Contents

Preface vii

Introduction 1

1 Probability tools 5
1.1 Moments . . . 5
1.2 L_p-spaces . . . 7
1.3 Tail estimates . . . 8
1.4 Conditional expectations . . . 10
1.5 Characteristic functions . . . 13
1.6 Symmetrization . . . 15
1.7 Uniform integrability . . . 16
1.8 The Mellin transform . . . 18
1.9 Problems . . . 19

2 Normal distributions 23
2.1 Univariate normal distributions . . . 23
2.2 Multivariate normal distributions . . . 24
2.3 Analytic characteristic functions . . . 31
2.4 Hermite expansions . . . 33
2.5 Cramer and Marcinkiewicz theorems . . . 34
2.6 Large deviations . . . 36
2.6.1 A numerical example . . . 38
2.7 Problems . . . 38

3 Equidistributed linear forms 39
3.1 Two-stability . . . 39
3.2 Measures on linear spaces . . . 40
3.3 Linear forms . . . 43
3.4 Exponential analogy . . . 46
3.5 Exponential distributions on lattices . . . 47
3.6 Problems . . . 49

4 Rotation invariant distributions 51
4.1 Spherically symmetric vectors . . . 51
4.2 Rotation invariant absolute moments . . . 57
4.2.1 Proof of Theorem 4.2.2 for $p = 1$ . . . 58

4.2.2 Proof of Theorem 4.2.2 in the general case . . . 61
4.2.3 Pairs of random variables . . . 63
4.3 Infinite spherically symmetric sequences . . . 65
4.4 Problems . . . 69

5 Independent linear forms **71**
5.1 Bernstein's theorem . . . 71
5.2 Gaussian distributions on groups . . . 72
5.3 Independence of linear forms . . . 75
5.4 Strongly Gaussian vectors . . . 78
5.5 Joint distributions . . . 79
5.6 Problems . . . 80

6 Stability and weak stability **81**
6.1 Coefficients of dependence . . . 81
6.1.1 Normal case . . . 83
6.2 Weak stability . . . 84
6.3 Stability . . . 86
6.4 Problems . . . 91

7 Conditional moments **93**
7.1 Finite sequences . . . 93
7.2 Extension of Theorem 7.1.2 . . . 95
7.3 Central Limit Theorem . . . 96
7.3.1 CLT for i. i. d. sums . . . 97
7.4 Empirical mean and variance . . . 98
7.5 Infinite sequences and conditional moments . . . 99
7.6 Problems . . . 106

8 Gaussian processes **109**
8.1 Construction of the Wiener process . . . 109
8.2 Levy's characterization theorem . . . 112
8.3 Arbitrary trajectories . . . 116
8.4 Second order conditional structure . . . 119

A Solutions of selected problems **123**
A.1 Solutions for Chapter 1 . . . 123
A.2 Solutions for Chapter 2 . . . 125
A.3 Solutions for Chapter 3 . . . 126
A.4 Solutions for Chapter 4 . . . 126
A.5 Solutions for Chapter 5 . . . 127
A.6 Solutions for Chapter 6 . . . 127
A.7 Solutions for Chapter 7 . . . 128

Bibliography **129**
