

**MATERIALS RESEARCH SOCIETY
SYMPOSIUM PROCEEDINGS VOLUME 392**

Thin Films for Integrated Optics Applications

Symposium held April 17-20, 1995, San Francisco, California, U.S.A.

EDITORS:

Bruce W. Wessels

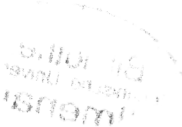

*Northwestern University
Evanston, Illinois, U.S.A.*

Seth R. Marder

*California Institute of Technology
Pasadena, California, U.S.A.*

David M. Walba

*University of Colorado
Boulder, Colorado, U.S.A.*

PITTSBURGH, PENNSYLVANIA

CONTENTS

Preface	ix
Acknowledgments	xi
Materials Research Society Symposium Proceedings	xii

PART I: NONLINEAR ORGANICS

*Development of Chromophores Based on the Dicyanomethylene Acceptor Group	3
<i>Susan Ermer, Steven M. Lovejoy, and Doris S. Leung</i>	
*Stability and Performance Issues for Nonlinear Optical Chromophores, Polymers and Devices	15
<i>R.J. Twieg, D.M. Burland, M. Jurich, V.Y. Lee, R.D. Miller, C.R. Moylan, R. Siemens, A. Skumanich, J.I. Thackara, T. Verbeist, W. Volksen, A. Knoesen, R.A. Hill, and D. Yankelevich</i>	
A Molecular Architectural Approach to Second-Order Nonlinear Optical Materials	27
<i>Xiaoguang Yang, Duncan McBranch, Basil Swanson, and DeQuan Li</i>	
*Highly Active and Thermally Stable Chromophores and Polymers for Electro-Optic Applications	33
<i>Alex K-Y. Jen, Tian-An Chen, Varanasi Pushkara Rao, Yong-Ming Cai, Yue-Jin Liu, Kevin J. Drost, Robert M. Mininni, Larry R. Dalton, Peter Bedworth, and Seth R. Marder</i>	
*Polymeric Thin Films for Electro-Optic Modulator and High Density Optical Memory Applications	43
<i>Larry R. Dalton, Aaron W. Harper, Zhiyong Liang, Jingsong Zhu, Uzi Efron, Chiung-Shieng Wu, and Anson Au</i>	
*New Nonlinear Optically Active Polymers Containing Hydrazone Chromophores	53
<i>M.N. Mang, S.E. Bales, D.J. Brennan, M.A. Chartier, R.J. Gulotty, A.P. Haag, M.N. Inbasekaran, C.A. Langhoff, and M.D. Newsham</i>	
*Fundamental Performance Limits of Active Polymer Integrated Optics	65
<i>Rick Lytel</i>	
Dynamic Mechanical Analysis and Dielectric Relaxation for Second Order Nonlinear Optical Applications	69
<i>Leah A. Sullivan and Hilary S. Lackritz</i>	

*Invited Paper

Exciton Confinement in Ultrathin Crystalline Organic Films Grown by Organic Molecular Beam Deposition	77
<i>S.R Forrest, E.I. Haskal, and P.E. Burrows</i>	

*Molecule-Based Approaches to High-Performance Second-Order Polymeric Nonlinear Optical Materials. Properties of Ultra-High-T_g Chromophoric Polyimides and Polyureas	85
<i>Jia-Fu Wang, Lifeng Geng, Weiping Lin, Tobin J. Marks, and George K. Wong</i>	

New Synthetic Approaches to Self-Assembled Chromophoric Multilayers as Second-Order Nonlinear Optical Materials	95
<i>Wenbin Lin, Tobin J. Marks, Shlomo Yitzchaik, Weiping Lin, and George K. Wong</i>	

Sol-Gel Derived Polyvinylpyrrolidone/Silicon Oxide Composite Materials and Novel Fabrication Technique for Channel Waveguide	103
<i>Makoto Yoshida and Paras N. Prasad</i>	

PART II: LIQUID CRYSTALS FOR INTEGRATED OPTICS

*Two-Dimensional Silicon/Ferroelectric Liquid Crystal Spatial Light Modulators	111
<i>Timothy J. Drabik</i>	

Metal-Containing Ferroelectric Liquid Crystals	123
<i>P. Espinet, J. Etxebarria, M. Marcos, M.A. Pérez-Jubindo, M.B. Ros, and J.L. Serrano</i>	

*Technique for Measuring Electronic-Based Electro-Optic Coefficients of Ferroelectric Liquid Crystals	135
<i>Kenneth E. Arnett, David M. Walba, and Joel A. Drewes</i>	

*New Ferroelectric Liquid Crystal Polymers for Nonlinear Optics Applications	147
<i>William N. Thurmes, Kundalika M. More, Rohini T. Vohra, Michael D. Wand, David M. Walba, and Patrick Keller</i>	

Ferroelectric Liquid Crystals for Nonlinear Optics: Can We Really Do It?	157
<i>David M. Walba, Daniel J. Dyer, Peter L. Cobben, Teresa Sierra, James A. Rego, Charles A. Liberko, Renfan Shao, and Noel A. Clark</i>	

*Invited Paper

PART III: FERROELECTRIC THIN FILMS

*Ferroelectric Thin Films and Their Applications	165
<i>R.R. Neurgaonkar, J.R. Oliver, J.G. Nelson, and I.S. Santha</i>	
The Growth of Optical Quality LiNbO₃ Thin Films on Sapphire and LiTaO₃ Substrates Using Solid-Source MOCVD	177
<i>S.Y. Lee, R.K. Route, and R.S. Feigelson</i>	
*Deposition of Potassium Niobate Thin Films by Metalorganic Chemical Vapor Deposition and Their Nonlinear Optical Properties	183
<i>M.J. Nystrom, B.W. Wessels, J. Chen, D. Studebaker, T.J. Marks, W.P. Lin, and G.K. Wong</i>	
Thin Film Epitaxial Oxide Optical Waveguides	189
<i>D.K. Fork, F. Armani-Lepplingard, J.J. Kingston, and G.B. Anderson</i>	
Heteroepitaxy and Waveguide Formation for Solution Deposited LiNbO₃ Thin Layers	201
<i>P.G. Clem and D.A. Payne</i>	

PART IV: Er-DOPED INORGANIC THIN FILMS

*Fabrication of Er Doped Glass Films as Used in Planar Optical Waveguides	209
<i>J.V. Gates, A.J. Bruce, J. Shmulovich, Y.H. Wong, G. Nykolak, M.R.X. Barros, and R. Ghosh</i>	
The Effect of Co-Dopants on the Photoluminescence of Er³⁺ in Silicon	217
<i>J.J. Pradissitto, M. Federighi, C.W. Pitt, W.P. Gillin, A.G. James, and R.J. Wilson</i>	
Non-Radiative Competition in the Excitation of Erbium Implanted Silicon Light Emitting Devices	223
<i>T. Taskin, Q. Huda, A. Scholes, J.H. Evans, A.R. Peaker, P. Hemment, C. Jeynes, and Z. Jafri</i>	
Enhanced Photoluminescence from Erbium-Doped GaP Microdisk Resonator	229
<i>D.Y. Chu, X.Z. Wang, W.G. Bi, R.P. Espindola, S.L. Wu, B.W. Wessels, C.W. Tu, and S.T. Ho</i>	
Characterization of Magneto-Optical Rare Earth-Doped InGaAsP Thin Films on InP	235
<i>B.J. Stadler, K. Vaccaro, A. Davis, E.A. Martin, G.O. Ramseyer, and J.P. Lorenzo</i>	

*Invited Paper

Plasma Synthesis of Rare Earth Doped Integrated Optical Waveguides	241
<i>S. Raoux, S. Anders, K.M. Yu, I.C. Ivanov, and I.G. Brown</i>	
High Concentration Erbium Implantation of Epitaxially Grown CaF₂/Si Structures	247
<i>S. Raoux, A.S. Barriere, H.J. Lozykowski, and I.G. Brown</i>	
PART V: <u>INORGANIC THIN FILM WAVEGUIDES</u>	
Waveguides Fabricated in Fused Silica by Germanium Ion Implantation at Varying Doses	255
<i>Patrick W. Leech and Mark C. Ridgway</i>	
Time-Dependent SHG in Thin Film Germanium-Doped Silica Waveguides	261
<i>I. Dajani, J.J. Kester, P.M. Ranon, M.L. Brauer, and D.J. McGillen</i>	
Ion Synthesis of Colloidal Silver Nanoclusters in the Organic Substrate	267
<i>A.L. Stepanov, S.N. Abdullin, R.I. Khaibullin, V.F. Valeev, Yu.N. Osin, V.V. Bazarov, and I.B. Khaibullin</i>	
Micro-Raman Study of Sol-Gel Grown PMN-PT Thin Films	273
<i>E. Ching-Prado, R.W. Tao, A.R. Guo, R.S. Katiyar, and A.S. Bhalla</i>	
Optical Properties of Sol-Gel (Pb,Lu)TiO₃ Thin Films for Waveguide Application	279
<i>Byeong-Soo Bae, Won-Jong Lee, Kwang-Soo No, Dae-Sung Yoon, and Sung-Uk Kim</i>	
Author Index	287
