

PACIFIC TELECOMMUNICATIONS USERS: A Spectrum of Requirements

PTC '87

Proceedings of the Ninth Annual Pacific Telecommunications Conference
Honolulu, Hawaii, January 18-21, 1987

Edited by

DAN J. WEDEMEYER
University of Hawaii

and

MARY SUE BISSELL
Pacific Telecommunications Council

1987

NORTH-HOLLAND - AMSTERDAM • NEW YORK • OXFORD • TOKYO

Table of Contents

PAGE		PAGE	
vi	FOREWORD	41	<i>International Private User Networking: A Business Perspective</i> R.T. Butkus, M. Benveniste and R.W. Ross, Jr.
vii	TABLE OF CONTENTS	47	<i>Pacific Cable System Between the U.S. and Japan</i> Dennis W. Elliott
xi	SUMMARY	53	<i>The FCC's Promotion of International Competition: Has It Helped the User?</i> Timothy J. Logue
 Sunday, January 18		 61	
1	OPENING PLENARY SESSION Pacific Overview	61	<i>The Strategic Management of Telecommunications in the Information Age: A Case Study of Three Large Users</i> Charles W. Steinfield, Gary Pizante and Megumi Komiya
	KEYNOTERS:	69	<i>The Global Aspects of ISDN</i> David T. Tudge
3	<i>The New Zealand Communications Environment: Goals, Demands, Pressures</i> Jonathan Hunt	75	Session 2: <i>User Perspectives</i>
9	<i>Consolidating Communication Services in a Multi-National Environment</i> Edmond J. Blausten	77	<i>How To Meet the Diversifying User's Requirements: A Strategy for the Provision of New Telecommunication Services</i> Masanori Amano
16	<i>Telecommunications and the Emerging Global Corporation</i> R.W. Sturm	84	<i>Cellular Communications, The New Medium: The Los Angeles Experience</i> Alex L. Dresser
20	<i>International Users: Their Place in Planning</i> Peter Smith	87	<i>Analysis of NTT's Telephone Card Marketing: Case Study of User Participation for Making Successful Telecommunication Products</i> Kazuaki Katori
 Monday, January 19		97	<i>The Local Telco's Fight for Change</i> Daniel T. Ray
25	PLENARY: Large Business & Industrial Users	104	<i>Catch 22: A Case Study of Hawaiian Tel Company</i> Meheroo Jussawalla and Vince Ebata
27	<i>Use of Virtual Private Networks to Satisfy Large Users' Needs</i> M. Iwama	116	<i>A Strategic Perspective for Hawaii's Future Users of Telecommunications</i> Patricia Lum and William W. Milks
36	<i>Meeting User Requirements: A Networking Perspective</i> A.L. Moore	127	Session 3: <i>National Developments</i>
39	Session 1: <i>Overviews: Users & Service Providers</i>		

PAGE	
129	Results of Selected Experiences with Local Charging Systems and Network Digitalization in Chile Carlos Masao Haramoto
140	User Impediments: Regulatory Restraints in an Era of Deregulation, The Canadian Situation Thomas L. McPhail
146	Facsimile Communications Via the International Public Switched Telephone Network Akifumi Nakao
151	Restructuring of Telecommunications in the Philippines Eitel M. Rizzoni
162	Technological Self-Reliance in Korea Telecommunications Jung Uck Seo
167	Session 4: <i>Technical Applications</i>
169	Effectiveness and Problems of Information Network System Using Digital Technology Sadao Aoki, Nobuo Sakata and Tsutomu Saito
179	The Present Status and Future Trend of Private ISDN Using High Speed Digital Path Kazunori Hisajima
184	Design and Engineering Guidelines for Effective Network Planning John Z. Jacoby and Dominic H. Wong
193	Report on the Present Situation of OSI Diffusion Activities in Japan Dr. Yutaka Matsushita
203	Digital Radio Multiple Access Subscriber System (DRMASS) M. Miyake, K. Takeuchi, K. Yamamoto, S. Shinmyo, M. Ogawa and M. Yamauchi
211	Statistical Switching Networks for Integrated Services Moshe Rozenblit
217	AFTERNOON PLENARY: Technology Diffusion
219	Japan's Telecommunications Industry: Our Present Status and the Challenges We Face Namio Hashimoto

PAGE	
224	Cultural and Telecommunications Futures in Six Pacific Islands Christopher Jones, Barbara Moir and James Dator
231	Pacific Islands Round Table
233	Planning the Use of Satellite Transmissions Within the South Pacific Telecommunications Development Programme E.J. Wilkinson
239	Improving Telecommunications in Developing Countries: A Strategy for Action Janet S. Mackey and Jane N. Hurd
Tuesday, January 20	
247	PLENARY: Governmental & Public Users
249	Policies of the MPT of Japan Towards the Advanced Information Society Minoru Shioya
253	Session 1: <i>Public & Private Networks</i>
255	Using Public Data Networks to Enhance the Functionality of Private Networks Harvey Baumel
260	Introduction of Digital Loop Carriers in Pacific Basin Countries Joseph B. Cheung
264	Private Satellite Networks for Business Communications H. Allen Ecker
273	The Impact of Satellite Technology on The Globe and Mail, Canada's National Newspaper D.E. Evans
276	Electronic Information Dissemination: Opportunities for Users in the Public Sector David Richardson, John Hont and Chris Ballenden
281	Session 2: <i>Using the Broadcast Medium</i>

PAGE	
283	Legal Issues Surrounding International Sports Broadcasting Thomas Joseph Cryan and James S. Crane
290	Television in Indonesia: Towards a Revolutionary Information Era Ishadi Sk
296	Remote Commercial Television & Telecommunications in Australia James C. Lange
302	Getting the News to the Public in Truk: A Telecommunications Perspective Eric H. Metzgar
307	Australia Pioneers B-MAC for Television Broadcasts by Satellite Gerald Moriarty
311	Session 3: <i>Shared Tenant Services and Teleports—A Videoconference Discussion</i>
313	One Perspective on Digital Videoconferencing, Shared Tenant Services, the Demand for Teleports and State Regulation George E. Darby
317	Session 4: <i>Using Information Systems</i>
319	Some Experiences in the Field Trial of Videotex Service in Taiwan Yu-Huei Jea
324	A Value-Added Model of Electronic Mail Utilization Paul S. Licker, Peter R. Newsted and Bernard S. Sheehan
334	The Study for the Advanced Use of CAPTAIN—Videotex Information Service in Corporation Yurihiko Tamechika and Tomoko Kano
342	Electronic Mail and a Private Satellite Network Christine Wirth
346	The Study for an Advanced Use of Satellite Communication—The Development of the Distributed Videotex Data Base Retrieval System Using Satellite Communication Koichi Yamakawa and Keisuke Doi

PAGE	
357	Working Groups: <i>Background Papers</i>
359	Patents, Copyrights and Trade Secrets as Applied to Telecommunications in the United States Stephen E. Baldwin and Henry K. Woodward
366	All Digital Networks, and How the User Benefits Peter J. Cott
368	U.S. Technical Data Export License Regulations and National Security Fred M. Greguras
375	Alternative Telecommunications Financing in Developing Countries Norman C. Lerner
377	Education at Home Through Teleconferencing Helen Sprawls

Wednesday, January 21

381	PLENARY: Rural, Remote & Small Users
383	INTELSAT: The Pacific and Communications Development Joseph N. Pelton
390	Rural Telecommunications Requirements in the Philippines Rosauro V. Sibal
394	Emerging Pacific Island Service Requirements Robert M. Engelbardt
399	Session 1: <i>The New Environment</i>
401	Social Impact of Intelligent Telecommunication Networks Syed V. Ahamed
409	Developing the Telecommunications Profession—Certification Program Design William Ammentorp, Harry Hurley, Matt Ammentorp and David Hoffman

PAGE		PAGE	
417	A New Work Environment Applied Advanced Telecommunication Facilities—C & C Satellite Office Kiichi Fujino and Toshio Terashima	480	The Impact of Telephone Networks on Rural and Educational Development: Experiences of the AID Rural Satellite Program Karen Tietjen, Willard Shaw and Clifford Block
426	The Key Aspects of Software Quality and Management Systems Kiyoh Nakamura and Mamoru Sugawara	491	Session 4: <i>Applications of Small Aperture Earth Stations</i>
435	Session 2: <i>Rural & Remote Users</i>	493	Very Small Aperture Terminals (VSAT) —An Overview Joseph Freitag, Jr.
437	Quality Service to Small Communities Vasanta Raju, C.S. Mohan, K.R.S. Murthy, R. Sridharan and M.K. Sudarshan	499	Equatorial Spread Spectrum Technology Roger G. Clark
446	Rural Telecommunications in Thailand: Experiences from a Project in Progress Precha Rugsachart and Duncan Sharp	503	The Network Monitor and Control of the Mini-Earth Station Networks Akira Fujii, Yoshimi Teshigawara and Hideki Namba
453	AUSSAT—Satellite Services in Australia Michael Wagg	509	Application of Millimeter-Wave Satellite Communication to Asia- Oceanian Region and Consideration of Experimental System Shunkichi Isobe, Takashi Iida, Yoshiaki Suzuki, Shigetoshi Yoshimoto, Yoshinori Arimoto, Susumu Kitazume, Tatsuya Koike, Hideki Kobayashi and Akihiko Inoue
457	Session 3: <i>Educational Uses</i>	515	Ku-Band Small Aperture Earth Stations for Cost Effective Communications Andrew D. Poole
459	USPNET Satellite Development: An Educational Model from the South Pacific—A Personal View from Within Marjorie Tuainekore Crocombe	518	Proposed Telecommunications Network Architecture in the Pacific Ocean Region: Satellite Communica- tions System Using Micro Terminals H. Yuguchi, S. Endo, M. Ohkawa and F. Makita
463	Open Learning Systems Through Telecommunications Glen Farrell and Lucille Pacey	525	Index
470	Telecommunications Technology and Special Education Needs in the Pacific Region Deanna Robinson, Richard Zeller, Carl Bybee and Graham Wagner		
472	Enriching Classroom Experiences and Career Opportunities Through Telecommunication Technologies: The Global Education TELEclass Project Partnership Model John H. Southworth and Carole Ishimaru
