Experimental Stochastics

With 52 Figures, a CD-ROM
and an Installation Manual

Springer

Contents

Part 1. Artificial Randomness

1.0 Survey	3
1.1 Random Generators	4
1.1.1 The Necessity of Sample Values	4
1.1.2 Random Numbers	5
1.1.3 Obtaining Random Numbers	5
1.1.4 Requirements	6
1.1.5 Pseudo Random Generators	6
1.1.5.1 Von Neumann Generator	7
1.1.5.2 Quadratic Residue Generator	7
1.1.5.3 Linear Congruential Generator	7
1.1.5.4 Tausworthe Generator	7
1.1.6 Linear Congruential Generators	8
1.1.7 Tausworthe Generators and Galois Fields	9
1.1.8 Tausworthe Generators: T-Machine	11
1.2 Our Collection of Random Generators	13
1.2.1 About Our Collection	13
1.2.2 TurboPascal	13
1.2.3 Von Neumann	14
1.2.4 Multi	15
1.2.5 Linear1	18
1.2.6 Linear2	18
1.2.7 Quadres	19
1.2.8 Tausworthe1	20
1.2.9 Tausworthe2	21
1.2.10 Radio	23
1.3 Tests for Random Generators	24
1.3.1 Statistical Tests	24
1.3.1.1 χ^2 Goodness-of-Fit Test	24
1.3.1.2 Classic Tests	27
1.3.1.3 Variable Sample Sizes	39

1.3.2	Time Series Analysis Tests	41
1.3.2.1	Methods of Time Series Analysis	41
1.3.2.2	The Autocovariance Function	42
1.3.2.3	Asymptotic Behavior of the Autocorrelation Coefficients	44
1.3.2.4	Fourier Transforms	44
1.3.2.5	The Periodogram	45
1.3.2.6	Computer Experiment	47
1.3.2.7	Results	49
1.3.3	Visual Tests	50
1.3.3.1	Uniform Generation	50
1.3.3.2	Geometric Structures	51
1.3.3.3	Patterns	54
1.4	Generating Sample Values	58
1.4.1	Generating Concepts	58
1.4.1.1	Transformation with \hat{F}	58
1.4.1.2	Convolution Operations	63
1.4.2	$N(0, 1)$ Sample Values	64
1.4.2.1	Box-Mueller Method	64
1.4.2.2	Polar-Marsaglia Method	67
1.4.2.3	Central Limit Theorem	71
1.4.3	Sample Values of Various Distributions	72
1.4.3.1	Binomial Distribution	72
1.4.3.2	Poisson Distribution	73
1.4.3.3	Geometric Distribution	75
1.4.3.4	Exponential Distribution	76
1.4.3.5	Fermi-Dirac Distribution	77
1.4.3.6	Erlang Distribution	78
1.4.3.7	χ^2 Distribution	79
1.5	Goodness-of-Fit Tests for Arbitrary Distributions	80
1.5.1	Fundamentals	80
1.5.2	Computer Experiment	80
1.5.3	Test Results	81
1.6	Monte-Carlo Integration	83
1.6.1	Estimation of a Definite Integral	83
1.6.2	Hit-or-Miss and Mean-Value Methods	83
1.6.2.1	Hit-or-Miss Method	83
1.6.2.2	Mean-Value Method	84
1.6.3	Computer Experiment	85

1.7 Bibliographical Comments	86
1.7.1 Random Generators	86
1.7.2 Tests for Random Generators	87
1.7.3 Generating Sample Values	87
1.7.4 Monte-Carlo Integration	88

Part 2. Stochastic Models

2.0 Survey	91
2.1 Buffon Experiments	93
2.1.1 The Buffon Problem	93
2.1.2 Various Experiments	93
2.1.3 Computer Experiments	94
2.2 Service Systems	95
2.2.1 Comparison of Two Service Modes	95
2.2.1.1 Waiting System	95
2.2.1.2 Service Modes	95
2.2.1.3 Performance of Service Systems	95
2.2.1.4 Model Description	96
2.2.1.5 Computer Experiment	98
2.2.2 Programs	98
2.2.2.1 Program “WaitingSystem”	98
2.2.2.2 Main Data Structure	100
2.2.2.3 Procedure <code>RunThrough</code>	100
2.2.2.4 The Elements of the Procedure <code>RunThrough</code>	100
2.3 Kinetic Gas Theory	102
2.3.1 Ideal Gas	102
2.3.1.1 Contributions of Maxwell and Boltzmann	102
2.3.1.2 Momentum Absorption	102
2.3.1.3 Pressure	103
2.3.1.4 Stochastic Model	103
2.3.1.5 Temperature	105
2.3.1.6 State Equation	105
2.3.1.7 Computer Experiment	106
2.3.2 Programs	106
2.3.2.1 Program “IdealGas”	106
2.3.2.2 The Main Data Structure	107
2.3.2.3 Procedure <code>Init</code>	107
2.3.2.4 Procedure <code>RunThrough</code>	108
2.3.2.5 The Elements of the Procedure <code>RunThrough</code>	109
2.3.2.6 Procedure <code>Evaluation</code>	109

2.4 Kinetic Dynamics and Equilibrium	110
2.4.1 The Contributions of Maxwell and Boltzmann as a Starting Point	110
2.4.2 Kinetic Dynamics	110
2.4.3 The Kernel Density Estimator	112
2.4.4 Computer Experiment	113
2.4.5 Asymptotics	114
2.4.6 Video Clips	115
2.5 Bibliographical Comments	117
2.5.1 Buffon Experiments	117
2.5.2 Service Systems	117
2.5.3 Kinetic Gas Theory	118
2.5.4 Kinetic Dynamics and Equilibrium	118

Part 3. Stochastic Processes

3.0 Survey	121
3.1 Markov Chains	122
3.1.1 Conditioning on the Current State	122
3.1.1.1 Markov Property	122
3.1.1.2 The Markov Chain	122
3.1.1.3 Computer Experiment	124
3.1.2 An Application	124
3.1.2.1 Typical Applications	124
3.1.2.2 The Problem	124
3.1.2.3 Sketch of the Proof	125
3.1.2.4 Computer Experiment	125
3.1.3 Programs	126
3.1.3.1 The Concept	126
3.1.3.2 Description	127
3.2 Birth and Death Processes	129
3.2.1 Evaluating Trajectories	129
3.2.1.1 The Simple Birth and Death Process	129
3.2.1.2 Mean and Extinction Probability	129
3.2.1.3 The Chapman-Kolmogorov Equation	130
3.2.1.4 Computer Experiment	131
3.2.2 Programs	131
3.2.2.1 Generating Trajectories	131

3.3	Diffusion Processes	133
3.3.1	Brownian Motion	133
3.3.1.1	The Physical Phenomenon	133
3.3.1.2	The Stochastic Process	133
3.3.1.3	Computer Experiment	134
3.3.2	Dirichlet Problem	135
3.3.2.1	A Physical Problem	135
3.3.2.2	Mathematical Formulation	135
3.3.2.3	Sketch of the Proof	136
3.3.2.4	Computer Experiment	137
3.3.3	Programs	139
3.3.3.1	Generating Trajectories	139
3.3.3.2	The Iteration	139
3.3.3.3	Data Structures	141
3.4	Control of Traffic Lights	142
3.4.1	The Green Time as Control Variable	142
3.4.1.1	The Technical Model	142
3.4.1.2	Volume of Traffic	143
3.4.1.3	Computer Experiment	144
3.4.2	The Critical Green Time	145
3.4.2.1	Traffic Flow	145
3.4.2.2	The Queueing Process	145
3.4.2.3	Iteration of Distributions	146
3.4.2.4	Discussion of the Model	147
3.4.2.5	Collapse of Traffic	147
3.4.2.6	The Critical Green Time	148
3.4.2.7	Computer Experiment	148
3.4.3	Ergodicity	149
3.4.3.1	Independence from the Initial Distribution	149
3.4.3.2	Proving Methods	149
3.4.3.3	Computer Experiment	150
3.4.4	Optimal Green Times	150
3.4.4.1	The Concept of Optimal Green Time	150
3.4.4.2	Numerical Analysis	151
3.4.4.3	RiLSA	151
3.4.4.4	Computer Experiment	152
3.4.5	Computer Validation	153
3.4.5.1	Objective	153
3.4.5.2	Computer Experiment	153

3.5 Bibliographical Comments	155
3.5.1 Markov Processes	155
3.5.2 Birth and Death Processes	155
3.5.3 Diffusion Processes	155
3.5.4 Control of Traffic Lights	156

Part 4. Evaluation of Statistical Procedures

4.0 Survey	159
4.1 Experimental Evaluation	161
4.1.1 What is Statistics?	161
4.1.2 Empirical Evaluation and Experimentation	162
4.1.3 Evaluation	162
4.2 Neyman Pearson Lemma	164
4.2.1 Test Problem	164
4.2.2 The Solution Concept	165
4.2.3 The Fundamental Lemma	165
4.2.4 Computer Experiment	167
4.3 Wald Sequential Test	170
4.3.1 Sequential Probability Ratio Test	170
4.3.2 Test Procedure	170
4.3.3 Operations Characteristic	172
4.3.4 Computer Experiment	173
4.4 Bayesian Point Estimation	175
4.4.1 Bayesian Model	175
4.4.2 Bayesian Concept	176
4.4.3 A Posteriori Distribution	176
4.4.4 Various Loss Functions	177
4.4.5 Computer Experiment	178
4.5 Hartigan Procedures	181
4.5.1 Description	181
4.5.1.1 Hartigan Procedure	181
4.5.1.2 The Subsample Method	182
4.5.1.3 Computer Experiment	183
4.5.2 Computer Program	184
4.5.2.1 Program Description	184
4.5.2.2 Preliminary Considerations for the Subsample Method	184

4.5.2.3 Problems with Storage Capacity During the Subsample Method	186
4.6 Bibliographical Comments	189
4.6.1 Experimental Evaluation	189
4.6.2 Neyman Pearson Lemma	189
4.6.3 Wald Sequential Test	189
4.6.4 Bayesian Point Estimation	190
4.6.5 Hartigan Procedures	190
References	193
Symbols	199
Index	203
