One-Dimensional Metals

Physics and Materials Science

Weinheim • New York • Basel • Cambridge • Tokyo

Contents

1	Introduction	1
1.1	Dimensionality	1
1.2	Approaching One-Dimensionality from Outside and from Inside	2
1.3	Dimensionality of Carbon-Solids	7
1.3.1	Three-Dimensional Carbon: Diamond	8
1.3.2	Two-Dimensional Carbon: Graphite	8
1.3.3	One-Dimensional Carbon: Cumulene, Polycarbyne, Polyene	9
1.3.4	Zero-Dimensional Carbon: Fullerene	11
1.4	Peculiarities of One-Dimensional Systems	12
	References	17
2	One-Dimensional Substances	19
2.1	A15 Compounds	22
2.2	Kroghmann Salts	27
2.3	Alchemists' Gold	29
2.4	Bechgaard Salts and Other Charge Transfer Compounds	31
2.5	Polysulfurnitride 35	
2.6	Phthalocyanines and Other Macrocycles	36
2.7	Transition Metal Chalcogenides and Halides	38
2.8	Conducting Polymers	40
2.9	Halogen-Bridged Mixed-Valence Transition Metal Complexes	43
2.10	Miscellaneous	45
2.10.1	Poly-deckers	45
2.10.2	Polycarbenes	45
2.10.3	Filled Pores	46
2.10.4	Nanotubes	46
2.10.5	Inorganic Semiconductor Quantum Wires	47
	References	48
3	One-Dimensional Solid State Physics	51
3.1	Crystal Lattice and Translation Symmetry	52
3.2	Reciprocal Lattice, Reciprocal Space	56
3.3	Electrons and Phonons in a Crystal, Dispersion Relations	60

X *Contents*

3.4	Nearly Free Electron Model, Energy Bands, Energy Gap, Density of States	65
	References	71
4	Electron-Phonon Coupling, Peierls Transition	72
	References and Notes	79
5	Conducting Polymers: Solitons and Polarons	80
5.1	General Remarks on Conducting Polymers	80
5.2	Conjugated Double Bonds	81
5.3	Conjugational Defects	85
5.4	Solitons	88
5.5	Generation of Solitons	97
5.6	Non-Degenerate Ground State Polymers: Polarons	100
5.7	Fractional Charges	103
5.8	Soliton Lifetime	105
	References	108
6	Conducting Polymers: Conductivity	111
6.1	General Remarks on Conductivity	111
6.2	Measuring Conductivities	116
6.3	Conductivity in One-Dimension: Localization	123
6.4	Conductivity and Solitons	126
6.5	Experimental Data	130
6.6	Hopping Conductivity	137
6.7	Conductivity of Highly Conducting Polymers	144
	References	146
7	Superconductivity	149
7.1	Basic Phenomena	149
7.2	Measuring Superconductivity	154
7.3	Applications of Superconductivity	156
7.4	Superconductivity and One-Dimensionality	157
7.5	Organic Superconductors	158
7.5.1	One-Dimensional Organic Superconductors	160
7.5.2	Two-Dimensional Organic Superconductors	163
7.5.3	Three-Dimensional Organic Superconductors	165
7.6	Future Prospects	167
	References	170
8	Charge Density Waves	173
8.1	Introduction	173

8.2	Coulomb Interaction, $4k_F$ Charge Density Waves, Spin Peierls Wave, Spin Density Waves	174
8.3	Phonon Dispersion Relation, Phase and Amplitude Mode in Charge Density Wave Excitations	178
8.4	Electronic Structure, Peierls–Fröhlich Mechanism of Superconductivity	179
8.5	Pinning, Commensurability, Solitons	180
8.6	Field Induced Spin Density Waves, Quantized Hall Effect	186
	References	188
9	Molecular Electronics	189
9.1	Miniaturisation	189
9.2	One-Dimensional and Organic Materials for Molecular Electronics	190
9.3	Early and Radical Concepts	191
9.3.1	Soliton Switching	191
9.3.2	Molecular Rectifiers	194
9.3.3	Molecular Shift Register	195
9.3.4	Molecular Cellular Automata	197
9.4	Molecular Materials for Electronics	199
9.5	Biocomputing	200
9.6	Selected Experiments	202
9.6.1	Switching Molecules	202
9.6.2	Rectifying Langmuir–Blodgett Layers	206
9.6.3	Holographic Storage and Holographic Computing	208
9.6.4	Organic Field Effect Transistors	209
9.6.5	Organic Light Emitting Devices	211
	References	212
10	Applications	215
10.1	Introduction	215
10.2	Superconductivity and High Conductivity	215
10.3	Electromagnetic Shielding	216
10.4	Field Smoothing in Cables	217
10.5	Capacitors	218
10.6	Through-Hole Electroplating	218
10.7	Loudspeakers	219
10.8	Antistatic Protective Bags	220
10.9	Other Electrostatic Dissipation Applications	221
10.10	Conducting Polymers for Welding of Plastics	223

XII *Contents*

10.11 Polymer Batteries	223
10.12 Electrochemical Polymer Actuators	225
10.13 Electrochromic Displays, "Smart Windows"	225
10.14 Electrochemical Sensors	226
10.15 Solar Cells	226
10.16 Gas Separating Membranes	227
10.17 Corrosion Protection	228
10.18 Field Effect Transistors	228
10.19 Light Emitting Devices	228
10.20 Outlook	230
References	230
Appendix	233
Subject Index	237
