Contents

1	Introduction	1
1.1	Adaptive Linear Control	1
1.1.1	Emergence of adaptive control	1
1.1.2	Achievements of adaptive linear control	2
1.1.3	Adaptive control as dynamic nonlinear feedback	3
1.1.4	Lyapunov-based design	4
1.1.5	Estimation-based design	5
1.2	Adaptive Nonlinear Control	7
1.2.1	A nonlinear challenge	7
1.2.2	A structural obstacle	9
1.2.3	Early results	10
1.3	Preview of the Main Topics	11
1.3.1	Classes of nonlinear systems	11
1.3.2	Adaptive backstepping and tuning functions	12
1.3.3	Modular designs	14
1.3.4	Output-feedback designs	15
1.3.5	Linear systems	15
1.3.6	Transient performance	16
1.3.7	Caveat: robustness	17
1.4	Notation	17
	Notes and References	17
I	State Feedback	19
2	Design Tools for Stabilization	21
2.1	Stability	22
2.1.1	Main stability theorems	22
2.1.2	Control Lyapunov functions (clf)	25
2.2	Backstepping	29
2.2.1	Integrator backstepping	29
2.2.2	Example: active suspension (parallel)	37
2.2.3	Feedback linearization and zero dynamics	39

2.2.4	Stabilization of cascade systems	42
2.2.5	Block backstepping with zero dynamics	49
2.2.6	Example: active suspension (series)	55
2.3	Recursive Design Procedures	58
2.3.1	Strict-feedback systems	58
2.3.2	Pure-feedback systems	61
2.3.3	Block-strict-feedback systems	64
2.4	Design Flexibility: Jet Engine Example	66
2.4.1	Jet engine stall and surge	67
2.4.2	A two-step design	68
2.4.3	Avoiding cancellations	70
2.5	Stabilization with Uncertainty	72
2.5.1	Nonlinear damping	73
2.5.2	Backstepping with uncertainty	80
2.5.3	Robust strict-feedback systems	84
	Notes and References	86
3	Adaptive Backstepping Design	87
3.1	Adaptation as Dynamic Feedback	88
3.2	Adaptive Backstepping	92
3.2.1	Adaptive integrator backstepping	92
3.2.2	Adaptive block backstepping	98
3.3	Recursive Design Procedures	99
3.3.1	Parametric strict-feedback systems	99
3.3.2	Multi-input systems	103
3.3.3	Parametric block-strict-feedback systems	105
3.4	Extended Matching Design	110
3.4.1	Reducing the overparametrization	110
3.4.2	Example: biochemical process	113
3.4.3	Transient performance improvement	115
	Notes and References	121
4	Tuning Functions Design	123
4.1	Adaptive Control Lyapunov Functions	124
4.1.1	Departure from certainty equivalence	124
4.1.2	Certainty equivalence for a modified system	128
4.1.3	Adaptive backstepping via aclf	134
4.2	Set-Point Regulation	139
4.2.1	Design procedure	140
4.2.2	Stability and convergence	151
4.2.3	Passivity	154
4.3	Tracking	156
4.3.1	Design procedure	157
4.3.2	Trajectory initialization	162

4.4	Transient Performance	165
4.4.1	\mathcal{L}_2 performance	165
4.4.2	\mathcal{L}_∞ performance	166
4.5	Extensions	168
4.5.1	Unknown virtual control coefficients	168
4.5.2	Block-strict-feedback systems	173
4.5.3	Pure-feedback systems	175
4.6	Example: Aircraft Wing Rock	180
	Notes and References	183
5	Modular Design with Passive Identifiers	185
5.1	Weakness of Certainty Equivalence	186
5.2	ISS-Control Lyapunov Functions	189
5.3	ISS-Controller Design	198
5.4	Observers for Strict Passivity	206
5.5	z -Passive Scheme	209
5.6	x -Passive Scheme	212
5.7	Transient Performance	218
5.8	SG-Scheme (Weak Modularity)	222
5.8.1	Controller design	223
5.8.2	Scheme with strengthened identifier	225
5.9	Unknown Virtual Control Coefficients	229
5.9.1	Controller design	229
5.9.2	Passive adaptive scheme	232
	Notes and References	233
6	Modular Design with Swapping Identifiers	235
6.1	ISS-Controller	235
6.2	Swapping and Static Parametric Models	237
6.3	z -Swapping Scheme	239
6.4	x -Swapping Scheme	248
6.5	Transient Performance	254
6.5.1	Simulation examples	259
6.6	SG-Scheme	265
6.7	Schemes with Weak ISS-Controller	271
6.8	Unknown Virtual Control Coefficients	277
	Notes and References	282
II	Output Feedback	283
7	Output-Feedback Design Tools	285
7.1	Observer Backstepping	285
7.1.1	Unmeasured states	285

7.1.2	Output-feedback systems	291
7.2	MIMO Design: Induction Motor	294
7.3	Adaptive Observer Backstepping	301
7.3.1	An introductory example	301
7.3.2	Parametric output-feedback systems	307
7.3.3	Example: single-link flexible robot	313
7.4	Extensions	315
7.4.1	Interlaced controller-observer design	315
7.4.2	Design with partial-state feedback	320
	Notes and References	324
8	Tuning Functions Designs	327
8.1	Design with K-Filters	329
8.1.1	Filters and observer	329
8.1.2	Adaptive controller design	332
8.1.3	Stability	340
8.1.4	Transient performance	346
8.2	Design with MT-Filters	348
8.2.1	Filtered transformations and observer	348
8.2.2	Adaptive controller design	351
8.2.3	Stability	357
8.2.4	Transient performance	363
8.3	Example: Levitated Ball	365
	Notes and References	369
9	Modular Designs	371
9.1	ISS-Controller Design	372
9.2	y -Passive Scheme	380
9.3	y -Swapping Scheme	384
9.4	x -Swapping Scheme	388
9.5	Schemes with Parametric z -Model	392
9.6	Transient Performance	394
9.6.1	Passive schemes	394
9.6.2	Swapping schemes	397
9.7	Swapping Schemes with Weak ISS-Controller	400
9.8	Schemes with MT-Filters	403
9.8.1	ISS-observer	404
9.8.2	ISS-controller	405
9.8.3	χ -Passive scheme	407
9.8.4	ε -Swapping scheme	409
9.8.5	Transient performance	412
	Notes and References	416

10 Linear Systems	417
10.1 State Estimation Filters	418
10.2 Tuning Functions Design	422
10.2.1 Design procedure	422
10.2.2 Stability analysis	434
10.2.3 Passivity	438
10.2.4 Design example	440
10.3 Properties of the Nonadaptive System	443
10.3.1 Underlying linear controller	443
10.3.2 Parametric robustness and nonadaptive performance	448
10.4 Transient Performance with Tuning Functions	453
10.4.1 Transient performance of the adaptive system	454
10.4.2 Performance improvement due to adaptation	459
10.5 Comparison with a Traditional Scheme	464
10.5.1 Choice of a traditional scheme	464
10.5.2 Comparison of the schemes	465
10.6 Modular Designs	470
10.6.1 SG-controller	470
10.6.2 y -Passive scheme	473
10.6.3 x -Swapping scheme	477
10.6.4 Comparison: modular vs. tuning functions design	482
10.7 Summary	484
Notes and References	484
Appendices	487
A Lyapunov Stability and Convergence	489
B Input-Output Stability	493
C Input-to-State Stability	501
D Passivity	507
E Parameter Projection	511
F Nonlinear Swapping	515
G Differential Geometric Conditions	521
G.1 Partial-State-Feedback Forms	521
G.2 Output-Feedback Forms	533
G.3 Full-State-Feedback Forms	535
Bibliography	541
Index	559
