	Object Code Efficiency	104
	Subtle Differences Between C and C++	105
	Major Differences Between C and C++	108
	Fundamental Components for a C/C++	
	Program	110
	Five Elements of Good C Program Design	110
	A Simple C Program	111
	A Simple C++ Program	113
	Adding a User Interface to a C Program	113
	Adding a User Interface to a C++ Program	118
	Adding File I/O	120
	<b>6 Working with Data</b>	125
	Identifiers	126
	Keywords	128
	Standard C and C++ Data Types	129
	Characters	130
	Three Integers	132
	Unsigned Modifier	132
	Floating Point	134
	Enumerated	136
	And, the New C++ Type—bool	138
	Access Modifiers	139
	const Modifier	139
	#define Constants	140
	volatile Modifier	141
	const and volatile Used Together	141
	pascal, cdecl, near, far, and	
	huge Modifiers	142

pascal	142
cdecl	144
near, far, and huge	144
Data Type Conversions	145
Explicit Type Conversions Using the Cast Operator	147
Storage Classes	147
Variable Declarations at the External Level	148
Variable Declarations at the Internal Level	149
Variable Scope Review	151
Function Declarations at the External Level	151
Operators	152
Bitwise Operators	152
Left Shift and Right Shift	153
Increment and Decrement	154
Arithmetic Operators	156
Assignment Operator	156
Compound Assignment Operators	157
Relational and Logical Operators	159
Conditional Operator	162
Comma Operator	163
Understanding Operator Precedence Levels	163
Standard C and C++ Libraries	164

7 Program Control	173
Conditional Controls	174
if	174
if-else	176
Nested if-elses	179
if-else-if	180
The ?: Conditional Operator	182
switch-case	183
Combining if-else-if and switch	190
Loop Controls	192
for	193
while	198
do-while	201
break	203
continue	204
Combining break and continue	205
exit()	208
atexit()	211

	<b>8 Writing and Using Functions</b> . . . . .	215
	What is Function Prototyping? . . . . .	216
	The Syntax for Prototypes . . . . .	216
	Ways to Pass Actual Arguments . . . . .	219
	Storage Classes . . . . .	221
	Identifier Visibility Rules . . . . .	221
	Recursion . . . . .	222
	Function Arguments . . . . .	223
	Actual Versus Formal Parameters . . . . .	223
	void Parameters . . . . .	224
	char Parameters . . . . .	225
	int Parameters . . . . .	226
	float Parameters . . . . .	227
	double Parameters . . . . .	228
	Array Parameters . . . . .	229
	Function Return Types . . . . .	231
	void Return Type . . . . .	231
	char Return Type . . . . .	233
	bool Return Type . . . . .	234
	int Return Type . . . . .	235
	long Return Type . . . . .	235
	float Return Type . . . . .	239
	double Return Type . . . . .	240
	Command-Line Arguments . . . . .	241
	Alphanumeric . . . . .	242
	Integral . . . . .	243
	Real . . . . .	245
	Functions in C Versus C++ . . . . .	246
	When Is a Function a Macro? . . . . .	246
	Prototyping Multiple Functions with the Same Name . . . . .	247
	Functions with Varying-Length Formal Argument Lists . . . . .	249
	Things Not to Do with Functions . . . . .	251
	Attempting to Access Out of Scope Identifiers . . . . .	251
	External Versus Internal Identifier Access . . . . .	252
	Internal Versus External Identifier Access . . . . .	253
	It's Legal, But Don't Ever Do It! . . . . .	254
	Overriding Internal Precedence . . . . .	256
	<b>9 Arrays</b> . . . . .	259
	What Are Arrays? . . . . .	260

Array Properties	260
Array Declarations	261
Initializing Arrays	262
Default Initialization	262
Explicit Initialization	263
Unsize Initialization	264
Accessing Array Elements	265
Calculating Array Dimensions	268
Array Index Out of Bounds	270
Output and Input of Strings	271
Multidimensional Arrays	274
Arrays as Function Arguments	278
Passing Arrays to C Functions	278
Passing Arrays to C++ Functions	280
String Functions and Character Arrays	287
gets(), puts(), fgets(), fputs(), and sprintf()	288
strcpy(), strcat(), strcmp(), and strlen()	290

<b>10 Using Pointers</b>	<b>295</b>
Pointer Variables	296
Declaring Pointers	297
Using Pointer Variables	299
Initializing Pointers	304
What Not to Do with the Address Operator	305
Pointers to Arrays	306
Pointers to Pointers	307
Pointers to Strings	310
Pointer Arithmetic	312
Pointer Arithmetic and Arrays	315
Problems with the Operators ++ and --	317
Using const with Pointers	317
Comparing Pointers	319
Pointer Portability	320
Using sizeof with Pointers under 16-Bit DOS Environments	320
Pointers to Functions	323
Dynamic Memory	327
Using void Pointers	330
Pointers and Arrays—a Closer Look	333
Strings (Arrays of Type char)	333
Arrays of Pointers	334
More on Pointers to Pointers	338
Arrays of String Pointers	346

	The C++ Reference Type . . . . .	348
	Functions Returning Addresses . . . . .	349
	Using the Integrated Debugger . . . . .	350
	When Should You Use Reference Types? . . . . .	350
	<b>11 Complete I/O in C . . . . .</b>	<b>353</b>
	Stream Functions . . . . .	355
	Opening Streams . . . . .	355
	Input and Output Redirection . . . . .	356
	Altering the Stream Buffer . . . . .	357
	Closing Streams . . . . .	360
	Low-Level Input and Output in C . . . . .	360
	Character Input and Output . . . . .	361
	Using <code>getc()</code> , <code>putc()</code> , <code>fgetc()</code> , and <code>fputc()</code> . . . . .	361
	Using <code>getchar()</code> , <code>putchar()</code> , <code>fgetchar()</code> , and <code>fputchar()</code> . . . . .	362
	Using <code>getch()</code> and <code>putch()</code> . . . . .	363
	String Input and Output . . . . .	363
	Using <code>gets()</code> , <code>puts()</code> , <code>fgets()</code> , and <code>fputs()</code> . . . . .	363
	Integer Input and Output . . . . .	365
	Using <code>getw()</code> and <code>putw()</code> . . . . .	365
	Formatting Output . . . . .	368
	Using <code>printf()</code> and <code>fprintf()</code> . . . . .	370
	Using <code>fseek()</code> , <code>ftell()</code> , and <code>rewind()</code> . . . . .	375
	Using the Integrated Debugger . . . . .	378
	Formatting Input . . . . .	380
	Using <code>scanf()</code> , <code>fscanf()</code> , and <code>sscanf()</code> . . . . .	380
	<b>12 An Introduction to I/O in C++ . . . . .</b>	<b>383</b>
	Streamlining I/O with C++ . . . . .	384
	<code>cin</code> , <code>cout</code> , and <code>cerr</code> . . . . .	385
	The <code>&gt;&gt;</code> Extraction and <code>&lt;&lt;</code> Insertion Operators . . . . .	385
	From <code>STREAM.H</code> to <code>IOSTREAM.H</code> . . . . .	394
	Operators and Member Functions . . . . .	395
	<b>13 Structures, Unions, and Miscellaneous</b>	
	Items . . . . .	411
	Structures . . . . .	412
	Structures: Syntax and Rules . . . . .	412
	C++ Structures: Additional Syntax and Rule Extensions . . . . .	415

Accessing Structure Members	415
Constructing a Simple Structure	416
Passing Structures to Functions	418
Constructing an Array of Structures	420
Using Pointers to Structures	424
Passing an Array of Structures to a Function	426
Structure Use in C++	430
Additional Manipulations with Structures	433
Unions	435
Unions: Syntax and Rules	435
Constructing a Simple Union	436
Miscellaneous Items	438
Using typedef	438
Using enum	440
<b>      14 Advanced Programming Topics</b>	<b>443</b>
Type Compatibility	444
ANSI C Definition for Type Compatibility	444
What Is an Identical Type?	444
Enumerated Types	446
Array Types	446
Function Types	446
Structure and Union Types	447
Pointer Types	447
Multiple Source File Compatibility	447
Macros	447
Defining Macros	448
Macros and Parameters	449
Problems with Macro Expansions	450
Creating and Using Your Own Macros	452
Macros Shipped with the Compiler	453
Advanced Preprocessor Statements	453
#ifdef and #endif Directives	454
#undef Directive	455
#ifndef Directive	455
#if Directive	456
#else Directive	456
#elif Directive	457
#line Directive	457
#error Directive	458
#pragma Directive	458
Conditional Compilation	459

Preprocessor Operators	460
# Stringize Operator	460
## Concatenation Operator	461
#@ Charizing Operator	462
Proper Use of Header Files	462
Making Header Files More Efficient	463
Precompiled Header Files	464
Creating Precompiled Headers	464
Using Precompiled Headers	465
LIMITS.H and FLOAT.H	465
Handling Errors—perror()	466
Dynamic Memory Allocation—	
Linked Lists	469
Considerations When Using Linked Lists	470
A Simple Linked List	471

## ||||| 15 Power Programming: Tapping

Important C and C++ Libraries	475
Important C and C++ Header Files	476
Standard Library Functions (STDLIB.H)	477
Performing Data Conversions	477
Performing Searches and Sorts	481
Miscellaneous Operations	484
The Character Functions (CTYPE.H)	486
Checking for Alphanumeric, Alpha, and ASCII Values	487
Checking for Control, White Space, and Punctuation	489
Conversions to ASCII, Lowercase, and Uppercase	492
The String Functions (STRING.H)	494
Working with Memory Functions	495
Working with String Functions	498
