# Contents

<b>Preface</b>	<b>xi</b>
<b>List of Figures</b>	<b>xv</b>
<b>List of Tables</b>	<b>xix</b>
<b>List of Contributors</b>	<b>xxi</b>
<b>1 Recent Developments in Fuzzy Logic and Intelligent Technologies</b>	
<b>H.-J. Zimmermann</b>	<b>1</b>
1.1 Introduction . . . . .	1
1.1.1 Historical Sketch . . . . .	1
1.1.2 Application Areas . . . . .	1
1.2 Recent Developments . . . . .	3
1.2.1 Methodological Developments . . . . .	3
1.2.2 New Application Areas . . . . .	3
1.2.3 Tools . . . . .	3
1.3 Future Perspectives . . . . .	4
References . . . . .	4
<b>2 Handling Priority and Preference in Constraint Satisfaction Problems: A Possibility Theory-Based Approach</b>	
<b>D. Dubois et al.</b>	<b>5</b>
2.1 Introduction . . . . .	5
2.2 Representing Flexible Constraints . . . . .	7
2.2.1 Fuzzy Model of a Soft Constraint . . . . .	8
2.2.2 Fuzzy Model of a Prioritized Constraint . . . . .	8
2.2.3 Example . . . . .	11
2.2.4 Operations on Fuzzy Relations . . . . .	13
2.2.5 Prioritized Constraints with Safeguard . . . . .	15

2.3	Stating and Solving Fuzzy Constraint Satisfaction Problems . .	17
2.3.1	Definition . . . . .	17
2.3.2	Discussion . . . . .	18
2.3.3	A Generic Solving Method for FCSPs . . . . .	20
2.3.4	Non-monotonicity in FCSPs . . . . .	23
2.4	Local Consistency in FCSPs . . . . .	24
2.4.1	Local Consistency for Fuzzy Constraints . . . . .	25
2.4.2	Network Consistency Algorithms for FCSPs . . . . .	26
2.5	Conclusion . . . . .	27
	References . . . . .	28
<b>3</b>	<b>Knowledge from Data using Fril and Fuzzy Methods</b>	
	<b>J.F. Baldwin</b>	<b>33</b>
3.1	Introduction . . . . .	33
3.2	An Intelligent Data Browser in Fril . . . . .	36
3.3	Essentials of Mass Assignment Theory . . . . .	40
3.4	Fuzzy Sets from Data . . . . .	42
3.5	Simple Example . . . . .	44
3.6	Another Simple Example . . . . .	53
3.7	A Golf Problem . . . . .	63
3.8	Other Examples . . . . .	65
3.9	A Neuro Fuzzy Method . . . . .	67
3.10	Conclusions . . . . .	74
	References . . . . .	75
<b>4</b>	<b>Mission Management System for Multiple Autonomous Vehicles</b>	
	<b>N.J.W. Rayner and C.J. Harris</b>	<b>77</b>
4.1	Introduction . . . . .	77
4.2	Case Based Planning . . . . .	80
4.3	Fuzziness . . . . .	81
4.3.1	Neurofuzzy Interpretation . . . . .	83
4.3.2	Curse of Dimensionality . . . . .	83
4.4	Adaptive Planning . . . . .	84
4.4.1	Operators and Causal Models . . . . .	84
4.5	Strategic Knowledge and Planning . . . . .	86
4.5.1	Merging Strategic Knowledge . . . . .	87
4.5.2	Abstracting Strategic Knowledge . . . . .	88
4.6	System Architecture and Implementation . . . . .	88
4.7	MIAV Mission Management System Architecture . . . . .	92
4.7.1	The Meta-Controller . . . . .	92
4.7.2	Planner Architecture . . . . .	93
4.7.3	Adapter Architecture . . . . .	93
4.8	Conclusions . . . . .	95
	References . . . . .	97

<b>5</b>	<b>A Fuzzy Data Browser in Fril</b>	
	<b>J.F. Baldwin and T.P. Martin</b>	<b>101</b>
5.1	Introduction . . . . .	101
5.2	Mass Assignments . . . . .	103
5.3	Key Features of Fril . . . . .	105
	5.3.1 Uncertainty in Data Values . . . . .	106
	5.3.2 Semantic Unification . . . . .	107
	5.3.3 Uncertainty in Facts . . . . .	108
	5.3.4 Rules . . . . .	109
	5.3.5 Evidential Logic Rule . . . . .	110
	5.3.6 Additional Features . . . . .	110
5.4	Fuzzy Data Browser . . . . .	111
	5.4.1 Example . . . . .	112
	5.4.2 Use of the Fuzzy Data Browser . . . . .	113
5.5	A Real-World Problem — Database of Experimental Measurements . . . . .	114
	5.5.1 The Problem . . . . .	114
	5.5.2 Use of the Fuzzy Data Browser . . . . .	116
5.6	Summary . . . . .	122
	References . . . . .	122
<b>6</b>	<b>Adaptive Fuzzy Systems for Modelling Static and Dynamic Processes</b>	
	<b>H. Bersini and V. Gorrini</b>	<b>125</b>
6.1	Introduction . . . . .	125
6.2	A Direct Adaptive Fuzzy Controller . . . . .	126
	6.2.1 Definition . . . . .	126
	6.2.2 A Classical Controller . . . . .	127
	6.2.3 A PID Controller . . . . .	128
	6.2.4 A Recurrent Fuzzy System . . . . .	129
6.3	EFUSS — A Self-Structuring Fuzzy Systems for Function Approximation . . . . .	130
6.4	Conclusions . . . . .	132
	References . . . . .	133
<b>7</b>	<b>Fuzzy Logic in Diagnosis: Possibilistic Networks</b>	
	<b>M. Ulieru</b>	<b>135</b>
7.1	Introduction . . . . .	135
7.2	The Possibilistic Network as a Diagnostic Model . . . . .	137
7.3	The Particularities of Possibilistic Inference in Diagnosis . . . . .	140
	7.3.1 General Case . . . . .	140
	7.3.2 Significant Particularisations . . . . .	142
7.4	Illustration on a Simple Example . . . . .	143
	7.4.1 General Case . . . . .	143
	7.4.2 Simplified Reasoning on the Tree . . . . .	145
	7.4.3 Significant Particular Cases . . . . .	147

7.5	Extension to Network Structures . . . . .	148
7.5.1	Polytrees . . . . .	148
7.5.2	Multiply Connected Networks . . . . .	150
7.5.3	Cyclic Networks . . . . .	151
7.6	Illustration and Investigations on a Tutorial Example . . . . .	153
7.6.1	The Diagnostic Model . . . . .	153
7.6.2	Approximate Reasoning on the Possibilistic Tree . . . . .	156
7.6.3	Aggregation on the Tree's Structure . . . . .	158
7.6.4	Validation . . . . .	159
7.6.5	Implementation Considerations . . . . .	163
7.6.6	Managing a Fault's Dynamics . . . . .	165
7.7	Conclusions . . . . .	171
	References . . . . .	172
<b>8</b>	<b>Fuzzy Linguistic Reasoning and Sentence Interpretation</b>	
	<b>J.F. Baldwin and B.W. Pilsworth</b>	<b>177</b>
8.1	Introduction . . . . .	177
8.2	Fuzzy Linguistic Reasoning . . . . .	178
8.3	Sentence Interpretation by Linguistic Processing . . . . .	182
	References . . . . .	184
<b>9</b>	<b>Customer Segmentation for Banks and Insurance Groups with Fuzzy Clustering Techniques</b>	
	<b>R. Weber</b>	<b>187</b>
9.1	Introduction . . . . .	187
9.2	Customer Segmentation — Problems and Potential . . . . .	187
9.2.1	Customer Segmentation in Financial Services . . . . .	188
9.2.2	Traditional Solutions and their Limits . . . . .	188
9.3	Methods for Improved Segmentation using Fuzzy Data Analysis	189
9.3.1	Basic Principles of Fuzzy Logic . . . . .	190
9.3.2	Data Analysis Based on Intelligent Techniques . . . . .	190
9.3.3	DataEngine — A Software-Tool for Intelligent Data Analysis . . . . .	190
9.4	Configuration and Results . . . . .	191
9.5	Results and Benefits . . . . .	194
9.6	Future Prospects . . . . .	195
	References . . . . .	195
<b>10</b>	<b>Tuning of Fuzzy Controllers: Case Study in a Column Flotation Pilot Plant</b>	
	<b>M.T. Carvalho et al.</b>	<b>197</b>
10.1	Introduction . . . . .	197
10.2	Test Program . . . . .	199
10.3	Experimental Work . . . . .	200
10.4	Results and Discussion . . . . .	201
10.4.1	Fuzzification . . . . .	202

10.4.2 Rule Base . . . . .	207
10.4.3 Fuzzy Inference . . . . .	208
10.4.4 Defuzzification . . . . .	210
10.5 Conclusions . . . . .	210
References . . . . .	211
<b>11 Exploratory Data Processing using a Fuzzy Generalization of the GUHA Approach</b>	
<b>M. Holeňa</b>	<b>213</b>
11.1 Introduction . . . . .	213
11.2 GUHA fundamentals recalled . . . . .	214
11.3 Fuzzy Hypotheses for Likely and Suspicious Implications . . . . .	217
11.4 Fuzzy-Implicational Quantifiers . . . . .	224
11.5 Conclusion . . . . .	227
References . . . . .	228
<b>12 Fuzzy Logic Controller Based on Standard Operational Amplifiers</b>	
<b>D. Kovačević and A. Kovačević</b>	<b>231</b>
12.1 Introduction . . . . .	231
12.2 Operational Amplifiers Support Operations on Fuzzy Sets . . . . .	232
12.2.1 Union . . . . .	232
12.2.2 Intersection . . . . .	235
12.2.3 Complement . . . . .	236
12.3 Grade Controllable Membership Function Circuits . . . . .	237
12.4 SFCL . . . . .	240
12.5 Conclusion . . . . .	243
References . . . . .	244
<b>13 Fuzzy Sets and Community Transport</b>	
<b>R.I. John and S.C. Bennett</b>	<b>245</b>
13.1 Introduction . . . . .	245
13.2 Knowledge Acquisition and Representation . . . . .	246
13.3 Fuzzy Composition . . . . .	248
13.4 Findings . . . . .	250
13.5 Conclusions . . . . .	252
References . . . . .	253
