Preface xv

1 **Short pulse generation** 1
H. A. HAUS

1.1 Active modelocking in the frequency domain 4
1.2 Active modelocking in the time domain and passive modelocking 7
1.3 Group velocity dispersion, self-phase modulation and the master equation 11
1.4 The nonlinear Schrödinger equation and solitons 18
1.5 The soliton laser 22
1.6 The coupled cavity modelocking and/or the additive pulse modelocking principle 23
1.7 Additive pulse modelocking with nonlinear interferometer 27
1.8 Kerr lens modelocking 32
1.9 All-fiber ring laser 35
1.10 Performance of some APM and KLM systems 42
1.11 Third-order dispersion and its effect on pulse width 44
1.12 Discussion 48
Acknowledgments 50
Appendix I 50
Appendix II 53
References 55

2 **Passive modelocking in solid state lasers** 57
THOMAS BRABEC, STEPHEN M. J. KELLY AND FERENC KRAUSZ

2.1 Initial modelocked pulse formation 59
2.2 Steady-state pulse shaping dynamics 72
2.3 Conclusion 89

Acknowledgments 90
References 90

3 **Compact modelocked solid state lasers pumped by laser diodes** **93**
JOHN R. M. BARR

3.1 Introduction 93
3.2 Active modelocking of laser diode pumped solid state lasers 96
3.3 Passive modelocking 115
3.4 Alternative modelocking techniques 126
3.5 Amplification and tunability 129
3.6 Conclusion and future prospects 131
References 134

4 **Modelocking of all-fiber lasers** **140**
IRL N. DULING, III AND MICHAEL L. DENNIS

4.1 Methods of modelocking fiber lasers 140
4.2 The figure eight laser 146
4.3 Other modelocked fiber sources 168
4.4 Summary 174
References 175

5 **Nonlinear polarization evolution in passively modelocked fiber lasers** **179**
MARTIN E. FERMANN

5.1 Introduction 179
5.2 Linear polarization evolution in fiber lasers 180
5.3 Nonlinear polarization evolution in fiber lasers 184
5.4 Fiber laser cavities 187
5.5 Experiments 191
5.6 Summary 204
Acknowledgments 205
References 205

6 **Ultrafast vertical cavity semiconductor lasers** **208**
WENBIN JIANG AND JOHN BOWERS

6.1 Introduction 208
6.2 Optically pumped modelocked vertical cavity lasers 216
6.3 Analysis of laser pulse chirping in modelocked VCSELs 229
6.4 Carrier transport effect on modelocked VCSELs 246
6.5 Electrically pumped modelocked semiconductor lasers 255
6.6 Conclusions 260
References 261

7 **High power ultrafast semiconductor injection diode lasers** **274**
PETER J. DELFYETT

7.1 Introduction 274
7.2 Active modelocking 276
7.3 Passive and hybrid modelocking with multiple quantum well saturable absorbers 284
7.4 Cubic phase compensation 293
7.5 Intracavity dynamics 296
7.6 Amplification characteristics/dynamics 300
7.7 Applications of modelocked semiconductor laser diodes in synchronous optical networks 308
7.8 Conclusion and future directions 323
Acknowledgments 325
References 325

8 **The hybrid soliton pulse source** **329**
PAUL A. MORTON

8.1 Introduction 329
8.2 Pulse source requirements for soliton transmission systems 331
8.3 Hybrid soliton pulse source with a silicon optical bench reflector 333
8.4 Hybrid soliton pulse source with a fiber Bragg reflector 339
8.5 Spectral instabilities: cause and solution 342
8.6 Wide operating frequency range using a chirped Bragg reflector 348
8.7 CW operation with a chirped Bragg reflector 354
8.8 Packaged HSPS characteristics and soliton transmission results 373
8.9 Outlook 380
Acknowledgments 380
References 380

9 **Monolithic colliding pulse modelocked diode lasers** **383**
MING C. WU AND YOUNG-KAI CHEN

9.1 Introduction 383
9.2 Monolithic modelocked semiconductor lasers 384
9.3 Monolithic colliding pulse modelocked semiconductor lasers 387
9.4 Applications of monolithic CPM lasers 415
9.5 Other monolithic modelocked semiconductor lasers 416
9.6 Conclusion and future direction 420
Acknowledgments 421
References 421
