

Karl-Dietrich Gundermann · Frank McCapra

# Chemiluminescence in Organic Chemistry

With 30 Figures

Springer-Verlag  
Berlin Heidelberg New York  
London Paris Tokyo

# Table of Contents

<i>I.</i>	<i>Introduction</i> . . . . .	1
<b>A.</b>	<b>Physiochemical Background</b> . . . . .	5
<i>II.</i>	<i>General Concepts in Chemiluminescence</i> . . . . .	7
II.1	Chemiluminescence Efficiency . . . . .	7
II.1.1	Energetics of the Reactions . . . . .	8
II.1.2	Formation of the Excited State . . . . .	9
II.1.2.1	The Reaction Co-ordinate . . . . .	9
II.1.2.2	Molecular Geometry . . . . .	9
II.1.2.3	Spin Restrictions . . . . .	9
II.1.2.4	Symmetry Restrictions . . . . .	10
II.1.2.5	Potential Energy Surfaces . . . . .	10
II.2	Electron Transfer Reactions . . . . .	11
II.3	Singlet Oxygen as a Cause of Chemi- and Bioluminescence; the Role of Triplet Oxygen . . . . .	12
II.4	References (for Preface, Chaps. I and II) . . . . .	15
<b>B.</b>	<b>Chemiluminescent Reactions</b> . . . . .	17
<i>III.</i>	<i>Autoxidation Reactions</i> . . . . .	19
III.1	Hydrocarbons . . . . .	19
III.1.1	The Excitation Step . . . . .	22
III.1.2	Polymers . . . . .	24
III.1.3	Base-catalysed Autoxidation of Carbonyl Com- pounds . . . . .	26
III.1.4	Grignard Compounds . . . . .	28
III.1.5	Inhibitors . . . . .	30
III.1.6	Miscellaneous Oxidation Reactions . . . . .	30
III.1.6.1	Oxidative Chemiluminescence of Coals . . . . .	30
III.1.6.2	Cysteine and Glutathione . . . . .	30
III.2	References . . . . .	31
<i>IV.</i>	<i>Chemiluminescent Peroxide Decompositions, I (except Dioxetans)</i> . . . . .	33
IV.1	Peroxide Chemiluminescence by CIEEL . . . . .	33
IV.2	Acyclic sec.-Peroxy-esters . . . . .	35

IV.3	Dioxetanones . . . . .	37
IV.4	Diphenoyl Peroxide . . . . .	41
IV.5	Other Cyclic Diacyl Peroxides. Phthaloyl Peroxide . . . . .	42
IV.6	Chemiluminescence of o-Dicarboxylic Acid Chlorides . . . . .	45
IV.7	Other Cyclic Peroxides . . . . .	46
IV.8	Acene Endo-Peroxides . . . . .	48
IV.9	Polyhydroxy-phenol- and Purpurogallin Chemiluminescence . . . . .	50
IV.10	References . . . . .	51
V.	<i>Peroxide Decompositions, II: Dioxetans</i> . . . . .	54
V.1	Simple Dioxetans . . . . .	55
V.2	Excitation Yields and Multiplicity . . . . .	56
V.3	Measurement of Singlet and Triplet Yields . . . . .	56
V.4	Thermochemistry and Kinetics . . . . .	57
V.5	Mechanism of Excited State Formation from Dioxetans . . . . .	58
V.5.1	The Diradical Mechanism . . . . .	59
V.5.2	The Concerted or Electron Transfer Mechanism . . . . .	60
V.6	Quenching Reactions of Dioxetans . . . . .	65
V.7	Symmetry Forbidden Reactions in Chemiluminescence . . . . .	66
V.8	References . . . . .	67
VI.	<i>Peroxy Oxalate Chemiluminescence</i> . . . . .	69
VI.1	Requirements for Oxalate Chemiluminescence . . . . .	70
VI.2	The Mechanism . . . . .	74
VI.3	References . . . . .	76
VII.	<i>Luminol and Related Compounds</i> . . . . .	77
VII.1	Structure and Activity of Phthalic Acid Hydrazides . . . . .	77
VII.1.1	Miscellaneous Cyclic Hydrazides . . . . .	80
VII.1.1.1	Compounds with Multiple Hydrazide Groups . . . . .	80
VII.2	The Emitting Species . . . . .	82
VII.3	Energy Transfer in Luminol Type Chemiluminescence . . . . .	85
VII.4	Solvent Effects . . . . .	88
VII.5	Effect of Micelle-forming Agents . . . . .	88
VII.6	Catalyst Activity . . . . .	89
VII.7	The Mechanism of Luminol Chemiluminescence . . . . .	89
VII.7.1	Ionic Species Derived from Luminol . . . . .	90
VII.7.2	Diazaquinone Chemiluminescence . . . . .	91
VII.7.3	Intermediate Peroxides . . . . .	96
VII.7.4	1,4-Dialkoxy Phthalazines as Potential Precursors of the Luminol-“endoperoxide” . . . . .	99

Table of Contents

VII.7.5 Luminol Radical Anions as Intermediates (Pulse Radiolysis Experiments) . . . . .	99
VII.7.6 Present State of Hypotheses on Luminol Chemiluminescence Mechanism . . . . .	101
VII.8 Monoacylhydrazides . . . . .	104
VII.8.1 Chemiluminescence Mechanism of Monoacylhydrazides . . . . .	105
VII.9 References . . . . .	106
VIII. <i>Acridine Derivatives</i> . . . . .	109
VIII.1 Lucigenin . . . . .	109
VIII.1.1 The Reaction Mechanism . . . . .	109
VIII.1.2 Energy Transfer in Lucigenin Chemiluminescence . . . . .	113
VIII.1.3 Influence of Micelle Forming Agents on the Lucigenin Reaction . . . . .	114
VIII.2 Acridinium Salts and Acridans . . . . .	114
VIII.3 References . . . . .	117
IX. <i>Other Nitrogen-Containing Compounds-Imine Peroxides</i> . . . . .	119
IX.1 Tetrakis-dialkylaminoethylenes . . . . .	119
IX.2 Bis-Isoquinolinium Salts . . . . .	120
IX.3 Lophine and Related Compounds . . . . .	121
IX.4 Indole Derivatives . . . . .	122
IX.5 Chemiluminescent Schiff Bases . . . . .	123
IX.6 References . . . . .	123
X. <i>Miscellaneous Compounds</i> . . . . .	125
X.1 Chlorinated Cyclic Carbonates, Glycolides and Ethers . . . . .	125
X.2 Sulfuranes . . . . .	126
X.3 Thioesters . . . . .	127
X.4 Vinyl Halides . . . . .	127
X.5 Strained Hydrocarbon Isomerisation . . . . .	128
X.6 Metal Phosphides . . . . .	128
X.7 References . . . . .	129
XI. <i>Electron Transfer Chemiluminescence</i> . . . . .	130
XI.1 Electrogenerated Chemiluminescence (ECL) . . . . .	130
XI.1.1 Energy-sufficient and Energy-deficient ECL . . . . .	132
XI.1.1.1 Energy-deficient ECL . . . . .	133
XI.1.2 Chemiluminescent Reactions of Electrogenerated Radical Anions with Organic Halides . . . . .	136

XI.1.3	Efficiency of ECL Reactions . . . . .	136
XI.1.4	Ruthenium Chelate Complexes . . . . .	137
XI.2	Chemiluminescent Reactions of Radical Anions with Various Electron Acceptors . . . . .	140
XI.2.1	Wurster's Blue-Type Compounds, subst. Triphenyl- amines . . . . .	141
XI.2.2	Electron Transfer Reactions in Metal Complexes . . . . .	144
XI.3	Distinctions between Radical Mechanisms for the Generation of Excited States . . . . .	145
XI.4	References . . . . .	146
<b>C.</b>	<b>Bioluminescence . . . . .</b>	<b>149</b>
<i>XII.</i>	<i>Bioluminescence as a Special Case of Chemiluminescence . . . . .</i>	<i>151</i>
XII.1	Bioluminescent Organisms . . . . .	151
XII.1.1	The Firefly . . . . .	152
XII.1.2	Models for Firefly Luciferin . . . . .	153
XII.1.3	Cypridina and Coelenterate Bioluminescence . . . . .	154
XII.1.4	Bacterial Bioluminescence . . . . .	156
XII.2	General Models for Bioluminescent Reactions . . . . .	158
XII.2.1	Electron-rich Dioxetans . . . . .	158
XII.2.2	Acridans as Model Compounds . . . . .	159
XII.2.3	Models for the Excitation Step . . . . .	160
XII.3	Other Bioluminescent Organisms . . . . .	162
XII.4	References . . . . .	162
<b>D.</b>	<b>Applications . . . . .</b>	<b>165</b>
<i>XIII.</i>	<i>Analytical and Other Applications of Chemi- and Bioluminescence . . . . .</i>	<i>167</i>
XIII.A	Analytical Applications . . . . .	167
XIII.A.1	General and Inorganic Chemistry . . . . .	168
XIII.A.1.1	Acid-Base-Titrations . . . . .	168
XIII.A.1.2	Redox Titrations . . . . .	168
XIII.A.1.2.1	Oxidants . . . . .	168
XIII.A.1.2.1.1	Molecular Oxygen; Ozone . . . . .	170
XIII.A.1.3	Metal Ions . . . . .	170
XIII.A.1.4	Negative (inhibitory) Metal Catalysis . . . . .	171
XIII.A.1.5	Bioluminescent Metal Assays . . . . .	172
XIII.A.2	Organic Compounds . . . . .	173
XIII.A.2.1	Amino Acids . . . . .	173
XIII.A.2.2	Oximes . . . . .	173
XIII.A.2.3	Organophosphorus Compounds . . . . .	173

Table of Contents

XIII.A.2.4	Phenols, Naphthols . . . . .	174
XIII.A.2.5	Autoxidations . . . . .	174
XIII.A.2.5.1	Oxidative Degradation of Molecules Con- taining Long-Chain Aliphatic Residues . .	174
XIII.A.2.5.2	Efficiency of Radical Chain Inhibitors and Initiators . . . . .	175
XIII.A.2.5.3	Determination of Low Concentrations of Molecular Oxygen; the "Oxygen Drop" . .	176
XIII.A.2.5.4	Other Methods of Oxygen Determination .	177
XIII.A.2.6	Glucose . . . . .	177
XIII.A.2.7	Alcohols and Aldehydes . . . . .	177
XIII.A.3	Biological Systems . . . . .	178
XIII.A.3.1	ATP Assay with Firefly Bioluminescence . .	178
XIII.A.3.1.1	Scope of the ATP Assay . . . . .	179
XIII.A.3.1.2	Creatine Kinase and Pyruvate Kinase . . .	179
XIII.A.3.2	Analytical Applications of Bacterial Bio- luminescence . . . . .	179
XIII.A.3.2.1	Activity of Lipases . . . . .	179
XIII.A.3.2.2	Mutagenic Activity . . . . .	180
XIII.A.3.2.3	NAD (P)H-Assay . . . . .	180
XIII.A.4	Phagocytosis . . . . .	180
XIII.A.5	Chemiluminescent Immunoassays . . . . .	181
XIII.A.5.1	Drug Assay . . . . .	183
XIII.B	Other Applications . . . . .	185
XIII.B.1	Emergency Lighting . . . . .	185
XIII.B.2	Signalling and Marking . . . . .	186
XIII.B.3	Special Display Devices . . . . .	186
XIII.B.4	As Indicator Systems in Processes Involving Oxidants	186
XIII.C	References . . . . .	186
XIV.	<i>Instrumentation</i> . . . . .	192
XIV.1	References . . . . .	193
XV.	<i>Chemiluminescent Demonstrations</i> . . . . .	195
XV.1	References and Sources of Materials . . . . .	201
XVI.	<i>Chemiluminescence in the Future</i> . . . . .	203
	<i>Appendix: Table of Luminol Type Hydrazides</i> . . . . .	204
	<i>Subject Index</i> . . . . .	209
