# The Theory and Applications of Reaction-Diffusion Equations

Patterns and Waves

Second Edition

CLARENDON PRESS · OXFORD  
1996

# Contents

---

<b>Introduction .....</b>	<b>1</b>
---------------------------	----------

## **1. Basic considerations**

1.1 Introduction.....	4
1.2 General balance laws .....	6
Box A: The Fokker-Planck equation.....	8
Box B: Variational derivatives and gradient systems.....	12
1.3 A scalar equation.....	15
1.4 Equilibria and linear stability.....	17
Box C: Solvability .....	22
Box D: The spectra of some differential operators .....	30
1.5 A travelling wave.....	34
Box E: Group invariant solutions .....	39
1.6 Local existence theory.....	43
Box F: Analytic semigroups.....	40
1.7 Blow-up.....	52
1.8 Comparison principles .....	54
1.9 Invariant regions .....	56

## **2. Pattern formation**

2.1 Introduction .....	67
2.2 Turing instability and local bifurcation .....	68
Box G: Bifurcation theory .....	82
2.3 Transition layers .....	86
Box H: Matched asymptotic expansions .....	96
2.4 Oscillatory patterns .....	99

## **3. Plane waves**

3.1 Introduction .....	114
3.2 Stability .....	118
3.3 Excitable systems .....	122
3.4 Waves with transition layers.....	126
3.5 Smoothing out shocks .....	140
3.6 Piecewise linear models.....	146

**4. A geometrical theory for waves**

4.1	Introduction .....	157
4.2	Spirals and scrolls .....	158
4.3	Geometrical theory .....	165
	Box I: The eikonal equation .....	166
4.4	Stable stationary waves .....	174
4.5	Spiral waves.....	177
	Box J: The Belousov-Zhabotinsky reaction.....	183
4.6	Toroidal scroll waves .....	184

**5. Nonlinear dispersal mechanisms**

5.1	Introduction .....	188
	Box K: Incompressible fluid flow.....	192
5.2	Chemotaxis .....	194
5.3	Aggregation in population biology .....	201
5.4	Nonlinear diffusion .....	214
5.5	More travelling waves .....	224

**6. Flux driven waves in geochemistry**

6.1	Introduction .....	228
6.2	Geochemical systems.....	229
6.3	Single wave fronts .....	231
6.4	Multiple wave fronts .....	236
6.5	Non-planar flux driven waves.....	241
6.6	Frontal instability and fingering for fully coupled systems .....	251

<b>Notation .....</b>	263
-----------------------	-----

<b>Bibliography.....</b>	265
--------------------------	-----

<b>Index.....</b>	271
-------------------	-----
