Contents

	Preface	**ix**
PART I	**INTRODUCTION TO SCREEN DESIGN FOR THE GRAPHICAL USER INTERFACE**	**1**
1	**The Importance of Good Screen Design**	**3**
	The Popularity of Graphics	4
	The Importance of Good Screen Design	4
	The Purpose of This Book	6
	A Brief History of the Human-Computer Interface	7
	A Look Ahead in This Book	12
2	**Characteristics of a Graphical User Interface**	**13**
	Definition of a Graphical User Interface	13
	The Concept of Direct Manipulation	13
	Graphical Systems: Advantages and Disadvantages	15
	Characteristics of the Graphical User Interface	23
	Some Current Graphical Systems	28
	Principles of Graphical User Interface Design	34
	The Design Process	46
PART II	**THE GUI SCREEN DESIGN PROCESS**	**51**
Step 1. Know Your User or Client		**53**
	Understanding How People Interact with Computers	53
	Important Human Characteristics in Design	57

The User's Knowledge and Experience 64
The User's Tasks and Jobs 67
The User's Psychological Characteristics 70
The User's Physical Characteristics 71
Methods for Gaining Understanding of Users 71

Step 2. Understand the Business Function 73

Business Definition and Requirements Analysis 73
Determining Basic Business Functions 79
Task Analysis 79
Developing Conceptual Models 80
Design Standards or Style Guides 85
Usability Goals 87
Training and Documentation Needs 90

Step 3. Understand the Principles of Good Screen Design 91

Human Considerations in Screen Design 92
Hardware Considerations in Screen Design 186
Software Considerations in Screen Design 187
Examples of Screens 193

Step 4. Select the Proper Kinds of Windows 208

Window Characteristics 208
Components of a Window 213
Window Presentation Styles 220
Types of Windows 224
Organizing Window Functions 238
Window Operations 242

Step 5. Develop System Menus 249

Menu Design Guidelines 250
Kinds of Menus 271
Default Menu Items 295
Functions Not Represented by Default Items 297
Menu Examples 299

Step 6. Select the Proper Device-Based Controls 303

Characteristics of Device-Based Controls 304
Selecting the Proper Device-Based Controls 314

Step 7. Choose the Proper Screen-Based Controls 320

Operable Controls 321
Combination Entry/Selection Controls 387
Other Operable Controls 396

Custom Controls 413
Presentation Controls 414
Windows 95 Controls 420
Selecting the Proper Controls 421
Examples 431

Step 8. Organize and Lay Out Windows 441

Identifying Other Window Components 441
Organizing and Laying Out Screens 443
Screen Examples 467

Step 9. Choose the Proper Colors 486

Color—What Is It? 487
Color Uses 489
Possible Problems with Color 491
Color—What the Research Shows 494
Color and Human Vision 495
Choosing Colors 496
Choosing Colors for Textual Graphic Screens 509
Choosing Colors for Statistical Graphics Screens 514
Uses of Color to Avoid 518

Step 10. Create Meaningful Icons 521

Kinds of Icons 521
Characteristics of Icons 523
Usability Influences 524
Choosing Window Icons 527
Screen Design Guidelines 538

Step 11. Provide Effective Messages, Feedback, Guidance, and Language Translation 540

Words, Messages, and Text 540
Providing the Proper Feedback 553
Guidance and Assistance 559
International Considerations 581

Step 12. Test, Test, and Retest 591

Purpose of Testing 592
Importance of Testing 592
Prototypes 594
A Test Plan 596
Kinds of Tests 597
Test Participants 599
Test Facility 600
Test Conduct and Data Collection 600

Analyze, Modify, Retest, and Evaluate 603
A Final Word 603
