# Electronic Properties of Doped Semiconductors

With 106 Figures

Springer-Verlag Berlin Heidelberg New York Tokyo 1984

### Contents

## Part I Lightly Doped Semiconductors

1.	The Structure of Isolated Impurity States	2
	1.1 Shallow Impurities	2
	1.2 Impurity Levels Near a Nondegenerate Band	4
	1.2.1 Extremum at the Center of the Brillouin Zone	5
	1.2.2 Several Equivalent Extrema	8
	1.3 Impurity Levels Near a Point of Band Degeneracy	11
	1.4 Asymptotic Behavior of the Impurity-State Wave Functions	19
2.	Localization of Electronic States	25
	2.1 Narrow Bands and the Mott Transition	26
	2.2 Anderson Transition	30
	2.3 Examples of Transition from Localized to Delocalized States.	
	Conductivity Near the Transition Point	35
	2.4 The Scaling Theory of Localization	39
	2.5 Localization in the Lifshitz Model	46
3.	The Structure of the Impurity Band for Lightly	
	Doned Semiconductors	52
	Doped Semiconductors	
	3.1 General Remarks	52
	3.1 General Remarks	52 55
	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> </ul>	52 55 62
	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> </ul>	52 55 62
	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> </ul>	52 55 62 65
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> </ul>	52 55 62 65
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> </ul>	52 55 62 65 74
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> <li>4.1 Basic Experimental Facts</li> </ul>	52 55 62 65 74 74
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> <li>4.1 Basic Experimental Facts</li> <li>4.2 The Resistor Network Model Proposed by Miller and Abrahams</li> </ul>	52 55 62 65 74 74 82
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> <li>4.1 Basic Experimental Facts</li> <li>4.2 The Resistor Network Model Proposed by Miller and Abrahams</li> <li>Percolation Theory</li> </ul>	52 55 62 65 74 74 82 94
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> <li>4.1 Basic Experimental Facts</li> <li>4.2 The Resistor Network Model Proposed by Miller and Abrahams</li> <li>Percolation Theory</li> <li>5.1 Lattice Problems</li> </ul>	52 55 62 65 74 74 82 94 94
4.	<ul> <li>3.1 General Remarks</li> <li>3.2 The Impurity Band at Low Degrees of Compensation</li> <li>3.3 Long-Range Potential at Low Degrees of Compensation</li> <li>3.4 The Impurity Band at High Degrees of Compensation</li> <li>A General Description of Hopping Conduction in Lightly</li> <li>Doped Semiconductors</li> <li>4.1 Basic Experimental Facts</li> <li>4.2 The Resistor Network Model Proposed by Miller and Abrahams</li> <li>Percolation Theory</li> <li>5.1 Lattice Problems</li> <li>5.2 Continuum Problems</li> </ul>	52 55 62 65 74 74 82 94 94

	5.4 Theory of Critical Exponents	118
	Bonds Infinite Cluster Topology	123
	5 5 1 Deed Ends	125
	5.5.2 The Nodes and Links Model	125
	5.5.2 The Noues and Emilia Model	120
	5.5.5 The Scaling Hypothesis and Calculation of the Conductivity $\sigma(x)$	120
	5.6 Derealation Theory and the Electric Conductivity	147
	of Strongly Inhomogeneous Media	120
		130
6.	Dependence of Hopping Conduction on the Impurity	4.0.7
	Concentration and Strain in the Crystal	137
	6.1 Resistivity $\rho_3$ for Semiconductors with Isotropic Impurity	
	Wave Functions	137
	6.2 Resistivity $\rho_3$ for Semiconductors with Anisotropic Impurity	
	Wave Functions	144
7	Hopping Conduction in a Magnetic Field	155
	7.1 The Elementary Resistance R. in a Magnetic Field	156
	7.2 Evaluation of the Magnetoresistance and Discussion	150
	of Experimental Data	163
8.	Activation Energy for Hopping Conduction	180
	8.1 Activation Energy $\varepsilon_3$ at Low Degree of Compensation	180
	8.2 Activation Energies $\varepsilon_1$ and $\varepsilon_3$ at High Compensation	186
	8.3 The Perturbation Method in Percolation Theory.	
	General Theory of the Activation Energy $\varepsilon_1$	191
9.	Variable-Range Hopping Conduction	202
	9.1 Mott's Law	202
	9.2 Magnetoresistance in the Region of Variable-Range	
	Hopping Conduction	210
	9.3 The Dependence of Hopping Conduction in Amorphous	
	Films on Film Thickness	216
	9.4 The Preexponential Factor in Hopping Conductivity	222
10	Correlation Efforts on the Density of States	
10.	and Hopping Conduction	228
	10.1 Coulomb Gan in the Density of States	220
	10.1 1 The Theory of the Coulomb Gan	220
	10.1.2 Dossible Manifestations of the Coulomb Cap	220
	10.1.2 FOSSIONE Maintestations of the Coulonity Gap	230
	10.2 Many-Douy Conclations in nopping Conduction	244
	10.2.1 Hubbard Current Correlations	240
	10.2.2 Coulomb Correlations	200

#### Part II Heavily Doped Semiconductors

	-00
<ul><li>11.2 Density of States Near the Bottom of the Conduction Band</li><li>11.3 Derivation of the Quasiclassical Formula for the Density</li></ul>	259
of States	264
12. The Density-of-States Tail and Interband Light Absorption	268
12.1 The Optimum Fluctuation Method	268
12.2 The Uniformity Charged Sphere Approximation.	270
12 3 Exact Distribution of Impurities in Optimum Fluctuations	270
12.3 1 Derivation of Basic Equations	277
12.3.2 Derivation of (12.2.12)	279
12.3.3 Density-of-States Asymptotics in the Absence of	
Impurity Correlations	281
12.4 The Spectrum of the Minority Carriers	283
12.4.1 Classical Case $(\gamma \ge E_s)$	284
12.4.2 Quantum Case ( $\gamma \ll E_s$ )	285
12.5 The Theory of Interband Light Absorption	287
12.5.1 On the Relation Between the Density of States and the Interband Light Absorption Coefficient (ILAC)	207
12.5.2 Light Absorption Induced by Gaussian Eluctuations	207
in the Absence of Carrier Degeneracy	289
12.5.3 Discussion of Experimental Results	293
13 The Theory of Heavily Doned and Highly Compensated	
Semiconductors (HDCS)	295
13.1 Uncorrelated Impurity Distribution	295
13.1.1 Qualitative Discussion	295
13.1.2 Basic Equations and the Asymptotic Properties	
of the Potential	299
13.2 Correlated Impurity Distribution	303
13.3 Kinetic Properties of HDCS	305
13.4 Completely Compensated Semiconductor	309

#### Part III Computer Modelling

,

14.	Modelling the Impurity Band of a Lightly Doped Semiconductor	
	and Calculating the Electrical Conductivity	316
	14.1 Minimization of the Total Energy and Calculation	
	of the Density of States	318
	14.2 Density of States and the Fermi Level	322

14.2.1 Intermediate Degrees of Compensation	324
14.2.2 Strong Compensation $(1 - K \ll 1)$	326
14.2.3 Low Compensation	328
14.3 Distribution of Electric Fields on Neutral Donors	329
14.4 Activation Energy of Hopping Conduction	333
14.5 Variable-Range Hopping Conduction	341
14.6 Activation Energy $\varepsilon_1$ of Band Conduction	344
14.7 Some Other Applications of the Minimization Program	350
Appendix
