Ann Arbor, Michigan*

**ACADEMIC PRESS**

*A Division of Harcourt Brace & Company*

San Diego New York Boston London Sydney Tokyo Toronto

# Contents

*Preface*    *xiii*

## **CHAPTER 1**

### *Introduction*

From Electronics to Photonics	1
A Brief History	2
Future Outlook of Photonics	2
Organization of the Book	4
Laser Light Sources and Detectors	4
Nonlinear Optical Devices	5
Photonic Components and Other Applications	6
Summary	7
Bibliography	8

## **CHAPTER 2**

### *Photons and Interactions*

Introduction	9
Quantum Optics	9
Interaction of Photons with Atoms	13
Interaction of Light with Light	14

Nonlinear Optics	15
Second-Order Nonlinearity	17
Third-Order Nonlinearity	19
Nonlinear Crystals	21
Interaction of Light and Sound	23
Summary	29
References	29

### **CHAPTER 3**

#### *Recent Advances in Semiconductor Laser Technology*

Introduction	31
Review of Semiconductor Lasers	31
Advanced Lasers for Long-Haul Telecommunications	43
1.3- $\mu\text{m}$ -Wavelength Lasers	50
Quantum Wire and Quantum Box	50
Wavelength Tuning in Quantum-Well Lasers	51
Distributed Feedback and Distributed Bragg Reflection Lasers	51
Summary	55
References	55

### **CHAPTER 4**

#### *Fiber Lasers*

Introduction	59
Operating Principle of Fiber Lasers	60
Resonant Cavity for a Fiber Oscillator	64
Typical Fiber Lasers	66
Pump Source Requirements for End-Pumped Lasers	69
Mode Locking in Fiber Lasers	70
Mode-Locking Methods	72
High-Power Fibers Lasers	74
Diode Laser Pumping	74
Solid-State Lasers	75
Harmonic Generation	76
Tunable Lasers	77
Summary	77
References	78

**CHAPTER 5***Solid-State Lasers*

Introduction	80
Fundamental Concepts of Solid-State Lasers	80
The Host Crystals	82
Interactions between Doping and Host Ions	83
Solid-State Laser Combinations	86
Excitation of Solid-State Lasers	87
Excited-State Absorption	91
Typical Solid-State Diode Lasers	92
Tunable Lasers	93
Ultrafast Solid-State Lasers	100
Unstable Resonators	100
Summary	101
References	101

**CHAPTER 6***Other Laser Sources*

Introduction	103
Gaseous Discharge Lasers	104
Dye Lasers	109
Excimer Lasers	111
Free-Electron Lasers	115
X-Ray Lasers	119
Extreme-Ultraviolet Lasers	119
Commercial Non-Solid-State Lasers	120
Summary	124
References	125

**CHAPTER 7***Photonic Detection*

Introduction	127
Properties of Semiconductor Photodetectors	128
Noise Considerations	132
Noise in Receivers	135

Photodetectors	137
Comparison of Photodetectors	146
Extrinsic Semiconductors for Detection	149
Schottky Barrier Photodiodes	150
New Approaches for Photodetectors	151
Summary	154
References	155

## CHAPTER 8

### *Optical Amplifiers*

Introduction	157
Semiconductor Optical Amplifier	158
Parametric Optical Amplifiers	162
Should Use of the 1.3- $\mu\text{m}$ Window Be Resumed?	173
Summary	174
References	176

## CHAPTER 9

### *Solitons in Optical Fiber Telecommunications*

Introduction	178
Discussion of Soliton Results	181
Some Physical Interpretations of Solitons	183
The Spatial Soliton	186
Examples of Soliton Transmission Systems	189
Time/Polarization Multiplexing with Solitons	190
Recent Experiments on Soliton Transmission	194
Summary	194
References	195

## CHAPTER 10

### *Phase Conjugators*

Introduction	197
Phase Conjugation	198
Methods for Generating Phase Conjugation	201
Analogous Holographic Process	203
Classification of Phase Conjugation in Refractive Media in Four-Wave Mixing	203

Photorefractive Effect	205
Brillouin-Enhanced Four-Wave Mixing	208
Applications of Optical Phase Conjugation	209
Summary	215
References	215

## **CHAPTER 11**

### *Photonic Components*

Introduction	217
Photonic Components	217
Waveguide Couplers	228
Waveguide Directional Couplers	233
Waveguide Electrooptic Devices	234
Acoustooptic Devices	241
Magneto optic Effect	244
Polarization-Independent Fiberoptic Components	244
Summary	245
References	246

## **CHAPTER 12**

### *Photonic Switches*

Introduction	248
Limitations Inherent to Electronic Switches	249
Present Status of Photonic Switching	251
Switching Parameters	251
Types of Switches	252
Bistable Optical Switches	263
Other Optical Switch Schemes	268
Summary	270
References	271

## **CHAPTER 13**

### *Photonic Interconnections*

Introduction	273
Optical Interconnections	274
Classification of Optical Interconnections	274
Methods to Implement Optical Interconnections	276

Practical Implementation of Optical Interconnections	279
High-Level Electrooptic Integration	287
Photonics in Switching	290
Summary	293
References	294

## **CHAPTER 14**

### *Photonic Image Processing*

Introduction	295
A Simple Optical Imaging System	296
The Fourier Transform	299
Sensors	305
Acoustooptic Image Processors	309
Holographic Imaging	312
Digital Signal Processing	314
Other Optical Imaging Systems	317
Bimodal Imaging System	320
Summary	320
References	321
