

# Thin Films

## ORGANIC THIN FILMS AND SURFACES: DIRECTIONS FOR THE NINETIES

*Edited by*

Abraham Ulman

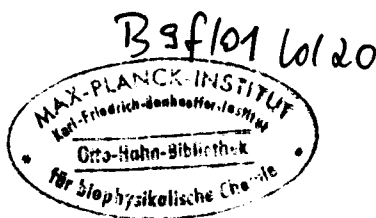

*Alstadt-Lord-Mark Professor  
Department of Chemistry and  
Polymer Research Institute  
Polytechnic University  
Brooklyn, New York*

*Volume 20*

ACADEMIC PRESS

San Diego New York Boston  
London Sydney Tokyo Toronto

## Contents

|                               |      |
|-------------------------------|------|
| <i>Preface</i> . . . . .      | xv   |
| <i>Contributors</i> . . . . . | xvii |

### *Introduction*

#### Supramolecular Assemblies: Vision and Strategy

*Hans Kuhn and Abraham Ulman*

|  |   |
|--|---|
| 1.1. Introduction . . . . .  | 1 |
| 1.2. Efforts to Achieve Well-Defined Organized<br>Molecular Assemblies . . . . . | 4 |
| 1.3. Perspective in Supramolecular Engineering . . . . .                         | 6 |
| References . . . . .   | 7 |

### *Advanced Materials*

#### Oriented Growth of Nanocrystalline Particulate Films at Monolayers: A Colloid Chemical Approach to Advanced Materials

*Janos H. Fendler*

|   |    |
|---|----|
| 2.1. Introduction . . . . .   | 11 |
| 2.2. Experimental Methodologies and Characterizations . . . . .                         | 12 |
| 2.3. Growth of Nanocrystalline Particulate Films . . . . .                              | 19 |
| 2.4. Size Quantization and Bandgap Engineering . . . . .                                | 21 |
| 2.5. Semiconductor Particulate Films . . . . .  | 23 |
| 2.6. Silver Particulate Films . . . . .   | 26 |
| 2.7. Organizational Imperative: Molecular Recognition and<br>Epitaxial Growth . . . . . | 29 |
| 2.8. Conclusions and Future Directions . . . . .  | 37 |
| Acknowledgments . . . . .   | 37 |
| References . . . . .  | 38 |

Third-Level Self-Assembly and Beyond: Polar Hybrid Superlattices via  
Postassembly Intercalation into Noncentrosymmetric Multilayer  
Matrices of Hydrogen Bonded Silanes

*Rivka Maoz, Ruth Yam, Garry Berkovic, and Jacob Sagiv*

|   |    |
|---|----|
| 3.1. Introduction . . . . .               | 41 |
| 3.2. The Multilayer Matrix . . . . .      | 45 |
| 3.3. Intercalated Superlattices . . . . . | 48 |
| 3.4. Conclusion . . . . .                 | 62 |
| Acknowledgments . . . . .                 | 65 |
| References and Notes . . . . .            | 65 |

Building Two-Dimensional Polymers by the Langmuir-Blodgett Technique

*Serge Palacin, Florence Porteu, and Annie Ruaudel-Teixier*

|   |    |
|---|----|
| 4.1. Introduction . . . . .   | 69 |
| 4.2. General Properties of Amphiphilic Porphyrins in LB Films . . . . . | 69 |
| 4.3. Ionic Network . . . . .  | 72 |
| 4.4. Two-Dimensional Covalent Polymer . . . . .                         | 76 |
| 4.5. Conclusion . . . . .   | 81 |
| Acknowledgments . . . . .   | 82 |
| References . . . . .  | 82 |

***Surface Modification***

**Polymer Surface Modification**

*Thomas J. McCarthy, Timothy G. Bee, Joan V. Brennan, Elisa M. Cross,  
Anthony J. Dias, Nicole L. Franchina, Kang-Wook Lee, and Molly S. Shoichet*

|   |     |
|---|-----|
| 5.1. Introduction: Polymer Surfaces and Dynamic Interfaces . . . . .                  | 85  |
| 5.2. Polymer Surface Modification . . . . .   | 87  |
| 5.3. Chemical Modification . . . . .  | 89  |
| 5.4. Hydroxylation of Polypropylene . . . . .   | 91  |
| 5.5. Functionalization of Poly(chlorotrifluoroethylene) . . . . .                     | 95  |
| 5.6. Dehydrofluorination of Poly(vinylidene fluoride). . . . .                        | 99  |
| 5.7. Indirect Syntheses of Carboxylic Acid-Functionalized<br>Fluoropolymers . . . . . | 100 |

|   |     |
|---|-----|
| 5.8. Gas Phase Chlorination of Polyethylene . . . . .                 | 102 |
| 5.9. Carbonyl Surface Chemistry of Poly(ether ether ketone) . . . . . | 103 |
| 5.10. Conclusion . . . . .  | 104 |
| Acknowledgments . . . . .   | 104 |
| References . . . . .  | 104 |

### Lithographically Patterned Self-Assembled Films

*Jeffrey M. Calvert*

|   |     |
|---|-----|
| 6.1. Introduction . . . . .   | 109 |
| 6.2. Lithographic Considerations for Ultrathin Films as<br>Imaging and Resist Layers . . . . .                        | 110 |
| 6.3. Deep-UV Photochemistry of Aromatic Hydrocarbon<br>Organosilane Films . . . . .                                   | 112 |
| 6.4. Selective Electroless Metallization of Patterned SA Films . . . . .  | 117 |
| 6.5. Pattern Transfer and Microelectronic Device Fabrication<br>by Means of Selectively Metallized SA Films . . . . . | 125 |
| 6.6. Deep-UV Photochemistry of Thiol-Terminal Organosilane<br>Films and Patterned Proteins . . . . .                  | 128 |
| 6.7. Mixed Monolayers, Coplanar Molecular Assemblies,<br>and Controlled Wetting . . . . .                             | 130 |
| 6.8. Patterned Amine Surfaces as Reactivity Templates . . . . .   | 133 |
| 6.9. Selective Cell Adhesion and Outgrowth on Patterned SA Films . . . . .  | 135 |
| 6.10. Conclusions and Future Areas of Research . . . . .  | 138 |
| Acknowledgments . . . . .   | 139 |
| References . . . . .  | 139 |

### *Recognition at Surfaces*

#### Langmuir Films of Amphiphilic Alcohols and Surfaces of Polar Crystals as Templates for Ice Nucleation

*Ronit Popovitz-Biro, Jaroslaw Majewski, Jinn-Lung Wang, Kristian Kjaer,  
Jens Als-Nielsen, Leslie Leiserowitz, and Meir Lahav*

|   |     |
|---|-----|
| 7.1. Introduction . . . . .   | 145 |
| 7.2. Self-Aggregates of Amphiphilic Alcohols as Templates<br>for Ice Nucleation . . . . . | 146 |
| 7.3. Nucleation of Ice Under Monolayers of Aliphatic Alcohols . . . . .                   | 149 |
| 7.4. Nucleation of Ice Under Mixed Monolayers<br>of Aliphatic Alcohols . . . . .          | 160 |

|  |     |
|--|-----|
| 7.5. Nucleation of Ice Under Alcohol Monolayers Bearing Amide or Ester Groups in the Hydrocarbon Chain . . . . . | 164 |
| 7.6. Induced Nucleation of Ice by Amphiphilic Alcohols Aggregated at the Oil/Water Interface . . . . .           | 170 |
| 7.7. Induced Nucleation of Ice on Surfaces of Polar Crystals of $\alpha$ -Amino Acids . . . . .                  | 174 |
| 7.8. Conclusion and Outlook . . . . .  | 177 |
| Acknowledgments . . . . .  | 179 |
| References and Notes . . . . .   | 180 |

Ion-Selective Monolayer Membranes Based on Self-Assembling  
Tetradentate Ligand Monolayers on Gold Electrodes: Nature of the  
Ionic Selectivity

*Suzi Steinberg, Yitzhak Tor, Abraham Shanzer,  
and Israel Rubinstein*

|                                       |     |
|---------------------------------------|-----|
| 8.1. Introduction . . . . .           | 183 |
| 8.2. Experiments . . . . .            | 185 |
| 8.3. Results and Discussion . . . . . | 188 |
| 8.4. Conclusions . . . . .            | 202 |
| Acknowledgments . . . . .             | 203 |
| References and Notes . . . . .        | 203 |

Specific Recognition at Functionalized Interfaces: Direct Force  
Measurements of Biomolecular Interactions

*Deborah Leckband and Jacob Israelachvili*

|  |     |
|--|-----|
| 9.1. Introduction . . . . .  | 207 |
| 9.2. Results . . . . .   | 209 |
| 9.3. Discussion . . . . .  | 220 |
| 9.4. Conclusion and Implications for Future Bioengineering<br>Materials Technology . . . . . | 221 |
| Acknowledgments . . . . .  | 221 |
| References . . . . .   | 221 |

Formation of Recognition Patterns by Langmuir-Blodgett Techniques

*Tilman Schwinn, Sven-Peter Heyn, Martin Egger,  
and Herman E. Gaub*

|                                       |     |
|---------------------------------------|-----|
| 10.1. Introduction . . . . .          | 223 |
| 10.2. Materials and Methods . . . . . | 226 |

|                             |     |
|-----------------------------|-----|
| 10.3. Conclusions . . . . . | 234 |
| Acknowledgments . . . . .   | 235 |
| References . . . . .        | 235 |

### *Electronic Properties*

#### Photoinduced Electron Transfer in Monolayer Assemblies and Its Application to Artificial Photosynthesis and Molecular Devices

*Masamichi Fujihira*

|  |     |
|--|-----|
| 11.1. Introduction . . . . .   | 239 |
| 11.2. Construction of Charge Separation Units with LB Films . . . . .  | 243 |
| 11.3. Photoelectric Conversion Efficiencies in Terms of the Electron Transfer Kinetics . . . . .                   | 249 |
| 11.4. Simulation of the Primary Process by the Use of a Mixed Monolayer with Triad and Antenna Molecules . . . . . | 254 |
| 11.5. Construction of Nanodomains in Monolayers by the Use of Phase Separation . . . . .                           | 256 |
| 11.6. Artificial Photosynthesis With Multilayered LB Films . . . . .   | 267 |
| 11.7. Conclusions . . . . .  | 271 |
| Acknowledgments . . . . .  | 272 |
| References . . . . .   | 272 |

#### Photoelectric Behavior of Bacteriorhodopsin Thin Films at the Solid/Liquid Interface

*Tsutomu Miyasaka*

|   |     |
|---|-----|
| 12.1. Introduction . . . . .  | 279 |
| 12.2. Photoelectric Response Caused by bR Photocycle . . . . .              | 280 |
| 12.3. Photoelectric Behavior of bR at Solid/Liquid Interfaces . . . . .     | 283 |
| 12.4. Device Application for Optical Sensing and Image Processing . . . . . | 287 |
| 12.5. Conclusions . . . . .   | 290 |
| Acknowledgments . . . . .   | 291 |
| References . . . . .  | 291 |

#### Hole-Burning Spectroscopy of Dye-Doped Langmuir-Blodgett Films

*Michel Orrit and Jacky Bernard*

|                                    |     |
|------------------------------------|-----|
| 13.1. Introduction . . . . .       | 293 |
| 13.2. Experimental Setup . . . . . | 296 |

|   |     |
|---|-----|
| 13.3. The Hole Width and Its Temperature Dependence . . . . . | 299 |
| 13.4. The Hole as a Spectral Label . . . . .                  | 306 |
| 13.5. Conclusion and Prospects . . . . .                      | 312 |
| Acknowledgments . . . . .                                     | 313 |
| References . . . . .  | 313 |

### *Dynamic Processes*

#### Evaluation of a Transfer Process for Langmuir-Blodgett Films by Means of a Quartz-Crystal Microbalance

*Yoshio Okahata, Katsuhiko Ariga, and Kentaro Tanaka*

|   |     |
|---|-----|
| 14.1. Introduction . . . . .  | 317 |
| 14.2. Quartz-Crystal Microbalances . . . . .                            | 318 |
| 14.3. Vertical Dipping Depositions of LB films on a QCM Plate . . . . . | 319 |
| 14.4. Horizontal Lifting Depositions of LB Films on a QCM . . . . .     | 321 |
| 14.5. Conclusions . . . . .   | 328 |
| References . . . . .  | 329 |

#### Translational Diffusion and Electron Hopping in Monolayers at the Air /Water Interface

*Marcin Majda*

|   |     |
|---|-----|
| 15.1. Electrochemistry on the Water Surface . . . . .                     | 331 |
| 15.2. Translational Diffusion in Octadecyl Ferrocene Monolayers . . . . . | 334 |
| 15.3. Electron Hopping in Langmuir Monolayers . . . . .                   | 339 |
| 15.4. Conclusions . . . . .   | 346 |
| Acknowledgments . . . . .   | 346 |
| References . . . . .  | 346 |

#### On-Line Structure Control of Langmuir-Blodgett Films

*Hans Riegler and Karl Spratte*

|   |     |
|---|-----|
| 16.1. Introduction . . . . .  | 349 |
| 16.2. Structural and Compositional Variety of Organic Multilayers . . . . .                       | 350 |
| 16.3. Schematic of the Preparation of Langmuir-Blodgett Films . . . . .                           | 351 |
| 16.4. Structure Control During the Transfer Due to<br>Substrate /Monolayer Interactions . . . . . | 355 |

|                             |     |
|-----------------------------|-----|
| 16.5. Conclusions . . . . . | 361 |
| Acknowledgments . . . . .   | 364 |
| References . . . . .        | 364 |

### *Structure*

#### Phase Diagrams and Chain Order in Monolayers of Aliphatic Chains

*Ian R. Peterson*

|   |     |
|---|-----|
| 17.1. Phases of Amphilic Monolayers . . . . .         | 367 |
| 17.2. The Principle of Corresponding States . . . . . | 371 |
| 17.3. Unambiguous Tests of the Principle . . . . .    | 375 |
| 17.4. Refinement of the Principle . . . . .           | 378 |
| 17.5. Conclusions . . . . .                           | 382 |
| References . . . . .                                  | 383 |

|                                |     |
|--------------------------------|-----|
| <i>Subject Index</i> . . . . . | 385 |
|--------------------------------|-----|
