

The Video Studio

Third Edition

Alan Bermingham,
Michael Talbot-Smith,
Ken Angold-Stephens
and Ed Boyce

Contents

INTRODUCTION	11	Lighting equipment	
STUDIO: INITIAL PLANNING	12	Camera cables	
The studio's function		General storage	
Remote productions		MAKE-UP	34
Constructional considerations		Typical facilities	
STUDIO FACILITIES	14	Monitoring and communication	
Technical facilities		COSTUME	36
Production requirements		Typical facilities	
Post-production requirements		Costume suitability	
LAYOUT OF CONTROL AREAS	16	Monitoring and communication	
Location near the studio		EQUIPMENT MAINTENANCE	
Observation windows		AREA	38
Communal control area		Storage	
Separate control areas		Test equipment	
STUDIO CONSTRUCTION	18	Lighting	
Area, shape and height		SAFETY IN THE STUDIO	40
Floor, walls and ceiling		Fire	
STUDIO GENERAL SERVICES	20	Electrical	
Access		Safety bonds	
Power and lighting		Tripping accidents	
Studio markings and floor plan		Lifting	
STUDIO SOUND INSULATION	22	Unstable items	
External noise		THE VISION SYSTEM	42
Sound leakage		Scanning	
Noise from ventilation		Interlace	
STUDIO ACOUSTICS	24	Coding	
Acoustical treatment		Bandwidth	
Reverberation time		CHOICE OF CAMERA SYSTEM	44
Required reverberation times		Composite/component	
STUDIO VENTILATION	26	Remote control	
Preventing heat build-up		Camera sensitivity	
General problems		PICTURE GENERATION	46
Auxiliary requirements		Sensor system: tube/CCD	
STUDIO SCENERY	28	Camera configuration	
Classifying colour		Resolution	
Surface treatment		CAMERA LENSES	48
Scenic storage and repair		Focal length and angle of view	
STUDIO CYCLORAMA	30	(horizontal)	
The mobile cyc		Lens aperture	
Cyc colour		Zoom lens	
Rear-lit cyc		CHOICE OF LENS	50
Care and storage		Minimum object distance	
TECHNICAL EQUIPMENT		Macro	
STORE	32	Maximum lens aperture	

Range extenders		Radio frequency distribution	
Servos		Microwave links	
CAMERA MOUNTINGS	52	Fibre optic links	
Tripod		PRODUCTION CONTROL	
Pedestal		ROOM	74
Pan and tilt head		Picture monitors	
Sophisticated mountings		Environment	
CAMERA CABLES AND CABLING		Layout	
POINTS	54	VISION MIXER OR SWITCHER:	
Cable care		FUNCTION	76
Cabling points		Vision mixer design	
VISION AND LIGHTING CONTROL		What to look for	
AREA	56	VISION MIXER:	
Control room position		GENERAL FACILITIES	78
Cabling		The cut	
Operational considerations		The mix or dissolve	
SIGNAL PROCESSING		The fade-up/fade-out	
(CAMERA CONTROL UNIT)	58	The superimposition	
Control features		Preview facilities	
LINE-UP OF CAMERA		VISION MIXER:	
CHANNELS	60	SPECIAL EFFECTS	80
Starting the day		The wipe	
Zoom tracking		The split screen	
Line-up charts		Chroma key	
VISION CONTROL	62	Caption key	
Lightweight cameras		Black edger or borderline generator	
Full-facility vision control		Colour synthesiser	
MONITORING THE VISION		OTHER ANALOGUE VISION	
SIGNAL	64	FACILITIES	82
The TV waveform		Floor monitors	
Signal levels		Projection systems	
PICTURE MONITORS:		Slide scanners	
MONOCHROME	66	Caption projection unit	
Monitor adjustment		DIGITAL VIDEO	
Monitor termination		TECHNOLOGY	84
Monitor suitability		Digital video effects	
PICTURE MONITORS: COLOUR	68	Video graphics	
Monitor grades		Pictures stores	
Colour monitor line-up		Standards conversion	
Monitor line-up test signals		TELEVISION PROMPTERS	86
SYNCHRONISATION	70	Prompt card	
Picture timing		Hearing aid	
External picture sources		Electronic prompter	
VISION SIGNAL DISTRIBUTION	72	GRAPHICS	88
Distribution amplifier		Correct aspect ratio	
Termination panel		Character generators	
Cable distribution			

Artwork		Console design	
LIGHTING: OVERALL SYSTEM	90	Manual consoles	
Camera sensitivity		Computer consoles	
Size of acting area		Load meter	
Height of studio grid		MICROPHONE ASSESSMENT	110
Turnround time		Technical characteristics	
SIMPLE LIGHTING SUPPORTS	92	Mechanical characteristics	
Floor stands		Powering arrangements	
Luminaires on flats		Makers and cost	
Telescopic tubes		MICROPHONE CATEGORIES	112
Lightweight track		Omni-directional	
LIGHTING SUSPENSION		Cardioid	
SYSTEMS	94	Figure-of-eight	
Pipe grid		Hypercardioid	
Heavy track suspension		Gun microphones	
LIGHTING:		Variable directivity	
OUTLETS AND DIMMERS	96	SOUND PICK-UP	114
Dimmers		Boom	
Number of outlets		Fishpole	
Phase		Stand microphones	
Extensions		Personal microphones	
LIGHTING: GENERAL-PURPOSE		Slung microphones	
LUMINAIRES	98	Microphone positioning	
Soft-edged spotlights		RADIO MICROPHONE	116
Soft sources		Battery life	
LIGHTING: SPECIAL		Interference	
LUMINAIRES	100	Hiring	
Cyclorama lighting		SOUND MIXING CONSOLES	118
Special effects lighting		Basic design	
LIGHTING:		Operational facilities	
FLUORESCENT LIGHTS	102	SOUND MIXING CONSOLE:	
Why fluorescent lighting?		OUTPUTS	120
Comfortable artistes		Foldback	
High-frequency operation		Public address	
Colour temperature and		Cleanfeed (mix-minus)	
colour rendition		MONITORING SOUND LEVELS	122
LIGHTING CONTROL		VU meter	
DIMMERS (ANALOGUE)	104	Peak programme meter	
Thyristor or SCR dimmers		AUTOMATIC LEVEL CONTROL	124
Interference		Compression	
Digital-multiplex control		Applications	
LIGHTING CONTROL:		Noise gates	
DIMMERS (DIGITAL)	106	FREQUENCY CORRECTION	126
Advantages of digital dimmers		Types of correction	
Rack mounting/Portable dimmers		Care in use	
LIGHTING CONSOLE	108	ARTIFICIAL REVERBERATION	128

Why use it?		The future	
Artificial reverberation devices		THE VIDEOTAPE FACILITY	154
Features of digital units		Studio-based	
LOUDSPEAKERS	130	On location	
Monitoring		Tape storage	
Studio loudspeakers		VIDEOTAPE RECORDERS	156
PA systems		Cassette VTRs	
Loudness		BASIC OPERATIONAL	
AUDIO TAPE RECORDERS		REQUIREMENTS OF VTR	158
(ANALOGUE)	132	Idents	
Types of recorder		Pre-roll	
Desirable operational features		Timebase correctors	
AUDIO NOISE REDUCTION		VIDEOTAPE EDITING	160
SYSTEMS	134	Three-machine dub editing	
Dolby A		VT EDIT SYSTEMS	162
Other systems		Control track editing	
DIGITAL AUDIO	136	Time-code editing	
Digital processing		NON-LINEAR EDITING	
Error detection and correction		SYSTEMS	164
DIGITAL TAPE		POST-PRODUCTION SUITES	166
RECORDING	138	Equipment and layout	
Basic methods		SOUND DUBBING	168
Editing		Sound tracks on various formats	
COMPACT DISCS	140	PROGRAMME AND	
Error correction		PRODUCTION PLANNING	170
SOUND PERSPECTIVE	142	Resource management	
Matching sound and picture		Production planning	
SOUND AND AUDIENCE		Floor plan	
PARTICIPATION	144	STUDIO DISCIPLINE	172
Selected speakers		Avoiding disturbance	
Spontaneous contributions		Avoiding extraneous noise	
SOUND EFFECTS SOURCES	146	General precautions	
Compact discs (CDs)		Equipment care	
Cassettes		STAFFING AND	
Cartridge machines		RESPONSIBILITIES	174
TALKBACK IN THE STUDIO	148	Staff members	
Production talkback		ON LOCATION:	
Talkback variations		MAIN REQUIREMENTS	176
Private-wire intercom		Camera and recorder	
COMMUNICATION IN THE		Sound	
STUDIO COMPLEX	150	Lighting	
Signalling		Batteries	
Intercom		Transit cases	
Lighting intercom		ON LOCATION: LIGHTING AND	
TELECINE	152	ACCESSORIES	178
Film gauge		Monitor	
Film leader		Clapper board and stopwatch	
Colour correction		Time-code generator	

Waterproof covers		CAMERA MOUNTINGS	182
ON LOCATION:		Heavy cameras	
USING MICROPHONES	180	Lightweight cameras	
Microphone in shot		Sophisticated mountings	
Microphone out of shot		FURTHER READING	184
Monitoring out of doors		GLOSSARY	185
ON LOCATION:
