

Hansjörg Donnerberg

# Atomic Simulation of Electrooptic and Magnetooptic Oxide Materials

With 45 Figures and 40 Tables

Springer

# Contents

<b>1. Introduction</b>	1
<b>2. The Scope of Theoretical Methods</b>	7
2.1 Electronic Structure Calculations	9
2.1.1 Perfect Crystals	15
2.1.2 Defective Crystals	18
2.2 Potential Simulations	33
2.2.1 Potential Forms and Applications	33
2.2.2 Derivation of Effective Crystal Potentials	40
<b>3. Barium Titanate</b>	49
3.1 Ferroelectricity of $\text{ABO}_3$ Perovskites	51
3.2 Defect Chemical Properties of Barium Titanate	54
3.3 Electronic Structure Calculations	58
3.3.1 Embedded Cluster Calculations for Transition Metal Ions in $\text{BaTiO}_3$	61
3.3.2 Simulation of Trapped Holes	77
3.3.3 Simulation of Electron-Type Bipolarons	97
3.3.4 Embedded Cluster Calculations of Oxygen Vacancies in $\text{BaTiO}_3$	98
<b>4. Potassium Niobate and Potassium Tantalate</b>	105
4.1 Shell Model Simulations in $\text{KNbO}_3$ and $\text{KTaO}_3$	106
4.1.1 Shell Model Parameters and Perfect Lattice Simulations	106
4.1.2 Defect Chemistry of $\text{KTaO}_3$ and $\text{KNbO}_3$	114
4.2 Polarizing Defect Centres	119
4.2.1 Dipole Formation Due to Off-Centre Displacements of Defects	122
4.2.2 Dipole Centres Due to Defect Aggregation	132
<b>5. Lithium Niobate</b>	147
5.1 Electronic Structure Calculations	147
5.2 Shell Model Simulations of Defect Chemical Properties	150

5.2.1	Intrinsic Defect Structure.....	150
5.2.2	Incorporation of Impurities .....	154
<b>6.</b>	<b>Strontium Barium Niobate .....</b>	<b>161</b>
<b>7.</b>	<b>Yttrium Iron Garnet .....</b>	<b>165</b>
7.1	Potential Models .....	165
7.2	Chemical Stability of YIG .....	168
7.3	Intrinsic Defect Structures .....	170
7.4	Intrinsic Electronic Properties.....	173
7.5	Impurities .....	179
7.5.1	Incorporation of Trivalent Impurities.....	181
7.5.2	Incorporation of Divalent and Tetravalent Impurities ..	184
<b>8.</b>	<b>Summary and Conclusions.....</b>	<b>191</b>
<b>References .....</b>		<b>193</b>
<b>Index .....</b>		<b>203</b>
