Contents

INTRODUCTION		Need for interlace scanning	
ACKNOWLEDGEMENTS		COLOR SYSTEMS	38
THE ATOM AND ELECTRICITY	10	Color versus black and white	
The parts of the atom		Additive and subtractive colors	
The flow of electrons through metals		Complementary colors	
BASIC CIRCUITS	12	Red, green, and blue tube differences	
Direct current (DC)		HOW THE EYE SEES LIGHT	40
Alternating current (AC)		REGISTRATION AND ENCODING	42
UNITS OF MEASUREMENT (1)	14	Registration	
Voltage		Encoding	
Current		Home video cameras	
Power		COLOR CRTS	44
Resistance and impedance		Convergence	
Mathematical symbols and formulas		VIDEO SYSTEM COMPONENTS	46
UNITS OF MEASUREMENT (2)	16	SYNC GENERATORS	48
Frequency		SYNC GENERATOR SIGNALS	50
AC frequency		Combining sync with video	
Capacitance		VECTORSCOPIES	52
ABBREVIATIONS	18	Reading the vectorscope	
Conversions		Color bar display	
INDUCTION AND NOISE	20	PAL	54
Induction		SYNC FLOW DIAGRAMS (1)	56
Noise		Distribution amplifiers	
Signal-to-noise ratio		SYNC FLOW DIAGRAMS (2)	58
CAMERA SYSTEM COMPONENTS	22	Termination	
Pickup tubes		Subcarrier, blanking, and sync pulses	
Target		CAMERA FLOW DIAGRAMS	60
Cathode		COMBINING SYNC AND CAMERA FLOW DIAGRAMS	62
CAMERA SCANNING	24	Out-of-phase cameras	
BLANKING	26	Timing the system	
Horizontal blanking		VIDEO SWITCHERS	64
Vertical blanking		Passive switchers	
WAVEFORM DISPLAY	28	Vertical interval switchers	
PROBLEMS OF CAMERA PICKUP TUBES	30	Component switchers	
Electronic problems		Special effects	
Visual problems		SWITCHER APPLICATIONS	66
CHARGE-COUPLED DEVICES	32	Production and editing switchers	
CCD layout and operation		On-air switchers	
Broadcast-quality requirements		Routing switchers	
CCD ADVANTAGES	34	PRODUCTION SWITCHER FLOW DIAGRAM	68
CCD field cameras		Switcher buses	
Economic advantages of CCDs		Switcher outputs	
Visual advantages of CCDs		SWITCHER TRANSITIONS AND SPECIAL EFFECTS	70
CATHODE RAY TUBES (CRTS)	36	Wipes	
CRT and pickup tube relationship			

SPECIAL EFFECTS KEYS—		THE SYNCHRONIZED SIGNAL	100
LUMINANCE KEYS	72	Horizontal sync as a clock	
SPECIAL EFFECTS KEYS—		D-to-A conversion	
CHROMA KEYS	74	Video proc amp	
DIGITAL SPECIAL EFFECTS	76	Window of correction	
Compressions		LARGER SYNC PROBLEMS AND SOLUTIONS	102
Pushes		Nonsynchronous sources	
Flips		Frame store synchronizer	
Rotations		OTHER ADVANTAGES OF	
Other special effects		TBCs AND FSSs	104
VIDEOTAPE RECORDING		Dynamic tracking heads	
TECHNOLOGY	78	Freeze frames	
Recorders		TBCs, VTRs, and production	
Videotape		EDITING VIDEOTAPE	106
Recording heads		Physical cutting and splicing	
VIDEO RECORDING STANDARDS		Electronic editing	
AND FORMATS (1)	80	THE EDITING PROCESS	108
Audio versus video recording		TYPES OF EDITS	110
Quadraplex video recording		Assemble edits	
VIDEO RECORDING STANDARDS		Insert edits	
AND FORMATS (2)	82	EDITING METHODS	112
Helical video recording		Manual editing	
SMPTE Type C and		Control track counters	
U-Matic formats		SMPTE TIME CODE EDITING	114
VIDEO RECORDING STANDARDS		OFF-LINE AND ON-LINE	
AND FORMATS (3)	84	EDITING	116
Other broadcast-quality formats		Off-line editing	
Sound and control tracks		On-line editing	
TIME BASE ERROR	86	EDITING BY COMPUTER	118
EXTERNAL CAUSES OF TIME		PROBLEMS OF TRADITIONAL	
BASE ERROR	88	EDITING	120
Gyroscopic time base error		NONLINEAR EDITING	122
TIME BASE ERROR		COMPUTER GRAPHICS FOR	
CORRECTION	90	VIDEO	124
Quad		Originating computer graphics	
Helical		Interface between people and	
VTR LOCKUP (1)	92	machines	
Capstan lock		CHARACTER GENERATORS	126
Vertical lock (capstan servo)		CREATING IMAGERY AND	
VTR LOCKUP (2)	94	EFFECTS	128
Frame lock		Computer-generated imagery	
Horizontal lock		(CGI)	
TIME BASE CORRECTORS	96	Digital video effects	
Review of time base		COMPOSITE VERSUS	
error problem		COMPONENT VIDEO	130
What a time base corrector		Problems of composite video	
does		Component video	
How a TBC works		Y/C	
DIGITAL TECHNOLOGY—		COMPLETE DIGITAL SYSTEMS	132
THE HEART OF A TBC	98	DIGITAL VIDEOTAPE RECORDERS	134
A-to-D conversion		D-1 component	
Sampling and quantizing			

D-2 composite		FILM CHAIN PROJECTORS AND	
NEWER DIGITAL TAPE		VIDEO CAMERAS	150
FORMATS	136	HIGH-QUALITY FILM-TO-VIDEO	
D-3		TRANSFER	152
D-5		Flying spot scanner	
Digital Betacam		PATCH PANELS	154
Which is best?		What patch panels do	
VIDEO COMPRESSION	138	Patch panel components	
OPEN ARCHITECTURE		Patching example	
EQUIPMENT VERSUS DEDICATED		PATCHING RULES AND	
EQUIPMENT	140	PROCEDURES	156
HDTV	142	Patching rules	
Production HDTV standards		Patching procedures	
versus broadcast HDTV		EXPLANATION OF A SMALL	
standards		PATCH PANEL	158
THE FCC'S PLAN FOR HDTV		Normal setup	
IN THE FUTURE	144	SIMPLE PATCHING EXERCISES	160
FILM-TO-VIDEO TRANSFER	146	Summary of patch panels	
FILM CHAIN LAYOUT	148	FURTHER READING	163
Condenser lens		GLOSSARY	165
Neutral density filter
