
The Chemistry of Aqua Ions

Synthesis, structure and reactivity

**A tour through the
periodic table of the elements**

David T. Richens, C. Chem M.R.S.C.

Contents

Preface	vii
Chapter 1 Introduction	1
Chapter 2 Main Group Elements: Groups 1, 2, 13, 14, 15, 16, 17 and 18	121
Chapter 3 Group 3 Elements: Scandium, Yttrium, the Lanthanides and Actinides	171
Chapter 4 Group 4 Elements: Titanium, Zirconium and Hafnium . .	207
Chapter 5 Group 5 Elements: Vanadium, Niobium and Tantalum	223
Chapter 6 Group 6 Elements: Chromium, Molybdenum and Tungsten	259
Chapter 7 Group 7 Elements: Manganese, Technetium and Rhenium	337
Chapter 8 Group 8 Elements: Iron, Ruthenium and Osmium	363
Chapter 9 Group 9 Elements: Cobalt, Rhodium and Iridium	439
Chapter 10 Group 10 Elements: Nickel, Palladium and Platinum	491
Chapter 11 Group 11 Elements: Copper, Silver and Gold	509
Chapter 12 Group 12 Elements: Zinc, Cadmium and Mercury	539
Appendices	577

Appendix 1	Transition Metal Ion Electronic Spectra: Electron Configurations and Term Symbols	569
Appendix 2	Effective Ionic Radii (ER, pm) as Used Throughout the Book	577
Appendix 3	Single Ion Hydration Enthalpies (kJ mol^{-1})	583
Index		585
