International Conference on

SIMULATION '98

30 September - 2 October 1998

VENUE

University of York, UK

Contents

The Institution of Electrical Engineers is not, as a body, responsible for the opinions expressed by individual authors or speakers

Page No

AIR TRANSPORT

1 **The mother of invention**
P Denne
Guilden Ltd, UK

8 **The use of simulation and virtual reality in the design and operation of airport terminals**
S Crook
Westland System Assessment Ltd, UK

11 **Avionic system modelling**
R J Bluff
DERA Farnborough, UK

BIOMEDICAL ENGINEERING

19 **Optimisation of a blood separation process based on simulation**
A Diehl and G Frey
University of Kaiserslautern, Germany

27 **Chaos as a possible model of electromyographic activity**
G J Small, N B Jones and J C Fothergill
University of Leicester, UK
A P Mocroft
The Queen Elizabeth Hospital, Edgbaston, UK

35 ***In vitro* generation of replacement knee wear by simulation**
P A Lilley and P Mason
Kingston University, UK
G W Blunn
University College London, UK

42 **Simulation of the wear of metal implants by soft-tissue**
P A Lilley and M Raine
Kingston University, UK
G W Blunn
University College London, UK

Page No

AEROSPACE

50 **Integration of a real-time parallel transputer-based helicopter simulation with real flight control hardware**
A Gee and T Clarke
University of York, UK

58 **Investigation of the handling qualities of fighter aircraft with relaxed static stability at high angles of attack using a holistic simulation approach**
L D Evangelou,
Hellenic Air Force, Greece
G G Kapadoukas
CAE Electronics, UK
A W Self
Kingston University, UK

69 **Gas turbine engine fault detection using Markov simulation technique**
G G Kulikov and T V Breikin
Ufa State Aviation Technical University, Russia
V Y Arkov
Russian Academy of Science, Russia
P J Fleming
University of Sheffield, UK

73 **A dynamic non-contacting optical interface**
S Mottershead and D Woods
SEOS Displays Ltd, UK
J Karwatzki and D Briers
Kingston University, UK

SURFACE TRANSPORT

79 **Simulation of drive line dynamics of light-rail vehicles**
M W Winterling and E Tuinman
HMA Power Systems, The Netherlands
W Deleroi
Delft University of Technology, The Netherlands

85 **HIPERTRANS : a road traffic simulation as an operational tool**
S E Ijaha, S C Winter and N Kalantery
University of Westminster, UK
B K Daniels
BKD Consultants Ltd, UK

93 **Computer simulation of transit power systems**
J G Yu, A M M Khan and K Loring
Cegelec Projects Ltd, UK

Page No

99 **Simulation as a means of achieving "the impossible": an investigation into the use of simulation in the development of electronic control systems at Jaguar Cars**
I R Kendall
Jaguar Cars Ltd, UK
R P Jones and S M Thomas
University of Warwick, UK

SPACE SYSTEMS

107 **Simulation of space vehicle control under uncertainty of information**
S I Kumkov
Ural Branch of Russian Academy of Sciences, Russia

114 **A simulation tool for the reliability analysis of communication satellite payloads**
M Ruggieri and E Cerone
University of Roma "Tor Vergata", Italy

121 **The use of simulation techniques in the design and manufacture of satellites**
T Kennedy and D Self
Mullard Space Science Laboratory, UK
A Self and M Safa
Kingston University, UK

AUTOMOTIVE SYSTEMS

126 **Modelling and simulation of hydraulic components for vehicle applications - a precursor to control system design**
S C George, K J Burnham and J L Mahtani
Coventry University, UK

133 **Comparison of suspension rig measurements with computer simulation**
B Ozdalyan, M V Blundell and B Phillips
Coventry University, UK

140 **Anti-lock braking system simulation and modelling in ADAMS**
B Ozdalyan and M V Blundell
Coventry University, UK

145 **A mathematical transient model for the dynamics of a single-cylinder diesel engine**
Y H Zweiri, J F Whidborne and L D Seneviratne
King's College London, UK

Page No

POSTER PRESENTATIONS

152 **Simulation of activated sludge process control strategies**
M K Rangla and K J Burnham
Coventry University, UK
L Coyle and R I Stephens
CEGELEC Projects Ltd, UK

158 **Decompositional modelling and simulation of power system electromagnetic transients**
I M Dudurych
State University "Lviv Polytechnic", Ukraine

162 **Application of minimax evaluation procedures for expansion of metrological standard on noised measurements processing**
S I Kumkov
Ural Branch of Russian Academy of Sciences, Russia

168 **Simulation of hybrid systems based on interpreted Petri nets**
G Frey
University of Kaiserslautern, Germany

176 **The development of a total system aircraft landing control scheme**
C Papadopoulos and A Self
Kingston University, UK
G Kapadoukas
CAE Electronics plc, UK

182 **Control systems for power electronics**
M N Cirstea and M McCormick
De Montfort University, Leicester, UK

187 **Intelligent decision-making for reactive scheduling in FMS**
J F O'Kane
Staffordshire University, UK
D K Harrison
Glasgow Caledonian University, UK
T S Baines
Cranfield University, UK

195 **MATLAB-SIMULINK® library for AC drives simulation**
S Ivanov, A Câmpeanu, A Bitoleanu and M Popescu
University of Craiova, Romania

201 **On optimising the routing algorithms of a GSM infrastructure network for supporting time critical applications**
A Kalis and T Antonakopoulos
University of Patras, Greece

Page No

209 **Simulation of switched-mode power electronic circuits**
B Baha
University of Brighton, UK

KEYNOTE ADDRESS

215 **Innovative design of management systems through simulation**
A Fowler
University of Newcastle upon Tyne, UK

MANAGEMENT SYSTEMS

223 **Using virtual humans to solve real ergonomic design problems**
S A Gill and R A Ruddle
Cardiff University, UK

230 **Embedded software simulation - concurrent engineering and beyond**
M Caffyn
Westland System Assessment Ltd, UK

235 **Use of simulation to evaluate the benefits of timely defect information**
M A Rodrigues and L Bottaci
University of Hull, UK

240 **A modelling method for production management information systems (for a machine-building plant)**
G G Kulikov, A V Rechkalov, R Chernyahovskaya and A N Nabatov
Ufa State Aviation Technical University, Russia

CONTROL SYSTEMS

244 **An intelligent control method on three-stage inverted pendulums**
L Ruisen, L Liang and G Li
Shanghai University, China

249 **Modelling and simulation considerations for an industrial crane**
M Kees, K J Burnham, A Dunoyer and J H Tabor
Coventry University, UK

253 **Robust automatic generation control**
M Azzam
Minia University, Egypt

259 **Extended simulation model for a brewery fermentation process**
C R Johnson, K Burnham and D J G James
Coventry University, UK

263 **A rapid prototyping co-simulation environment for neural control**
S M Thomas
University of Warwick, UK

Page No

MANUFACTURING SYSTEMS

271 **Benefits of a systematic approach for problem analysis on manufacturing simulation modelling**
A W M Lung
Kingston University, UK

277 **Applications of the Monte Carlo simulation method in tool selection for punching operations in the sheet metal industry**
E Summad and E Appleton
University of Durham, UK

284 **Rapid prototyping of a real time DSP based motor drive controller using Simulink**
C D French, J W Finch and P P Acarnley
University of Newcastle upon Tyne, UK

292 **Model representation methods in simulation of manufacturing systems**
F Schormann and T Perera
Sheffield Hallam University, UK

297 **Design and development of a rapid data collection methodology**
K Liyanage and T Perera
Sheffield Hallam University, UK

PHYSICAL PHENOMENA

305 **Evolution of an AGI control strategy using Simulink**
A F Doonan
University of Sunderland, UK

313 **Thermal simulation of PCBs with embedded resistors**
A M R Witwit, D Stubbs, S H Pulko and A J Wilkinson
University of Hull, UK

317 **A transmission-line-matrix model for microwave heating problems**
A Saidane and A Amri
ENSET-ORAN, Algeria

325 **Time-step changes and parity effects in TLM thermal models**
D de Cogan
University of East Anglia, UK

329 **Development and application of computer software for simulation of vibration analysis in education**
M R Askari and R Davis
Kingston University, UK

Page No

338 **Dynamic control of flexing structure**
M Farsi, K Z Karam and A J Moon
Newcastle University, UK

INDUSTRIAL PLANT

344 **A generic methodology that aids the application of system dynamics to manufacturing system modelling**
C Lin, T S Baines, J O'Kane and D Link
Staffordshire University, UK

350 **Use of the LMS adaptive signal processing technique to improve signal data rates from practical oil well logging equipment**
R S Sherratt
University of Reading, UK

354 **Dynamic modelling and simulation of the air blown gasification cycle prototype integrated plant**
A W Pike, M S Donne and R Dixon
GEC Alsthom, UK

MOTOR DRIVES

362 **Simulation of a 'direct on line' start of a large induction motor connected to a salient pole synchronous generator**
E Tuinman, P Piers and R De Weerdt
HMA Power Systems bv, The Netherlands

368 **Simulation of the effects of cables on inverter fed motor drive systems**
M H Nagrial, A Hellany and J Rizk
University of Western Sydney, Nepean, Australia

375 **A novel neural PWM controller**
A Dinu, M N Cirstea and M McCormick
De Montfort University, Leicester, UK

380 **Modelling and simulation of vector-controlled reluctance motor drive system**
M A Mohamed and M H Nagrial
University of Western Sydney Nepean, Australia

POWER DISTRIBUTION

385 **Simulation of the partial discharge phenomena in defective overhead line conductors through an empirical approach**
R K Aggarwal, A T Johns and J A S B Jayasinghe
University of Bath, UK
B Gwyn and R Stone
The National Grid Company, UK
C Cameron
Scottish Power, UK

Page No

390 **Digital simulation of the transient phenomena in high voltage power transformers with particular reference to accurate fault detection**
R K Aggarwal and P Mao
University of Bath, UK

398 **Optimised design of rotor field winding of a turbogenerator using both thermal and electromagnetic FE methods**
E Tuinman, W A de Zeeuw, and R De Weerdt
HMA Power Systems bv, The Netherlands

405 **Simulation studies with a continuously online trained artificial neural network controller for a micro-turbogenerator**
G K Venayagamoorthy and R G Harley
University of Natal, South Africa

ELECTRONICS & COMMUNICATION SYSTEMS

413 **Hardware and software fault simulation**
R Stroph and T Clarke
University of York, UK

420 **3D modelling and design of current conical magnets**
A Djerdir, P Hiebel and J M Kauffmann
CREEBEL-IGE, France
E Voisin
GEC-Alsthom Intermagnetics, France

426 **Finite element simulation of the electromagnetic fields for thin conductors**
F X Zgainski
Electricité de France, France

432 **Simulation of a wireless communications network which employs distributed dynamic channel assignment**
D Grace, T C Tozer and A G Burr
University of York, UK
