other Devices	421
10.10	Summary	422
	Acknowledgments	423
	References	423
11.	Active Diamond Electronic Devices	S. Grot
11.1	Introduction	443
11.2	Diamond Active Electronic Devices	447
11.2.1	Introduction	447
11.2.2	Bulk Diamond Devices	447
11.2.3	CVD Diamond Film Active Electronic Devices	450
11.2.4	Polycrystalline Diamond Film FETs	455
11.3	Summary	456
	References	457
