Part I Introduction	1
Law and Technology	1
Accelerated Technology	2
Legal Deliberations: Reasoning From the Past	3
Undermining the Power of Legal Analogies	6
Evisceration of Old Products, Services, and Distribution Channels	6
Shifting Technology	7
Conflation of Human, Natural, and Technological Agents	7
The Loss of Shared Assumptions	8
Public and Private Law	11
Part II Legal Assumptions	15
Chapter 1 The Reason of the Law: Community Meaning in the Conduct of the Legal System	19
The Role of Community-Based Standards	20
The Evisceration of a Cardinal Standard	22
The Law Unchecked by a Common Sense	23
Toward Community Standards	25
Part III The Collision of Law and Technology	27
Trade Secrets	27
Patents	28
Trademarks	28
Copyright	29
Chapter 2 Molten Media and the Infiltration of the Law	31
Intellectual Property: A Spectrum of Protection	32
Molten Media	33

The Reach to Reality	34
Owning Reality	36
The Infirm Law	36
Conclusions: Climbing Out of the Legal Pit	37
Chapter 3 Technology Rights in the International Arena:	
The Fall of Public Law and the Rise of Private Fiat	43
The Global Content	45
Global Products	45
Global Companies	45
Disparate Protection of Global Intellectual Property Rights	46
Global Products and Parochial Law	47
Chapter 4 The Uneasy Treaty of Technology and Law: A Summary	
of Legal Issues for the Virtual Reality Industry	53
The Industry	53
VR: The Entertainment Launch	54
The Computer	54
VR: Rapidly Developing Technology	55
VR: Unique Problems	56
Conclusion: A Tale of Two Codes	58
Chapter 5 Data Morphing: Ownership, Copyright, and Creation	61
Introduction	61
Basic Propositions	62
Basic Problems	63
Authorship	63
Fair Use	64
Idea/Expression	65
Similarity of Expression: Key to Infringement	65
Categories of Mutation: A Diversion	67
The Context of Meaning	70
Copyrighting the Universe: Property Rights	
in Virtual Reality	71
Chapter 6 Copyright Issues on the Net: A Sampler	75
The Mechanism of a Web Page	75
Law and Developing Technology: A Disjunction	76
Focus On Copyright	76
Ownership and Permissions	77
Joint Works	78
Fair Use	78
Implied Licenses	78

Web Link Liability	79
Contributory Infringement and Vicarious Liability	79
Part IV A Technical Interlude: Error in Computing Machinery	83
Chapter 7 Information Loss and Implicit Error in Complex Modeling Machines	87
Introduction	87
A General Description of Systems	88
Problems of Typical Parallel Systems	90
At Inception: Compilers	90
Problems in Concurrent Execution	90
General Problems of Hierarchical Systems	92
At Inception: Creating the Program	92
The Operation of a Hierarchical System	93
Turning to Cellular Gas Automata	96
Simulations and Models	97
Conclusion	98
Part V Law at the Man/Machine Interface	103
Chapter 8 Alters	111
Chapter 9 Bringing Up Programs	113
Chapter 10 The Encrypted Self: Fleshing Out the Rights of Electronic Personalities	117
Introduction	117
The Current Debate	118
Legal Fictions, New and Old	119
Residency: Cyberspace	122
The Exposure to Incursions	124
Predicates to Rights: Accountability and Identification	126
Epers in the Real World	128
Framing Rights to Illuminate the Public/Private Border in Cyberspace	129
Epers in the Virtual World	132
Epers, Persons, and Privacy	132
Chapter 11 Liability for Distributed Artificial Intelligences	137
Introduction	137
Complex Digital Systems	138
The Future of Intelligent Systems	141

The Developing Technology	144
Looking Back: The Classic Expert System	144
Looking Forward: Fluid Systems	147
The Unreliability of Software	149
Multiagent Networked Collaboration	151
Agents and Networked Viruses	153
Polymorphism and the Units of Programming Action	157
Summary Forecast	159
Causation in the Legal Domain	160
The Conundrum of Causation	160
The Tort System's Causation Analysis	162
Causation in the Digital Domain	168
An Example of an Intelligent Processing Environment	168
Unpredictable Pathology: Absolving Humans of Liability	174
Failure of Causation: Absolving Programs of Liability	176
Turing, Where Angels Fear to Tread	178
The Registry	179
A Comparison to Traditional Insurance	181
The Registry's Limitations	182
Perspectives	187
Part VI Crime and Punishment	197
Chapter 12 Recombinant Culture: Crime in the Digital Network	201
Introduction	201
Understanding Information	203
Parceling Out Information As Property	204
Faulty Transition to the New Network	206
Infinitely Mutable Data	206
Digital Networks	207
Interlude: State of the Net	209
Crime in a Phantasmagorical Terrain	211
Chapter 13 The Algorithm As Nuclear Weapon: Encryption and Export Laws	217
Part VII Technology, Society, and the Law	221
Chapter 14 Review of <i>Culture, Technology, and Creativity</i> <i>in the Late Twentieth Century</i>	227
Chapter 15 Implementing the First Amendment in Cyberspace	231

Early Developments: Regulating the Actions of the Government	231
Present Circumstance: The Fusion of Public and Private	233
The Rationale of Restriction	235
Forward: Transitions for the First Amendment	237
Chapter 16 Transfixed by the Electron Beam	241
Falling in Love With the Machine	244
Destroying the University in Order to Save It	247
Diamonds in the Rough	252
Computers and Copyright	253
Public and Private Selves	254
Part VII Terminus	257
About the Author	267
Index	269
