Library of Congress Cataloging-in-Publication Data

The handbook of brain theory and neural networks / Michael A. Arbib, editor.

p. cm.

"A Bradford book."

Includes bibliographical references and index.

ISBN 0-262-01148-4

1. Neural networks (Neurobiology)—Handbooks, manuals, etc.
2. Neural networks (Computer science)—Handbooks, manuals, etc.

I. Arbib, Michael A.

Preface ix

How to Use This Book xiii

Part I: Background 1

How to Use Part I 3

- I.1. Introducing the Neuron 4
 - Basic Properties of Neurons* 4
 - Receptors and Effectors* 7
 - Neural Models* 8
 - More Detailed Properties of Neurons* 10
 - References* 11
- I.2. Levels and Styles of Analysis 11
 - A Historical Fragment* 11
 - Brains, Machines, and Minds* 13
 - Levels of Analysis* 14
 - References* 16
- I.3. Dynamics and Adaptation in Neural Networks 17
 - Dynamic Systems* 17
 - Adaptation in Dynamic Systems* 20
 - References* 25

Part II: Road Maps 27

The Meta-Map 29

- II.1. Connectionism: Psychology, Linguistics, and Artificial Intelligence 31
 - Connectionist Psychology* 31
 - Connectionist Linguistics* 32
 - Artificial Intelligence and Neural Networks* 33
- II.2. Dynamics, Self-Organization, and Cooperativity 34
 - Dynamic Systems and Optimization* 34
 - Cooperative Phenomena* 35
 - Self-Organization in Neural Networks* 36
- II.3. Learning in Artificial Neural Networks 37
 - Learning in Artificial Neural Networks, Deterministic* 37
 - Learning in Artificial Neural Networks, Statistical* 38
 - Computability and Complexity* 40
- II.4. Applications and Implementations 41
 - Control Theory and Robotics* 41
 - Applications of Neural Networks* 42
 - Implementation of Neural Networks* 43

II.5. Biological Neurons and Networks 45

- Biological Neurons* 45
- Biological Networks* 46
- Mammalian Brain Regions* 48

II.6. Sensory Systems 50

- Vision* 50
- Other Sensory Systems* 52

II.7. Plasticity in Development and Learning 53

- Mechanisms of Neural Plasticity* 53
- Development and Regeneration of Neural Networks* 54
- Learning in Biological Systems* 54

II.8. Motor Control 55

- Motor Pattern Generators and Neuroethology* 55
- Biological Motor Control* 56
- Primate Motor Control* 57

Part III: Articles 59

- Active Vision 61
- Activity-Dependent Regulation of Neuronal Conductances 63
- Adaptive Control: General Methodology 66
- Adaptive Control: Neural Network Applications 69
- Adaptive Filtering 74
- Adaptive Resonance Theory (ART) 79
- Adaptive Signal Processing 82
- Analog VLSI for Neural Networks 86
- Analogy-Based Reasoning 91
- Applications of Neural Networks 94
- Artificial Intelligence and Neural Networks 98
- Associative Networks 102
- Astronomy 107
- Auditory Cortex 110
- Auditory Periphery and Cochlear Nucleus 115
- Automata and Neural Networks 119
- Automatic Target Recognition 123
- Averaging/Modular Techniques for Neural Networks 126
- Axonal Modeling 129
- Backpropagation: Basics and New Developments 134
- Basal Ganglia 139
- Bayesian Methods for Supervised Neural Networks 144
- Bayesian Networks 149
- BCM Theory of Visual Cortical Plasticity 153

-
- Binding in the Visual System 157
 - Biomaterials for Intelligent Systems 159
 - Boltzmann Machines 162
 - Cellular Automata 166
 - Cerebellum and Conditioning 169
 - Cerebellum and Motor Control 172
 - Chains of Coupled Oscillators 178
 - Chaos in Axons 183
 - Chaos in Neural Systems 186
 - Classical Learning Theory and Neural Networks 189
 - Cognitive Development 193
 - Cognitive Maps 197
 - Cognitive Modeling: Psychology and Connectionism 200
 - Collective Behavior of Coupled Oscillators 203
 - Collicular Visuomotor Transformations for Saccades 206
 - Color Perception 210
 - Command Neurons and Command Systems 215
 - Competitive Learning 220
 - Compositionality in Neural Systems 223
 - Computer Modeling Methods for Neurons 226
 - Computing with Attractors 230
 - Concept Learning 234
 - Conditioning 238
 - Connectionist and Symbolic Representations 243
 - Consciousness, Theories of 247
 - Constrained Optimization and the Elastic Net 250
 - Convolutional Networks for Images, Speech, and Time Series 255
 - Cooperative Behavior in Networks of Chaotic Elements 258
 - Cooperative Phenomena 261
 - Corollary Discharge in Visuomotor Coordination 266
 - Cortical Columns, Modules, and Hebbian Cell Assemblies 269
 - Coulomb Potential Learning 272
 - Crustacean Stomatogastric System 275
 - Data Clustering and Learning 278
 - Dendritic Processing 282
 - Dendritic Spines 289
 - Developmental Disorders 292
 - Development and Regeneration of Eye-Brain Maps 295
 - Diffusion Models of Neuron Activity 299
 - Digital VLSI for Neural Networks 304
 - Directional Selectivity in the Cortex 309
 - Directional Selectivity in the Retina 312
 - Disease: Neural Network Models 315
 - Dissociations Between Visual Processing Modes 318
 - Distortions in Human Memory 321
 - Distributed Artificial Intelligence 322
 - Dynamic Clamp: Computer-Neural Hybrids 326
 - Dynamic Link Architecture 329
 - Dynamic Models of Neurophysiological Systems 332
 - Dynamic Remapping 335
 - Dynamics and Bifurcation of Neural Networks 339
 - Echolocation: Creating Computational Maps 344
 - EEG Analysis 348
 - Electrolocation 352
 - Emotion and Computational Neuroscience 356
 - Emotion-Cognition Interactions 360
 - Energy Functions for Neural Networks 363
 - Epilepsy: Network Models of Generation 367
 - Equilibrium Point Hypothesis 370
 - Evolution of the Ancestral Vertebrate Brain 373
 - Expert Systems and Decision Systems Using Neural Networks 377
 - Exploration in Active Learning 381
 - Eye-Hand Coordination in Reaching Movements 385
 - Face Recognition 388
 - Fault Tolerance 390
 - Figure-Ground Separation 395
 - Forecasting 399
 - Fractal Strategies for Neural Network Scaling 403
 - Frog Wiping Reflexes 406
 - Fuzzy Logic Systems and Qualitative Knowledge 410
 - Gabor Wavelets for Statistical Pattern Recognition 414
 - Gait Transitions 420
 - Gaze Coding in the Posterior Parietal Cortex 423
 - Generalization and Regularization in Nonlinear Learning Systems 426
 - “Genotypes” for Neural Networks 431
 - Geometrical Principles in Motor Control 434
 - Grasping Movements: Visuomotor Transformations 438
 - Habituation 441
 - Half-Center Oscillators Underlying Rhythmic Movements 444
 - Handwritten Digit String Recognition 447
 - Head Movements: Multidimensional Modeling 450
 - Hebbian Synaptic Plasticity 454
 - Hebbian Synaptic Plasticity: Comparative and Developmental Aspects 459
 - High-Energy Physics 464
 - Hippocampus: Spatial Models 468
 - Human Movement: A System-Level Approach 472
 - Identification and Control 477
 - Illusory Contour Formation 481
 - Information Theory and Visual Plasticity 484
 - Invertebrate Models of Learning: *Aplysia* and *Hermisenda* 487

- Investment Management: Tactical Asset Allocation 491
- Ion Channels: Keys to Neuronal Specialization 496
- Kolmogorov's Theorem 501
- Language Acquisition 503
- Language Change 506
- Language Processing 508
- Layered Computation in Neural Networks 513
- Learning and Generalization: Theoretical Bounds 516
- Learning and Statistical Inference 522
- Learning as Adaptive Control of Synaptic Matrices 527
- Learning as Hill-Climbing in Weight Space 531
- Learning by Symbolic and Neural Methods 533
- Learning Vector Quantization 537
- Lesioned Attractor Networks as Models of Neuropsychological Deficits 540
- Limb Geometry: Neural Control 543
- Linguistic Morphology 546
- Localized Versus Distributed Representations 549
- Locomotion, Invertebrate 553
- Locust Flight: Components and Mechanisms in the Motor 556
- Long-Term Depression in the Cerebellum 560
- Markov Random Field Models in Image Processing 564
- Memory-Based Reasoning 568
- Mental Arithmetic Using Neural Networks 570
- Minimum Description Length Analysis 572
- Model-Reference Adaptive Control 576
- Modular and Hierarchical Learning Systems 579
- Modular Neural Net Systems, Training of 582
- Motion Perception 585
- Motion Perception: Self-Organization 589
- Motivation 591
- Motoneuron Recruitment 594
- Motor Control, Biological and Theoretical 597
- Motor Pattern Generation 600
- Multiprocessor Simulation of Neural Networks 605
- Muscle Models 609
- Neocognitron: A Model for Visual Pattern Recognition 613
- Neural Optimization 617
- Neuroanatomy in a Computational Perspective 622
- Neuroethology, Computational 626
- Neuromodulation in Invertebrate Nervous Systems 631
- Neurosimulators 634
- Neurosmithing: Improving Neural Network Learning 639
- NMDA Receptors: Synaptic, Cellular, and Network Models 644
- Noise Canceling and Channel Equalization 648
- Nonmonotonic Neuron Associative Memory 651
- NSL: Neural Simulation Language 654
- Object Recognition 658
- Ocular Dominance and Orientation Columns 660
- Olfactory Bulb 665
- Olfactory Cortex 669
- Optical Architectures for Neural Network Implementations 673
- Optical Components for Neural Network Implementations 677
- Optimization Principles in Motor Control 682
- Oscillatory and Bursting Properties of Neurons 686
- Oscillatory Associative Memories 691
- PAC Learning and Neural Networks 694
- Pain Networks 698
- Parallel Computational Models 702
- Pattern Formation, Biological 705
- Pattern Recognition 711
- Perception of Three-Dimensional Structure 715
- Perceptrons, Adalines, and Backpropagation 719
- Perceptual Grouping 725
- Perspective on Neuron Model Complexity 728
- Phase-Plane Analysis of Neural Activity 732
- Philosophical Issues in Brain Theory and Connectionism 738
- Planning, Connectionist 741
- Post-Hebbian Learning Rules 745
- Potential Fields and Neural Networks 749
- Principal Component Analysis 753
- Problem Solving, Connectionist 756
- Process Control 760
- Programmable Neurocomputing Systems 764
- Prosthetics, Neural 768
- Protein Structure Prediction 772
- Pursuit Eye Movements 775
- Radial Basis Function Networks 779
- Reaching: Coding in Motor Cortex 783
- Reaching Movements: Implications of Connectionist Models 788
- Reactive Robotic Systems 793
- Recurrent Networks: Supervised Learning 796
- Regularization Theory and Low-Level Vision 800
- Reinforcement Learning 804
- Reinforcement Learning in Motor Control 809
- Respiratory Rhythm Generation 813
- Retina 816
- Robot Control 820
- Routing Networks in Visual Cortex 823

-
- Saccades and Listing's Law 826
Schema Theory 830
Scratch Reflex 834
Selective Visual Attention 837
Self-Organization and the Brain 840
Self-Organization in the Time Domain 843
Self-Organizing Feature Maps: Kohonen Maps 846
Self-Reproducing Automata 851
Semantic Networks 854
Sensor Fusion 857
Sensorimotor Learning 860
Sensory Coding and Information Theory 864
Short-Term Memory 867
Silicon Neurons 871
Simulated Annealing 876
Single-Cell Models 879
Somatosensory System 884
Somatotopy: Plasticity of Sensory Maps 888
Sound Localization and Binaural Processing 891
Sparse Coding in the Primate Cortex 895
Sparsely Coded Neural Networks 899
Spatiotemporal Association in Neural Networks 902
Speaker Identification 905
Speech Recognition: A Hybrid Approach 907
Speech Recognition: Feature Extraction 910
Speech Recognition: Pattern Matching 913
Spinal Cord of Lamprey: Generation of Locomotor Patterns 918
Statistical Mechanics of Generalization 922
Statistical Mechanics of Learning 925
Statistical Mechanics of Neural Networks 930
Steelmaking 934
Stereo Correspondence and Neural Networks 937
Stochastic Approximation and Neural Network Learning 941
Structural Complexity and Discrete Neural Networks 945
Structured Connectionist Models 949
Synaptic Coding of Spike Trains 953
Synaptic Currents, Neuromodulation, and Kinetic Models 956
Synchronization of Neuronal Responses as a Putative Binding Mechanism 960
Telecommunications 964
Temporal Pattern Processing 967
Textured Images: Modeling and Segmentation 971
Thalamocortical Oscillations in Sleep and Wakefulness 976
Thalamus 981
Time Complexity of Learning 984
Time Perception: Problems of Representation and Processing 987
Topology-Modifying Neural Network Algorithms 990
Traveling Activity Waves 994
Unsupervised Learning with Global Objective Functions 997
Vapnik-Chervonenkis Dimension of Neural Networks 1000
Vestibulo-Ocular Reflex: Performance and Plasticity 1003
Vision for Robot Driving 1008
Vision: Hyperacuity 1009
Visual Coding, Redundancy, and "Feature Detection" 1012
Visual Cortex Cell Types and Connections 1016
Visual Processing of Object Form and Environment Layout 1021
Visual Scene Perception: Neurophysiology 1024
Visual Schemas in Object Recognition and Scene Analysis 1029
Visuomotor Coordination in Flies 1031
Visuomotor Coordination in Frogs and Toads 1036
Visuomotor Coordination in Salamanders 1042
Walking 1045
Wavelet Dynamics 1049
Wave Propagation in Cardiac Muscle and in Nerve Networks 1054
Winner-Take-All Mechanisms 1056
