# CONTENTS

## Part I

### AN INTRODUCTION TO IMMUNOBIOLOGY

- 1:1–1:32 **Chapter 1 Basic Concepts in Immunology**  
 The components of the immune system.  
 Principles of innate and adaptive immunity.  
 Recognition and effector mechanisms of adaptive immunity.
- 2:1–2:56 **Chapter 2 The Induction, Measurement, and Manipulation of the Immune Response**  
 The induction and detection of immune responses.  
 The measurement and use of antibodies.  
 The study of lymphocytes.  
 Immunogenetics: the major histocompatibility complex.  
 Analyzing immune responses in intact organisms.  
 The manipulation of the immune system.

## Part II

### THE RECOGNITION OF ANTIGEN

- 3:1–3:42 **Chapter 3 Structure of the Antibody Molecule and Immunoglobulin Genes**  
 The structure of a typical antibody molecule.  
 The interaction of the antibody molecule with specific antigen.  
 The generation of diversity in the humoral immune response.  
 Structural variation in immunoglobulin constant regions.  
 The B-cell antigen receptor and B-cell activation.
- 4:1–4:48 **Chapter 4 Antigen Recognition by T Lymphocytes**  
 The generation of T-cell ligands.  
 The major histocompatibility complex of genes: organization and polymorphism.  
 The T-cell receptor complex.

## Part III

### THE DEVELOPMENT OF LYMPHOCYTE REPERTOIRES

- 5:1–5:29 **Chapter 5 The Development of B Lymphocytes**  
 Generation of B cells.  
 Selection of B cells.  
 B-cell heterogeneity.
- 6:1–6:33 **Chapter 6 The Thymus and the Development of T Lymphocytes**  
 The development of T cells in the thymus.

T-cell receptor gene rearrangements and receptor expression.

Positive and negative selection of T cells.

## **Part IV THE ADAPTIVE IMMUNE RESPONSE**

### **7:1–7:41 Chapter 7 T-Cell Mediated Immunity**

The production of armed effector T cells.

General properties of armed effector T cells.

T-cell mediated cytotoxicity.

Macrophage activation by armed inflammatory CD4 T cells.

### **8:1–8:52 Chapter 8 The Humoral Immune Response**

Antibody production by B lymphocytes.

The distribution and functions of isotypes.

Fc receptor-bearing accessory cells in humoral immunity.

The complement system in humoral immunity.

## **Part V THE IMMUNE SYSTEM IN HEALTH AND DISEASE**

### **9:1–9:46 Chapter 9 Host Defense Against Infection**

Infection and innate immunity.

Non-adaptive host responses to infection.

Adaptive immunity to infection.

Immunological memory.

### **10:1–10:33 Chapter 10 Failures of Host Defense Mechanisms**

Persistent infection in normal individuals.

Inherited immunodeficiency diseases.

Acquired immune deficiency syndrome.

### **11:1–11:48 Chapter 11 Immune Responses in the Absence of Infection**

Allergy: responses to innocuous substances.

Autoimmunity: responses to self antigens.

Transplant rejection: responses to alloantigens.

Tolerance and response to self and non-self tissues.

### **12:1–12:35 Chapter 12 Control and Manipulation of the Immune Response**

Intrinsic regulation of immunity.

Extrinsic regulation of unwanted immune responses.

Using the immune response to attack tumors.

Manipulating the immune response to fight infection.

### **A:1–A:10 Appendices**

### **B:1 Biographies**

### **G:1–G:20 Glossary**

### **I:1–I:24 Index**
