

Experimental Methods in Inorganic Chemistry

JOHN TANAKA
University of Connecticut

STEVEN L. SUIB
University of Connecticut

Prentice Hall, Upper Saddle River, New Jersey 07458

TABLE OF CONTENTS

Part I Background Material 1

2	Safety in the Chemical Laboratory
6	Laboratory Notebooks
8	Laboratory Glass and Laboratory Glassblowing
21	Heating and Cooling
31	Handling Air and Moisture Sensitive Compounds
34	Chromatography
38	Thermal Analysis
41	Infrared Spectroscopy
47	Magnetic Susceptibility
58	Mass Spectrometry
65	Nuclear Magnetic Resonance
73	X-Ray Diffraction
89	Electron Paramagnetic Resonance
93	Computational Chemistry
105	Structural Inorganic Chemistry

Part II Laboratory Exercises 121

122	Crystal Growth in Gels
128	Structural Inorganic Chemistry via Models - Session One
140	Structural Inorganic Chemistry via Models - Session Two
156	Sodium Peroxoborate
161	Measurement of High Temperatures
165	Preparation of Phosphors
169	Copper(II) Oxide
175	Structural Inorganic Chemistry via Models - Session Three
192	Brucite and Magnesia
198	Strontium Zincate(II)
201	Cadmium(II) Iodide
205	Manganese(IV) Oxide
208	Pillared Clays

215	Potassium Nitrilosulfonate
220	Tin(IV) Chloride
227	Surface Conductive Glass
231	Copper(I) Chloride
235	Mercury(II) Tetrathiocyanatocobaltate
238	Synthesis of a Superconductor
243	12-Tungstophosphoric Acid
246	Copper Compounds
249	Potassium Trifluoronickelate(II)
254	Potassium Trifluoromagnesate
259	Potassium Iodate and Clock Reaction
263	Ethylenediamine Complexes of Cobalt and Nickel
268	Ethylenediamine Complexes of Chromium
272	Hexaammine Cobalt(III) Chloride
275	Chloropentaamminecobalt(III) Chloride/ Nitropentaamminecobalt(III) Chloride
279	Ferrocene
285	Phase Diagram of an Alloy
294	Metal Complex Used for DNA Cleavage
300	Synthesis of Heterogeneous Catalysts and Catalyst Supports
305	Preparation of a Zeolite, B/Al ZSM-11
312	Molecular Modeling Computational Laboratory

Part III Characterization Techniques 321

322	Conductivity of Ionic Solutions
331	Measurements of Magnetic Susceptibility
337	Absorption Spectra of Transition Metal Complexes
345	X-Ray Powder Diffraction of Pillared Clays
348	Luminescence Spectroscopy
355	X-Ray Photoelectron Spectroscopy
372	Calibration of Vacuum Line Components
379	Characterization of a Gaseous Unknown

Index 389
